

Category 1: Content Creation

Prompt 1:

Design a GPT prompt that helps create a month-long content strategy for a brand's Instagram account. The AI should ask for the niche, content pillars, tone of voice, and target audience. It should then generate a 30-day calendar with post types (carousel, reel, story, quote), topics, suggested hashtags, engagement hooks, and caption frameworks. Also include advice for repurposing content across platforms and boosting consistency using a content batching workflow.

Prompt 2:

Write a prompt for GPT that guides users to repurpose a single long-form blog post into multiple short-form content formats. The AI should ask for the blog title and main points, then return tweet threads, Instagram captions, TikTok hooks, LinkedIn summaries, and Pinterest descriptions. It should tailor the tone and structure for each platform, and include republishing frequency tips to maximize visibility with minimal new content creation effort.

Prompt 3:

Create a GPT prompt to help content creators brainstorm lead magnets derived from their existing videos or blogs. Ask for the topic or URL of the original content, and instruct GPT to generate 3 downloadable ideas (e.g., PDF checklist, toolkit, guide). Include lead magnet titles, value propositions, delivery formats, and suggestions for calls-to-action to drive opt-ins via email or social media platforms.

Prompt 4:

Develop a GPT prompt that outlines a full YouTube video script based on a content creator's niche and topic idea. Ask for the audience type, pain points, and tone (educational, entertaining, inspiring). The AI should provide an outline with a hook, body points, call-to-action, and closing. Include a suggested title, description, and tags optimized for SEO. Add tips on retaining viewer attention and encouraging comments or likes.

Prompt 5:

Write a GPT prompt that assists in creating a high-converting email newsletter based on weekly blog content. The AI should ask for the blog's main topic, desired tone, and call-to-action type. Then it should return a subject line, header, engaging preview sentence, main content summary, and clickable CTA link. Add personalization techniques like dynamic fields, and advice for optimal send times based on audience activity.

Prompt 6:

Design a prompt for GPT that generates 10 educational TikTok or Reels ideas for a niche expert. Ask for the area of expertise and audience problems. Then return short-form video concepts including hook lines, visual ideas, and calls-to-action. The prompt should emphasize storytelling, edutainment, and use of trending audio. Include suggestions on how to script and film within 30–60 seconds for max engagement.

Prompt 7:

Create a GPT prompt to help freelancers craft a content portfolio across multiple platforms. GPT should ask for their field of work (e.g., writing, design, strategy), preferred content types (articles, visuals, tweets), and available samples. Then it should outline a structured plan to post across LinkedIn, Medium, Twitter, and Behance. Include title ideas, showcase tips, and positioning language that emphasizes credibility and results.

Prompt 8:

Build a GPT prompt that helps creators develop a storytelling framework across 5 social posts. Ask for the core brand message, customer pain point, and transformation promise. Then GPT should outline 5 angles: origin story, lesson learned, customer win, myth busting, and future vision. Each should come with a caption draft, suggested visual style, and hashtag cluster to attract the right audience.

Prompt 9:

Write a prompt that generates pillar content topics based on a niche. GPT should ask for the field of expertise and intended audience, then suggest 5–10 long-form content ideas (blogs, YouTube videos, or podcasts). Each idea should include a catchy title, 3 main sub-points, and possible SEO keywords. Also recommend ways to break each piece into micro-content to extend their reach.

Prompt 10:

Design a GPT prompt that helps writers overcome content burnout. Ask GPT to list ideas for refreshing formats (e.g., “X vs Y,” behind-the-scenes, AMA, tool reviews) and new platforms to test. Have the prompt ask what the user’s recent content has been about, and generate fun, low-effort content pieces that still engage their audience. Include content recycling strategies that require minimal additional work.

Prompt 11:

Write a GPT prompt that builds an automated social content creation workflow. Ask for the type of content (quotes, tips, tutorials), preferred platforms, and content frequency. GPT should return a tool stack recommendation (e.g., Notion, Zapier, Canva, Buffer), sample templates, and automation scripts. Include batching techniques, scheduling plans, and repurposing suggestions for time efficiency and brand consistency.

Prompt 12:

Create a GPT prompt that suggests podcast episode ideas around a brand’s core theme. Ask for the theme and target audience. GPT should generate 10 episode ideas, each with a catchy title, three key talking points, and a guest suggestion (if applicable). Include suggestions for audio hooks, CTAs for listener engagement, and repurposing audio into social soundbites or newsletters.

Prompt 13:

Design a GPT prompt to build a weekly content calendar template. Ask for preferred platforms (e.g., LinkedIn, TikTok, Newsletter), content goal (engagement, education, sales), and posting frequency. Then GPT should output a weekly plan with post types, suggested topics, CTA focus, and engagement tracking method. Include batching and scheduling tips to save time, especially for solo creators.

Prompt 14:

Write a GPT prompt that helps authors promote their books using social content. Ask for the book title, genre, and audience. Then generate post ideas like excerpt quotes, behind-the-scenes, writing process highlights, and reviews. Each post should include a hook, caption, and CTA (e.g., “read a sample” or “leave a review”). Include ways to adapt the content across reels, tweets, and threads.

Prompt 15:

Create a GPT prompt to generate carousel post ideas for educating followers. Ask for the niche, audience type, and top three questions they usually have. GPT should generate 5 carousel concepts with a title slide, 3–5 breakdown slides, and an ending CTA slide. Include caption examples and design recommendations for keeping visuals simple but on-brand. Add tips on boosting saves and shares.

Prompt 16:

Design a GPT prompt to create engagement-boosting polls and questions. Ask for the platform (e.g., IG stories, LinkedIn, Twitter), audience type, and content category. GPT should then generate 10 poll ideas, 5 open-ended question prompts, and 3 “this or that” content hooks. Each suggestion should include tips for placement timing, story follow-ups, and how to convert engagement into deeper interactions.

Prompt 17:

Build a GPT prompt that outlines a system for turning YouTube videos into blog posts. Ask for the YouTube URL, niche, and tone. GPT should transcribe or summarize the key points, suggest a blog headline, subheadings, call-to-action, and metadata tags. Include optimization tips for SEO, and optional formatting plugins that convert the blog post into a newsletter-ready format automatically.

Prompt 18:

Write a GPT prompt that creates 30 days of Twitter content for personal brands. Ask for the niche, personality tone (e.g., witty, thoughtful, educational), and content themes. GPT should then return 30 tweet ideas with hooks, emojis (if suitable), and thread options. Include a posting schedule template and a method for tracking engagement to iterate on successful formats.

Prompt 19:

Create a GPT prompt that assists in creating B2B content for LinkedIn. Ask for the industry, business goal (thought leadership, client acquisition), and service offered. GPT should return 5 content formats (e.g., case study post, client story, quote commentary), including sample headlines and structure for each. Include best practices for tone, timing, and engaging call-to-actions for bookings or conversations.

Prompt 20:

Design a GPT prompt that creates AI-written blog content that mimics a brand voice. Ask for the brand tone (casual, authoritative, quirky), target audience, and topic. GPT should return a structured outline with intro, 3–5 body headings, and CTA. Then generate a sample paragraph for each section in the chosen tone. Include SEO keyword usage tips and internal link suggestions.

Category 2: Digital Marketing

Prompt 1:

Create a GPT prompt that builds a multi-platform ad campaign strategy for a product launch. Ask the AI to collect information such as product details, target audience, desired outcomes (sales, leads), and budget. It should return a complete advertising blueprint with recommended channels (Meta, Google, YouTube), creative formats, audience targeting options, daily budget allocation, A/B testing structures, and post-campaign optimization steps. Include tracking suggestions using UTM parameters and pixels.

Prompt 2:

Write a GPT prompt that generates 7 days of email copy for a digital product funnel. GPT should ask for the product's key benefits, audience fears or hesitations, and whether this is a warm or cold audience. The prompt should return subject lines, email body copy with emotional triggers, and a strong call-to-action. Each email should have a unique angle (story, FAQ, testimonial, offer deadline, bonus), ensuring variety while maintaining consistency.

Prompt 3:

Design a GPT prompt that creates SEO blog outlines based on high-intent keywords. Ask the user to provide a seed keyword, target audience, and the intended product/service. GPT should return blog titles, meta descriptions, and detailed outlines that include H1–H3 structure, content prompts for each section, keyword density guidance, and internal linking ideas. Also include schema markup suggestions to help enhance SERP visibility for the article.

Prompt 4:

Generate a GPT prompt to help with customer avatar creation for digital marketing. Ask for industry, product type, and whether it's B2B or B2C. GPT should generate multiple personas with details like age, job role, pain points, goals, objections, platforms they use, and preferred content type. Each persona should include insights on how to position offers, messaging tone, and ad copy triggers that appeal to that profile.

Prompt 5:

Create a GPT prompt to write engaging Facebook or Instagram ad copy using AIDA (Attention, Interest, Desire, Action). Ask the user for product type, main benefit, problem it solves, and call-to-action. The AI should return 3 ad variations with powerful hooks, emotional storytelling, social proof inclusion, and concise CTAs. Include headline options, emoji use recommendations, and CTA button suggestions for each version.

Prompt 6:

Write a GPT prompt that outlines a digital sales funnel based on a downloadable lead magnet. Ask for the industry, audience stage (cold/warm), and offer type. GPT should create a landing page copy structure, opt-in headline, email automation sequence, and transition strategy to a paid offer. Include tips for setting up integrations with email platforms (e.g., ConvertKit, Mailchimp) and metrics to track conversions and list growth.

Prompt 7:

Develop a GPT prompt that helps generate retargeting ad copy for abandoned carts. Ask the user to provide product name, typical objections, and offer urgency (e.g., discount, deadline). GPT should return multiple short-form ad copies with punchy headlines, reminders, value reinforcement, and personalized hooks. Include variations for static images and carousel ads, and instructions to segment based on time since abandonment (e.g., 1-day, 3-day, 7-day windows).

Prompt 8:

Build a GPT prompt to generate a social proof-based ad strategy. Ask for user testimonials, product benefits, and platform where the ad will run. GPT should transform testimonial snippets into ad hooks, create formats like "Before and After," user-generated content outlines, and expert quote ads. Include caption structures and design tips for making these ads appear authentic, trustworthy, and engaging—especially for sceptical or cold audiences.

Prompt 9:

Design a GPT prompt that maps out a paid webinar funnel with a \\$0 front-end. Ask for the webinar topic, transformation promise, audience type, and upsell offer. GPT should generate a registration page script, confirmation email, reminder emails, the webinar script structure (problem, proof, solution, CTA), and post-webinar sales page. Include bonus stacking suggestions and scarcity triggers to encourage signups and purchases.

Prompt 10:

Write a GPT prompt to create an influencer collaboration outreach plan. Ask for the niche, product value, and desired influencer tier (nano, micro, macro). GPT should return a cold DM/email message template, a pitch framework highlighting mutual value, suggested incentives (commission, flat rate, gifted), and a collaboration checklist. Include guidelines for tracking results and repurposing influencer content for paid ads.

Prompt 11:

Create a GPT prompt that builds a TikTok marketing strategy for a digital product. Ask for the niche, product price point, and audience demographic. GPT should return 10 video content ideas, including hooks, trending audio suggestions, storytelling frameworks, and soft CTA placements. Include a posting schedule, comment engagement tips, and conversion techniques (e.g., Linktree setups or comment-based DMs).

Prompt 12:

Develop a GPT prompt to help plan a product launch countdown using email and social content. Ask for launch date, product benefits, audience profile, and core hook. GPT should return a 7-day countdown strategy with daily email templates, social post captions, image ideas, urgency triggers, bonus reveals, and final-hour call-to-action messages. Include a feedback loop to analyze launch success.

Prompt 13:

Build a GPT prompt that helps write SEO-optimized YouTube video descriptions. Ask for the video title, keywords, niche, and desired action (subscribe, click link, etc.). GPT should generate a keyword-rich paragraph summary, include relevant hashtags, external/internal link suggestions, and timestamp formatting guidance. Also suggest pinned comment templates and calls to subscribe, share, or join an email list.

Prompt 14:

Write a GPT prompt to audit a brand's current marketing efforts. Ask for website URL, social media links, average engagement metrics, ad budget, and email list size. GPT should analyze funnel bottlenecks, content gaps, lead generation weaknesses, and conversion issues. Return a scorecard across major areas and list 3 immediate optimizations for quick wins along with 3 long-term strategies.

Prompt 15:

Create a GPT prompt that generates 5 high-converting headlines for landing pages. Ask for product category, key transformation, and ideal audience. GPT should return headline styles using urgency, curiosity, listicles, testimonials, and authority formats. Include a subheading recommendation for each and explain which psychological trigger is being used (e.g., fear of missing out, proof, or benefit stacking).

Prompt 16:

Design a GPT prompt that creates a content drip campaign for new subscribers. Ask for product type, list stage (cold, warm), and onboarding goal. GPT should generate a 5-email drip sequence with each email's subject, body outline, tone, and CTA. Include strategies for nurturing leads, handling objections over time, and when to make the first sales offer based on email behavior.

Prompt 17:

Write a GPT prompt to help identify affiliate marketing opportunities within a niche. Ask for niche details, content type (blog, video, etc.), and preferred monetization model. GPT should return relevant affiliate platforms (e.g., Amazon, ShareASale), product ideas, commission rates, and traffic generation methods. Include how to integrate affiliate links organically into content without harming user trust.

Prompt 18:

Create a GPT prompt that generates ideas for native ad campaigns. Ask for platform (Taboola, Outbrain), niche, product type, and offer. GPT should generate ad headlines, teaser copy, thumbnail themes, and landing page alignment strategies. Emphasize how to make native ads feel organic yet compelling and how to split-test creatives while remaining compliant with platform policies.

Prompt 19:

Generate a GPT prompt that builds a LinkedIn content strategy for lead generation. Ask for the industry, service type, audience profile, and frequency. GPT should return weekly content ideas, including authority posts, polls, storytelling, and client transformation posts. Include suggested hashtags, CTA variations, and comment engagement methods to boost visibility and direct traffic to profile links or DMs.

Prompt 20:

Design a GPT prompt that helps map a Google Ads search campaign. Ask for keyword list, landing page URL, target location, and product type. GPT should return ad copy, structured ad groups, negative keyword suggestions, sitelink extension ideas, and a budget strategy. Include tips for improving quality score, conversion tracking setup, and how to pause or scale based on initial results.

Category 3: Side Hustles & Passive Income

Prompt 1:

Create a GPT prompt that helps users generate a list of side hustles based on their available time, skill set, and startup capital. The AI should ask whether the user prefers digital, physical, or service-based work. It should then return 5 scalable ideas, each with tools required, startup cost, expected income potential, and growth timeline. Emphasize passive models like digital products, automation, or affiliate marketing over active freelancing.

Prompt 2:

Write a GPT prompt that helps beginners build a passive income stream through low-content book publishing. GPT should ask for niche interest, comfort with design tools like Canva, and whether they want to target children, professionals, or hobbyists. It should return product ideas like journals, planners, or activity books, along with keyword research methods, Amazon KDP publishing steps, and tips to rank books using organic SEO and ads.

Prompt 3:

Design a GPT prompt that outlines how to start a faceless YouTube channel for passive income. Ask for niche, video creation tools available (AI or human), and monetization preferences (AdSense, affiliate, product). The prompt should return a channel theme, 5 video titles with scripts, tools for voiceover and editing, thumbnail strategies, and an upload schedule to build long-term monetization.

Prompt 4:

Generate a GPT prompt that walks users through building a simple digital product funnel. Ask for the topic, skill level, and preferred format (eBook, checklist, template). GPT should generate an outline for the product, landing page copy, email opt-in sequence, and monetization strategies. Also include where to host the product (Gumroad, Podia), and how to set up affiliate programs for scale.

Prompt 5:

Create a GPT prompt that helps users explore affiliate marketing using just free tools and content platforms. Ask for niche, preferred content type (blog, video, email), and target audience. GPT should suggest affiliate programs, product bundles, content strategy, traffic generation methods, and tools like Linktree, Google Sites, or Medium to promote links. Include automation suggestions for long-term earnings.

Prompt 6:

Write a GPT prompt that generates a side hustle roadmap using ChatGPT as a co-pilot. Ask for user goals (income, skill growth, freedom), weekly time available, and writing/design skill level. GPT should return a hustle idea powered by AI—like prompt selling, AI blog writing, or chatbot building—along with step-by-step implementation, platforms to use, and how to make it recurring or sellable as a package.

Prompt 7:

Design a GPT prompt that builds a local or digital service side hustle that can evolve into passive income. Ask for skill type (writing, consulting, tutoring), and whether the user wants to start locally or online. GPT should suggest initial service offers, pricing, tools, how to automate delivery, and productize the service into a course, ebook, or retainer model once validated.

Prompt 8:

Generate a GPT prompt that walks someone through the print-on-demand business model. Ask for the target audience (niche), preferred platforms (Redbubble, Etsy, Shopify), and design skill. GPT should return product ideas, store naming suggestions, mockup tools, trending topics, and marketing strategies. Include SEO tags, promotion via Pinterest/Instagram, and tips for scaling designs with seasonal demand.

Prompt 9:

Create a GPT prompt to help users turn knowledge into an evergreen digital course. Ask for the topic, skill level of the audience, and delivery preference (text, video, hybrid). GPT should outline a course structure with modules, platforms to host (Teachable, Gumroad), pricing strategy, sales funnel flow, and tips to repurpose content for social media or YouTube marketing.

Prompt 10:

Write a GPT prompt that builds a weekend-only side hustle plan. Ask for the number of hours the user can commit and their preference for solo or team-based work. GPT should return 3 flexible ideas that can be done with minimal stress, like flipping items, doing niche research for clients, or micro-gig platforms. Each idea should include setup steps, income potential, and automation tips for expansion.

Prompt 11:

Design a GPT prompt that helps turn a hobby into a side hustle. Ask the user what they do in their free time, whether they create content around it, and their comfort with selling online. GPT should return monetization models—YouTube, affiliate reviews, templates, or digital journals—and guide them in building an audience-first approach before launching any products or offers.

Prompt 12:

Generate a GPT prompt that creates a step-by-step plan to build a passive income blog. Ask for the niche, preferred blog platform (WordPress, Ghost), and audience type. GPT should return blog layout ideas, affiliate integration strategies, pillar content topics, SEO tips, and monetization structures (ads, info products, sponsored posts). Include post frequency, traffic channels, and growth analytics tracking.

Prompt 13:

Create a GPT prompt that outlines a newsletter-based side hustle that can later be monetized. Ask for the niche, writing tone, and email platform (Beehiiv, Substack). GPT should return content structure, audience engagement hooks, publishing schedule, and monetization strategy including sponsorships, premium tiers, or backend sales. Include lead magnet suggestions to grow email signups from social media.

Prompt 14:

Write a GPT prompt to build a digital template store as a side hustle. Ask for template category (Notion, Excel, Canva), target buyer (students, creators, businesses), and preferred platform (Etsy, Gumroad). GPT should return naming tips, store description, pricing, bundle strategy, promotional tactics, and how to use SEO-rich listings for discoverability. Add advice for scaling via Pinterest and affiliate partners.

Prompt 15:

Design a GPT prompt that maps out a side hustle flipping free items for profit. Ask for location, transportation access, and resell platform preference (OLX, Facebook Marketplace, eBay). GPT should return sourcing strategies, item categories to target, profit margin tips, negotiation scripts, and listings description templates. Include weekend routines to find, flip, and repeat consistently.

Prompt 16:

Generate a GPT prompt that shows how to earn passive income with stock media. Ask the user for skill (photography, video, music, illustrations), preferred tools, and stock platforms (Shutterstock, Adobe Stock, Pond5). GPT should return keyword strategies, popular media niches, upload cadence, tagging advice, and long-tail asset bundling to grow earnings. Add insights into licensing types and exclusivity terms.

Prompt 17:

Create a GPT prompt that designs a side hustle using AI-powered automation. Ask what kind of service or product the user would like to automate. GPT should return 3 ideas using tools like Zapier, ChatGPT, Make, or Airtable—such as content scheduling, CRM automation, or resume builders. Include monetization paths, minimal setup stack, and scalability options for long-term revenue.

Prompt 18:

Write a GPT prompt that builds a content curation-based business. Ask for the niche, platform (newsletter, YouTube Shorts, blog), and target audience. GPT should return a curation strategy including source websites, repackaging method, distribution frequency, and monetization model (ads, products, affiliate). Include growth tactics like niche interviews, reposts, and creating a free tool to drive subscribers.

Prompt 19:

Design a GPT prompt that helps with buying existing digital assets for passive income. Ask for the asset type preference (blog, newsletter, eBook, PLR), budget range, and desired niche. GPT should return marketplaces (Flippa, Acquire, Gumroad), due diligence checklists, and potential growth strategies. Include tips for outsourcing improvements, integrating offers, or flipping them again for higher resale value.

Prompt 20:

Generate a GPT prompt that teaches people how to launch a one-product Shopify store with long-term automation. Ask for product idea, sourcing strategy (dropship, print-on-demand, self-made), and audience. GPT should return store structure, sales page copywriting, ad ideas, fulfillment automation, upsell options, and retargeting funnel steps. Include monthly maintenance checklist for passive upkeep after launch.

Category 4: Solopreneurship & One-Person Businesses

Prompt 1:

Write a GPT prompt that builds a one-person service business based on your core skill (writing, design, coding, consulting, etc.). The AI should ask for your expertise, preferred work style (project-based, retainer, productized), and niche. It should return business name ideas, 3 service package tiers, a simple lead magnet, landing page outline, and outreach templates to start booking clients—even without a website or large audience.

Prompt 2:

Create a GPT prompt that outlines a solopreneur's 90-day action plan for going from idea to income. Ask the user for their niche, time availability, and product or service preference. GPT should return a weekly breakdown: Week 1–3 validation, Week 4–6 audience building, Week 7–10 pre-launch, and final weeks for monetization. Include tools, mindset shifts, and daily tasks for execution as a team of one.

Prompt 3:

Design a GPT prompt to help solopreneurs build a personal brand from scratch. Ask for their topic area, target audience, and tone (inspiring, expert, casual). GPT should create a brand positioning statement, Instagram bio, 3 content pillars, story templates, and a launch content calendar. Include strategies for building social proof without clients, such as mock portfolios, public learning journeys, or before-after results.

Prompt 4:

Write a GPT prompt that helps a solo creator choose between freelancing, productizing, or coaching. Ask about their skill set, audience access, tolerance for upfront work, and income needs. GPT should evaluate each path, present pros and cons, and recommend the best-fit model with monetization tactics, marketing channels, and examples of successful solopreneurs using that approach.

Prompt 5:

Create a GPT prompt that guides a solopreneur through designing a frictionless sales funnel without paid ads. Ask for product/service, audience platform (Twitter, LinkedIn, email), and call-to-action. GPT should generate content angles, lead capture ideas, conversion CTAs, and free-to-use tools (e.g., Gumroad, Beehiiv, Linktree). Add tips on embedding subtle sales prompts into free content without sounding pushy.

Prompt 6:

Develop a GPT prompt that helps solopreneurs turn consulting services into scalable digital products. Ask about consulting niche, client pain points, and common questions. GPT should return a productization strategy including a Notion guide, mini course, or checklist. Provide launch ideas, pricing tiers, upsell offers, and repackaging options. Add ways to turn DMs or emails into FAQ-based products.

Prompt 7:

Design a GPT prompt to outline a one-person content repurposing system. Ask for preferred platform (YouTube, blog, newsletter), content type, and output goal (reach, leads, brand authority). GPT should return a 3-step process to turn one long piece into 5+ micro assets across Instagram, X, LinkedIn, and email. Include tools (e.g., Repurpose.io, ChatGPT, Canva) and batching tips for sustainable consistency.

Prompt 8:

Generate a GPT prompt that creates a one-person agency model. Ask for the service offered (e.g., social media, SEO, video editing), industry focus, and pricing preference. GPT should outline packages, onboarding steps, automation tools (Calendly, Zapier, Notion), and outsourcing plans for scale. Emphasize branding, quality control, and retaining the “solo expert” positioning even while using contractors.

Prompt 9:

Write a GPT prompt that helps solopreneurs build multiple income streams without burning out. Ask for current business model and available hours per week. GPT should suggest a layering approach—starting with one offer, then adding affiliate income, consulting, or digital downloads. Include mental bandwidth tips, tool automation, and income diversification strategies that don't require context-switching every day.

Prompt 10:

Create a GPT prompt to help solopreneurs create client onboarding systems. Ask about service type, client goals, and deliverables. GPT should return a templated onboarding email, welcome packet outline, client questionnaire, and delivery timeline setup. Include tool suggestions (e.g., Notion, Trello, Dubsado) and methods for communicating boundaries, expectations, and payment terms professionally and clearly.

Prompt 11:

Design a GPT prompt that helps introverted solopreneurs find marketing methods that don't require constant visibility. Ask about their niche, comfort with video, and platform preference. GPT should recommend content-first strategies (email, SEO blogs, Twitter threads), slow marketing techniques (relationship building, referrals), and lead gen assets like quizzes or free PDFs that convert silently.

Prompt 12:

Generate a GPT prompt that walks solopreneurs through launching a service-based business with \$0. Ask about their expertise, laptop access, and desired time commitment. GPT should return hustle-friendly platforms (LinkedIn, Facebook groups, Twitter DMs), minimum viable offers, scripts to pitch ethically, and 3 deliverable templates to impress clients without fancy tools or branding.

Prompt 13:

Write a GPT prompt that creates a content calendar for a one-person brand. Ask for niche, tone, and main content goal (growth, engagement, conversions). GPT should generate 4 weekly post types: story, tip, case study, and CTA. Include repurposing flows across multiple platforms and automation tools (e.g., Buffer, Metricool) for staying visible while working solo.

Prompt 14:

Create a GPT prompt to help solopreneurs set up a business backend. Ask for product or service type, country of operation, and income method. GPT should return basic setup steps including invoicing (Wave, PayPal), contracts, legal structures (LLC, Sole Prop), client tracking spreadsheets, and basic tax guidance (not legal advice). Include automation hacks to keep backend light and efficient.

Prompt 15:

Design a GPT prompt to build a free community for a solopreneur brand. Ask for niche, engagement goal (support, conversion, feedback), and platform (Discord, Facebook, Telegram). GPT should outline onboarding flows, engagement events, content themes, and community values. Include soft-sell moments, automation for approvals, and moderation strategies to manage the space alone.

Prompt 16:

Generate a GPT prompt that helps one-person businesses validate their offer before building. Ask about the idea, target audience, and traffic source. GPT should return 3 pre-sell validation methods (e.g., waitlist, soft pitch posts, limited beta),

feedback questions to ask early users, and minimum landing page copy to start. Include tips to pivot based on feedback and avoid sunk costs.

Prompt 17:

Write a GPT prompt that helps solopreneurs set personal and business boundaries. Ask about common stress triggers and work hours. GPT should return templates for setting client expectations, social media detox rules, and time-blocking methods. Include advice on burnout prevention, email signature scripts, and how to say “no” professionally while preserving relationships.

Prompt 18:

Create a GPT prompt that shows solopreneurs how to automate their lead capture. Ask for platform, CTA type (freebie, quiz, case study), and delivery method. GPT should return a flowchart: landing page → form → automation → nurture email. Include no-code tools like ConvertKit, Zapier, Airtable. Add copywriting examples for each stage to keep leads warm and progressing.

Prompt 19:

Design a GPT prompt to help solopreneurs get testimonials and case studies. Ask for service type and client relationship strength. GPT should generate a feedback request script, interview-style case study format, permission email, and post format to display proof. Include platforms to collect reviews (Google, LinkedIn, Trustpilot) and how to repurpose quotes across marketing content.

Prompt 20:

Generate a GPT prompt that helps solopreneurs manage growth without losing creative control. Ask about business type, current stress points, and desired growth model. GPT should suggest delegation options, tools to systematize content and delivery, and low-friction ways to hire support (intern, VA, part-time contractor). Include mindset reminders for staying aligned to purpose while scaling impact.

Category 5: AI Automation & Tools

Prompt 1:

Design a GPT prompt that helps automate content repurposing across multiple platforms. Ask for the original content type (blog, video, podcast), target platforms (Instagram, LinkedIn, TikTok), and desired tone. GPT should return 5 content formats like quote cards, reels, carousel posts, or threads. Include automation tools like Zapier, Buffer, or Repurpose.io, and show how to build a system that works on a weekly schedule with minimal input.

Prompt 2:

Write a GPT prompt that outlines an AI-powered cold outreach workflow. Ask for the industry, offer type, and platform preference (email, LinkedIn, DM). GPT should generate a cold outreach message using personalization tokens, follow-up sequences, and automation integrations using tools like Instantly.ai, Clay, or Lemlist. Include tracking setup, testing variables (subject lines, CTAs), and response categorization for manual follow-up or CRM integration.

Prompt 3:

Create a GPT prompt that helps users build a lead qualification chatbot using ChatGPT API. Ask for business type, lead type (B2B/B2C), and qualifying questions. GPT should return conversation flow structure, scoring logic, recommended tools (Tars, Landbot, Zapier integration), and next steps (email follow-up, CRM push). Include ideas to test different bot personalities and CTA positioning.

Prompt 4:

Develop a GPT prompt that automates idea generation for weekly newsletters. Ask for the niche, tone (educational, casual, data-driven), and send frequency. GPT should return a workflow to collect and rank topic ideas using Notion or Airtable, integrate with ChatGPT for content drafts, and format with ConvertKit or Beehiiv. Include visuals automation using Canva templates and a checklist for scheduled publishing.

Prompt 5:

Write a GPT prompt that builds a low-code AI content scheduling system. Ask for preferred content formats (text, video, graphics), platforms, and posting cadence. GPT should recommend scheduling tools (Metricool, Buffer), AI writing support (ChatGPT, Jasper), design automation (Canva, Magic Studio), and a calendar format. Include workflow suggestions to pre-approve drafts and track performance using free tools.

Prompt 6:

Create a GPT prompt to automate client reporting in a digital agency. Ask for client niche, KPIs tracked, and platforms used (Google Ads, Meta, GA4). GPT should generate a monthly template report, automation steps with Google Data Studio or Dashthis, and integration flow using Zapier. Add ideas to convert the report into insights or strategy suggestions that clients find valuable.

Prompt 7:

Generate a GPT prompt that outlines an AI-enhanced e-commerce review generator. Ask for product features, tone, and customer persona. GPT should return a workflow where AI writes custom reviews for product pages based on feedback data, then posts them automatically with moderation via Make.com or Shopify Flow. Include instructions to A/B test different reviews for conversion impact.

Prompt 8:

Design a GPT prompt that builds an automation for summarizing long YouTube videos into blog posts. Ask for YouTube link, blog length, and tone preference. GPT should return a workflow using tools like Vidyo.ai or Descript to transcribe, ChatGPT to summarize and rewrite, and WordPress/Notion API to publish. Include automation setup, title variation prompts, and SEO optimization suggestions.

Prompt 9:

Create a GPT prompt that maps out a virtual AI assistant for small business tasks. Ask for business type, daily task types, and preferred tools. GPT should recommend a workflow of Zapier + ChatGPT + calendar/CRM integrations to automate tasks like appointment booking, email sorting, invoice generation, and follow-ups. Include voice assistant integration options for mobile use.

Prompt 10:

Write a GPT prompt to help build an AI-based pricing assistant for digital products. Ask for product types, customer personas, and conversion goals. GPT should return pricing strategies using charm pricing, tiering, and urgency. Integrate with tools like Stripe, LemonSqueezy, or Gumroad for real-time testing and A/B comparisons. Include automation of price changes based on user engagement signals.

Prompt 11:

Develop a GPT prompt that generates SOPs (Standard Operating Procedures) from a recorded Zoom call. Ask for call transcript, business process, and audience (team or client). GPT should return a structured SOP with headings, action steps, timelines, and tool links. Include workflow using Otter.ai or Zoom transcript → ChatGPT → Notion doc creation. Add optional Loom video summarization step.

Prompt 12:

Design a GPT prompt that helps automate webinar follow-up sequences. Ask for the webinar topic, offer CTA, and audience segments (attended, didn't attend, clicked CTA). GPT should return 3 segmented email flows, follow-up SMS or DMs, and a re-engagement CTA. Include scheduling automation using tools like ConvertKit + Zapier and how to personalize each stream using logic rules.

Prompt 13:

Write a GPT prompt that automates idea validation using Reddit and Quora. Ask for niche and product type. GPT should return keyword search queries, scraping options (via tools like Browse.ai), and prompt structures to summarize public feedback. Include a validation scorecard and ways to collect insights over time into Airtable or Google Sheets for decision-making.

Prompt 14:

Generate a GPT prompt that creates automated podcast summaries and email recaps. Ask for audio file link, tone, and email length. GPT should generate episode summary, 3 quotable takeaways, CTA to replay, and one teaser for the next episode. Include setup with Castmagic, ChatGPT, and Beehiiv/ConvertKit email builders for end-to-end weekly automation.

Prompt 15:

Design a GPT prompt that creates customer service automation using AI chatbots. Ask for business type, customer FAQs, and tone. GPT should return canned responses, fallback flows, escalation triggers, and bot personality profiles. Include integration options with Intercom, Crisp, or Drift and guidance on connecting with GPT API or fine-tuned models.

Prompt 16:

Write a GPT prompt that builds an AI-powered social listening system. Ask for niche, platforms (Twitter, Reddit, LinkedIn), and keywords. GPT should return a process using tools like Brand24 or Zapier + RSS feeds, then feed collected content into GPT to summarize sentiment, detect patterns, or flag competitor launches. Include dashboard creation and response automation.

Prompt 17:

Create a GPT prompt that builds an AI-powered resume and job-matching assistant. Ask for the user's skills, job title, and preferred companies. GPT should return a customizable resume and use AI scraping tools to match with listings. Include integration ideas with LinkedIn, Notion job boards, or email automation tools to apply and track responses at scale.

Prompt 18:

Develop a GPT prompt that automates the republishing of high-performing content. Ask for analytics data (top blogs, tweets, or reels), audience type, and republishing platforms. GPT should return rewritten versions in new formats and set up automations via Make, Notion, and Buffer. Include ideas to add seasonal relevance or trending keywords for each republish cycle.

Prompt 19:

Write a GPT prompt to automate invoice creation based on completed tasks. Ask for task list, client name, and preferred tool (Google Docs, Notion, Excel). GPT should return a formatted invoice layout and include Zapier integration ideas to convert tasks into billable items and automatically email PDF invoices using Gmail or Docupilot.

Prompt 20:

Create a GPT prompt that helps users build a fully AI-powered solopreneur stack. Ask for business type, daily activities, and budget. GPT should return a list of free or affordable tools for writing, design, scheduling, analytics, and customer interaction. Include plug-and-play stack options (e.g., ChatGPT + Canva + Notion + Zapier) and templates to integrate them smoothly.

Category 6: Freelancing & Gig Economy

Prompt 1:

Create a GPT prompt that helps beginners identify the best freelancing services to offer based on their current skills, interests, and available time. The AI should ask for any existing experience, software proficiency, and preferred communication style (text, voice, async). It should then return three high-demand freelancing niches, platforms to get started (Upwork, Fiverr, Contra), pricing ideas, and strategies for building authority without a large portfolio.

Prompt 2:

Write a GPT prompt that generates a client proposal template for freelancers. Ask for the service offered, project type, and target client industry. GPT should return a customizable proposal structure including introduction, problem-solution framing, deliverables list, timeline, and pricing breakdown. It should also suggest a closing section that includes testimonials, a call-to-action, and availability for a quick discovery call.

Prompt 3:

Design a GPT prompt to write high-converting Fiverr gig descriptions. Ask for the gig title, target keywords, and what makes the service unique. GPT should return a headline, gig overview, bullet-pointed features, FAQs, and tags. It should also suggest how to structure basic, standard, and premium packages to maximize upsells without overwhelming potential buyers.

Prompt 4:

Create a GPT prompt that walks freelancers through the process of landing their first client. Ask about skill, platform preference, niche interest, and time availability. GPT should return a checklist: creating a profile, portfolio ideas even with no client history, offer positioning strategy, and a template message for cold pitching. Include tips for staying motivated and avoiding early-stage burnout.

Prompt 5:

Write a GPT prompt to help freelancers build a personal brand that attracts premium clients. Ask for niche, ideal client profile, and platform focus (LinkedIn, Twitter, Instagram). GPT should return a bio, content pillars, sample post ideas, and profile optimization tips. It should also include ways to embed social proof using client feedback, behind-the-scenes posts, or mini case studies.

Prompt 6:

Develop a GPT prompt that helps freelancers transition from gig workers to long-term retainers. Ask for current services, recurring needs of target clients, and niche. GPT should return a retainer package outline, communication plan, client education template, and pricing model. Also include tips for gradually replacing one-time gigs with monthly income and preventing scope creep.

Prompt 7:

Generate a GPT prompt to help freelancers overcome the “feast or famine” cycle. Ask for niche, client type, and average deal size. GPT should return ideas for building a referral engine, content plan to generate inbound leads, and strategies for batch pitching during slow weeks. Also include financial tips for budgeting between high and low-income months.

Prompt 8:

Create a GPT prompt to help freelancers write better cold outreach messages. Ask for the service, client type, and platform (email, LinkedIn, Upwork). GPT should return a personalized message structure: subject line, value proposition, proof or past results, and a soft CTA. Include ideas to test openers and follow-up sequences that feel non-pushy but consistent.

Prompt 9:

Write a GPT prompt to create a productivity system for full-time freelancers. Ask for work hours, project types, and tools used. GPT should return a weekly planner structure, project management stack (Notion, Trello), time-blocking tips, and ideas for reducing decision fatigue. Include methods to track income, deadlines, and deliverable quality without burning out.

Prompt 10:

Design a GPT prompt that helps freelancers optimize their Upwork profile. Ask for category, core service, and ideal client type. GPT should return an optimized bio summary, job title, skill tags, and work samples structure. Include headline variations and portfolio hacks even without real clients by using spec projects or volunteering.

Prompt 11:

Create a GPT prompt to help freelancers build credibility fast. Ask for experience level, service offered, and audience platform. GPT should suggest methods like writing Twitter threads, building a case study carousel on Instagram, or publishing niche insights on LinkedIn. Include ideas to showcase work-in-progress projects, testimonials, and client education content to establish authority.

Prompt 12:

Write a GPT prompt to help freelancers determine their pricing confidently. Ask for service type, time investment, and competition landscape. GPT should calculate hourly vs value-based pricing, show tiered package ideas, and include ways to raise prices over time. Include mindset coaching to handle negotiation, pricing objections, and imposter syndrome.

Prompt 13:

Generate a GPT prompt that creates a client onboarding system. Ask for service type, platforms used, and typical client project length. GPT should return a welcome email template, discovery questionnaire, timeline outline, and deliverables tracker. Include ideas to make the onboarding experience smooth and professional, even if managed entirely by one person.

Prompt 14:

Design a GPT prompt that automates freelance portfolio creation. Ask for niche, platforms (Webflow, Notion, Canva), and number of projects. GPT should return section layouts (about, work, testimonials), CTAs, and example write-ups for each project. Include tips for using visuals and storytelling to communicate value rather than just deliverables.

Prompt 15:

Create a GPT prompt that helps freelancers expand from local to international clients. Ask for service type, current client geography, and timezone preference. GPT should return strategies for adjusting pricing, cross-border payments (Payoneer, Wise), pitch templates for global brands, and portfolio tweaks to appeal to international standards.

Prompt 16:

Write a GPT prompt that guides freelancers in niche specialization. Ask for current services, industries worked in, and passion areas. GPT should help identify a profitable niche, suggest positioning tweaks, industry pain points, and how to become a go-to expert by publishing content, pricing strategically, and creating targeted case studies.

Prompt 17:

Develop a GPT prompt that teaches freelancers how to say “no” professionally. Ask for service type, common scope creep issues, and tone preference. GPT should return boundary-setting scripts, FAQ responses for misaligned clients, and polite but firm rejection templates. Include energy management advice to avoid burnout and decision fatigue.

Prompt 18:

Generate a GPT prompt that builds a referral system for freelancers. Ask for client base size, project type, and ideal lead. GPT should return an incentive-based or value-first referral model, message templates, and follow-up system using email or Airtable. Include ways to ask for testimonials that double as social proof assets.

Prompt 19:

Create a GPT prompt to help freelancers run a one-time launch of a digital product (e.g., template, ebook, checklist) to diversify income. Ask for niche, audience size, and product idea. GPT should generate a sales page, launch timeline, email sequence, and promotional content plan. Include how to gather testimonials or data for future passive launches.

Prompt 20:

Write a GPT prompt that walks freelancers through the process of building a waitlist when fully booked. Ask for niche, service name, and platform. GPT should return a landing page structure, waitlist email sequence, positioning tactics to create urgency, and tips for keeping leads warm with free content or updates until the next booking cycle opens.

Category 7: Content Creation & Monetization

Prompt 1:

Create a GPT prompt that helps users plan and monetize a content strategy around a specific niche. Ask for the topic, target audience, and content format preference (blog, video, social media). GPT should return a full weekly content calendar, platform suggestions, engagement hooks, and monetization routes like affiliate links, digital products, or sponsorships. Also include tools to automate posting and repurposing across channels.

Prompt 2:

Write a GPT prompt to help creators turn long-form YouTube content into short-form monetizable clips. Ask for the niche, video length, and tone. GPT should return a breakdown of timestamps, script highlights, hook crafting tips, and recommended posting formats for Instagram Reels, TikTok, and YouTube Shorts. Include monetization options via YouTube Shorts Fund or linking to a digital product.

Prompt 3:

Design a GPT prompt that helps bloggers monetize their traffic using diversified strategies. Ask for blog niche, audience region, and monthly visitors. GPT should return a layered plan including affiliate links, programmatic ads, digital product offers, and newsletter sponsorships. Also suggest SEO tools for scaling content creation and tracking keyword rankings for future passive income growth.

Prompt 4:

Create a GPT prompt to guide creators in launching a paid newsletter. Ask for niche, target subscriber profile, and content frequency. GPT should generate a newsletter format, name ideas, free-to-paid transition strategy, and monetization model (subscriptions, sponsorships, backend services). Include email platform recommendations and tips for growing organically through social content and referral systems.

Prompt 5:

Write a GPT prompt that helps creators bundle and sell their best content. Ask for content formats (tweets, threads, templates, videos), niche, and audience type. GPT should generate a bundling strategy, pricing ideas, product title suggestions, and a landing page copy draft. Include ideas for upsells, lead magnets, and repackaging into micro-products like swipe files or mini courses.

Prompt 6:

Develop a GPT prompt that helps creators pitch to brands for sponsorship deals. Ask for platform, niche, and follower count. GPT should return an email pitch template, a sponsorship media kit outline, package ideas, and pricing benchmarks. Include tips to approach brands with aligned values and how to negotiate exclusivity or recurring deals for consistent income.

Prompt 7:

Generate a GPT prompt that outlines a scalable content creation system using AI tools. Ask for content type (video, blog, carousel), preferred posting platform, and content pillars. GPT should return a workflow using ChatGPT, Canva, Notion, and Buffer to brainstorm, draft, design, and schedule posts. Include batching techniques and a weekly review template to stay consistent.

Prompt 8:

Create a GPT prompt that helps creators monetize Twitter/X content. Ask for content focus, follower count, and engagement style. GPT should generate monetization strategies including Gumroad products, coaching offers, DM funnels, and brand sponsorships. Include a thread-to-offer map showing how to build momentum and turn attention into revenue without burning out.

Prompt 9:

Write a GPT prompt to help content creators build and monetize a free Notion resource hub. Ask for niche, audience pain points, and content type. GPT should return a layout for a Notion site offering free templates, embedded affiliate links, and a pay-what-you-want product. Include a growth strategy using email capture and Pinterest or TikTok traffic.

Prompt 10:

Design a GPT prompt to repurpose existing blog content into monetizable assets. Ask for blog niche, platform, and post length. GPT should return ways to turn each post into an email series, video script, tweet thread, and product checklist. Include suggestions to insert monetization such as course links, digital files, or tip jar integrations.

Prompt 11:

Create a GPT prompt that maps out a plan for launching a content-based membership site. Ask for the niche, content type, and pricing preference. GPT should return a content delivery schedule, platform suggestions (Patreon, Circle, Ghost), onboarding sequence, and member-only engagement plan. Include strategies for converting free followers into paying members through exclusivity and community.

Prompt 12:

Write a GPT prompt that helps creators organize a 30-day content monetization challenge. Ask for content type, audience platform, and target income. GPT should return a daily schedule including educational content, product promotion, soft selling strategies, and engagement ideas. Include daily CTA prompts and tips to track conversions without ads.

Prompt 13:

Develop a GPT prompt to help creators with faceless content build income. Ask for comfort level with anonymity, niche, and platform. GPT should return content creation strategies using AI voice tools, stock footage, B-roll, and SEO blogs. Include monetization via YouTube, affiliate links, email capture, and digital downloads that require no personal branding.

Prompt 14:

Generate a GPT prompt that helps creators price their content products. Ask for product type (ebook, templates, videos), audience income level, and perceived value. GPT should return pricing tiers, discounts strategy, value stacking ideas, and upgrade pathways. Include insights on pricing psychology and scarcity use without sounding overly salesy.

Prompt 15:

Create a GPT prompt to design an evergreen content funnel for passive monetization. Ask for product type, main traffic platform, and audience behavior. GPT should return a 4-step funnel: attract (content), capture (lead magnet), convert (sales page), and retain (email upsell). Include free tool stack options and automation strategies.

Prompt 16:

Write a GPT prompt to help creators use SEO to monetize their content. Ask for niche, audience location, and goal (traffic, affiliate, course). GPT should return keyword research methods, on-page SEO tips, and monetization pathways for each type of searcher. Include content formats (blog, video, FAQ) to rank and drive conversions.

Prompt 17:

Design a GPT prompt to grow a content creator's audience and income using collaborations. Ask for niche, platforms used, and follower count. GPT should return a collab strategy involving podcast swaps, shoutouts, guest content, or live sessions. Include monetization split ideas, affiliate promos, and joint lead magnet tips for long-term value.

Prompt 18:

Generate a GPT prompt that helps creators launch a digital storefront. Ask for product types (templates, guides, kits), platform preference (Gumroad, Lemon Squeezy), and design style. GPT should return a storefront structure, product descriptions, pricing psychology tips, and cross-selling ideas. Include launch content templates and scarcity tactics for urgency.

Prompt 19:

Write a GPT prompt that helps creators build a long-form monetized content engine. Ask for platform (YouTube, Substack, Blog), content frequency, and monetization goal. GPT should return a weekly publishing system, offer placement strategy, CTA rotation calendar, and tools for batch production. Include tips on increasing retention, time-on-page, or watch time.

Prompt 20:

Create a GPT prompt to help creators automate affiliate link management. Ask for niche, tools used, and preferred content type. GPT should return a system for storing, tagging, rotating, and analyzing links using tools like Afflytics, Pretty Links, or Notion databases. Include tips on disclosure, compliance, and conversion rate tracking.

Category 8: Coaching, Courses & Digital Products

Prompt 1:

Write a GPT prompt that helps coaches outline a signature framework for their offer. Ask for the transformation they help clients achieve, the steps usually taken, and their preferred delivery method (1:1, group, course). GPT should return a 3–5 pillar framework, naming suggestions for each step, and how to position it as a repeatable process that differentiates them from competitors.

Prompt 2:

Create a GPT prompt that guides course creators in validating their online course idea before building. Ask for topic, target audience, and platform (Gumroad, Teachable, Thinkific). GPT should return validation strategies like preselling, waitlists, surveys, and minimum viable content modules to test interest. Include email list growth tips and urgency-building messages for launch.

Prompt 3:

Design a GPT prompt that helps digital product creators write compelling sales pages. Ask for product type, audience pain point, and solution offered. GPT should return a structured sales page outline with a hook, transformation statement, product breakdown, benefits vs. features, testimonials, pricing tiers, and CTA. Include psychological triggers like urgency, social proof, and story-based selling.

Prompt 4:

Write a GPT prompt to help coaches structure a high-ticket 12-week program. Ask for niche, promise of transformation, and target client profile. GPT should return a weekly curriculum breakdown, coaching call format, onboarding workflow, client portal structure (e.g., Notion, Circle), and methods for creating accountability. Include support models like Voxer, worksheets, or Q\&A threads.

Prompt 5:

Create a GPT prompt to help course creators design engaging course content. Ask for the topic, preferred teaching style (visual, hands-on, storytelling), and lesson duration. GPT should return a lesson template, engagement triggers like quizzes or reflection prompts, visual aid suggestions, and video scripting outlines to maintain attention. Include accessibility tips and tech setup advice.

Prompt 6:

Develop a GPT prompt that helps digital product sellers bundle products for higher perceived value. Ask for existing products, customer pain points, and sales goals. GPT should return smart bundle groupings, naming ideas, pricing strategy (anchor vs. decoy), and launch plan. Include tools like Gumroad or Lemon Squeezy to set up bundles with upsells or down-sells.

Prompt 7:

Generate a GPT prompt that guides coaches in onboarding new clients smoothly. Ask for the service offered, duration of engagement, and client profile. GPT should return a welcome email, intake questionnaire, payment confirmation script, call scheduling setup, and a digital success roadmap. Include tools like Calendly, Notion, and Stripe to automate the process.

Prompt 8:

Write a GPT prompt to help course creators script a 5-part email launch sequence. Ask for product type, audience pain point, and price point. GPT should generate a sequence: Day 1 – Pain Story, Day 2 – Free Value, Day 3 – Product Reveal, Day 4 – Objection Busting, Day 5 – Last Call. Include CTAs and subject line ideas.

Prompt 9:

Create a GPT prompt to help digital product creators turn blog posts into paid micro-products. Ask for blog URL or topic, target audience, and format preference (PDF, swipe file, video). GPT should return a content outline, product title, visual asset suggestions, sales copy, and hosting options. Include a plan to promote via email and socials.

Prompt 10:

Design a GPT prompt to help creators choose the best platform for their digital product. Ask for product type (template, ebook, course), tech skills, and desired payment methods. GPT should return a comparison between platforms like Gumroad, Teachable, ThriveCart, and Podia based on customization, analytics, checkout experience, and integrations.

Prompt 11:

Write a GPT prompt to help coaches craft a transformational story for their brand. Ask for the personal journey, key turning point, and core belief. GPT should generate a founder story that builds emotional connection, includes struggle-victory arcs, and ties into the coaching offer. Include story formats for About Page, Instagram caption, and webinar script.

Prompt 12:

Create a GPT prompt that guides course creators in designing a student success path. Ask for topic, student baseline level, and intended transformation. GPT should return a 3-stage learner journey (Beginner, Active, Mastery), key outcomes, success metrics, and gamification ideas like badges, community shout-outs, or progress trackers.

Prompt 13:

Design a GPT prompt to help digital coaches create a pricing model that supports scale. Ask for audience income level, delivery format (1:1, group, course), and desired monthly revenue. GPT should return pricing tiers (low-ticket, mid-tier, high-ticket), offer stack suggestions, and upsell flows. Include value-based pricing tips and when to raise prices.

Prompt 14:

Generate a GPT prompt that walks course creators through beta launching. Ask for topic, audience size, and launch deadline. GPT should return a stripped-down MVP plan, soft launch messaging, application form copy, discount structure, and feedback collection method. Include how to use testimonials from beta users to improve and relaunch.

Prompt 15:

Write a GPT prompt that helps creators build an evergreen sales system for digital products. Ask for product type, funnel stage (awareness, conversion), and traffic source. GPT should return an opt-in lead magnet, email automation flow, sales page structure, and retargeting strategy. Include tools like ConvertKit, ThriveCart, and analytics tracking setup.

Prompt 16:

Create a GPT prompt that helps creators turn a coaching offer into a scalable digital product. Ask for offer components, client goals, and format preference (course, template, workbook). GPT should return a product outline, lesson breakdown, DIY vs Done-For-You structure, and launch roadmap. Include mindset tips for shifting from done-for-you to passive income.

Prompt 17:

Design a GPT prompt that helps digital product creators use affiliate marketing to boost sales. Ask for product type, audience size, and brand values. GPT should generate an affiliate program setup guide, email outreach template for partners, commission structure, and dashboard setup tips. Include motivation strategies for affiliates to actively promote.

Prompt 18:*

Write a GPT prompt to help creators launch a workshop that leads into a digital product sale. Ask for topic, audience pain point, and platform (Zoom, Crowdcast, Loom). GPT should return a 3-part structure: teach, engage, pitch. Include landing page copy, email invites, slide deck outline, and sales pitch scripting tips.

Prompt 19:

Create a GPT prompt to help digital product creators generate testimonials and social proof. Ask for product type, customer profile, and feedback stage. GPT should return a testimonial request script, video testimonial guide, email follow-up template, and repurposing strategy across web pages, reels, and emails.

Prompt 20:

Design a GPT prompt that helps creators use AI to brainstorm new digital product ideas. Ask for niche, audience pain point, and existing content. GPT should return 5 product ideas (PDF, template, toolkit, swipe file, micro-course), with titles, use cases, and marketing angles. Include a validation method and platform to launch on within 3 days.

Category 9: AI Tools & Prompts Business

Prompt 1:

Write a GPT prompt that helps creators build and sell prompt packs online. Ask for the target industry (e.g., marketing, HR, real estate), user level (beginner/advanced), and goal (e.g., save time, improve output). GPT should return a prompt bundle layout, naming ideas, pricing tiers, example outputs, and a Gumroad or Lemon Squeezy setup strategy. Include visual examples and upsell paths for niche-specific bundles or add-on templates.

Prompt 2:

Create a GPT prompt to help entrepreneurs build an AI prompt marketplace. Ask for niche, audience type, and technical skill level. GPT should return a marketplace layout, product categories, revenue model (pay-per-prompt, subscription), onboarding flow for creators, and branding strategy. Include monetization tactics such as affiliate partnerships, SEO content, and automated onboarding using Zapier or Airtable.

Prompt 3:

Design a GPT prompt that helps users create niche-specific AI prompt toolkits. Ask for industry, end user (agency, freelancer, student), and common daily tasks. GPT should return 10 ready-to-use prompts, packaging format (PDF, Notion, Google Doc), and a branding name. Include cross-sell strategies, launch copy ideas, and bundling options for maximum revenue from small products.

Prompt 4:

Write a GPT prompt that helps users automate prompt delivery after purchase. Ask for platform (Gumroad, Payhip, Etsy), format (PDF, Notion, App), and preferred email service. GPT should return automation steps using Zapier or Make.com to deliver digital products instantly, set up email confirmation, and cross-promote other bundles. Include fail-safes in case of delivery error or bounce.

Prompt 5:

Create a GPT prompt to generate prompt subscription models. Ask for niche, prompt frequency (daily/weekly), delivery format (email, app), and user intent (inspiration, productivity, monetization). GPT should return pricing tiers, retention tips, churn reduction ideas, and packaging formats for each level. Include strategies for bonus unlocks and seasonal themes to keep users engaged.

Prompt 6:

Develop a GPT prompt to help creators build a brand around their AI prompt business. Ask for niche focus, brand values, and audience demographic. GPT should return brand name ideas, color palette, voice/tone guide, and content plan for Instagram, X, or LinkedIn. Include email newsletter structure and idea generation workflow using ChatGPT or Midjourney.

Prompt 7:

Generate a GPT prompt to assist in writing SEO blog posts to sell prompt products. Ask for niche, target keyword, and product title. GPT should return an outline, suggested subheadings, CTA insertions, and metadata setup. Include a content-to-product funnel showing how to build traffic via blogs, then redirect to prompt product landing pages.

Prompt 8:

Write a GPT prompt that turns expert knowledge into a prompt pack. Ask for the expert's industry, type of audience served, and tasks solved. GPT should return 10 high-value prompts designed for their audience, tips to write effective instructions, and suggestions for repurposing prompts into social content, lead magnets, or client onboarding resources.

Prompt 9:

Design a GPT prompt to build an affiliate program for a prompt-based product. Ask for platform used, product price, and niche. GPT should return affiliate email scripts, signup flow, commission ideas, and ways to track performance using Rewardful, FirstPromoter, or a Notion dashboard. Include tips for incentivizing high-performers and providing content assets.

Prompt 10:

Create a GPT prompt that generates a Notion prompt library for creators. Ask for industry, user role (coach, marketer, founder), and daily activities. GPT should return 20 categorized prompts, a Notion template structure, icon suggestions, and guidance on how to sell or give away this library to grow email subscribers or generate sales.

Prompt 11:

Write a GPT prompt to help users convert prompts into mobile apps. Ask for category, use case (daily use, journaling, productivity), and delivery format. GPT should return low-code/no-code solutions like Glide, Softr, or Bravo Studio, app structure (input-output), and monetization options such as in-app purchases, freemium tiers, or lead capture.

Prompt 12:

Create a GPT prompt to craft landing page copy for a prompt product. Ask for niche, use case, audience type, and product format. GPT should return a landing page structure: hero section, pain points, transformation, CTA, sample outputs, FAQ, testimonials. Include scroll psychology tips and tips to boost urgency or trust.

Prompt 13:

Design a GPT prompt that outlines a social media strategy for prompt sellers. Ask for platform (Instagram, Twitter/X, LinkedIn), tone, and offer type. GPT should return post formats (before/after, carousels, tips), engagement hooks, weekly post calendar, and CTA structure. Include visual prompt output previews, relatable pain points, and storytelling from the user's perspective.

Prompt 14:

Generate a GPT prompt to create a prompt-selling challenge or campaign. Ask for goal (grow email list, increase sales), timeframe (3–5 days), and niche. GPT should return a challenge theme, day-wise breakdown, engagement prompts, and automation strategy using email sequences. Include upsell points and limited-time bonuses to increase urgency and conversions.

Prompt 15:

Write a GPT prompt that converts prompt-based tweets or posts into a digital product. Ask for content type (threads, carousels), niche, and audience engagement. GPT should return a structure to turn past social content into a bundled swipe file, mini-course, or PDF, and set up checkout using Gumroad or Lemon Squeezy with thank-you upsell strategy.

Prompt 16:

Create a GPT prompt that helps users price their prompt products. Ask for niche, output value (saves time, earns money), and audience type. GPT should return tiered pricing models, price testing techniques, and value ladders. Include competitor analysis ideas and psychological pricing options like \\$9 vs \\$10 or bundles with bonuses.

Prompt 17:

Write a GPT prompt to help prompt creators start a free community to grow their audience. Ask for platform preference (Discord, Circle, Telegram), user intent, and niche. GPT should return a community structure, welcome flow, content calendar, and monetization strategy through free-to-paid upgrades. Include automation for onboarding and feedback collection.

Prompt 18:

Design a GPT prompt that helps prompt entrepreneurs generate micro-content using their product. Ask for prompt category, audience type, and platform. GPT should return 10 repurposing ideas: tweets, reels, visuals, testimonials, transformations, and product showcases. Include batching techniques, Canva template suggestions, and engagement CTAs.

Prompt 19:

Generate a GPT prompt that outlines how to test and validate prompt ideas before launching. Ask for niche, audience type, and content delivery format. GPT should return testing workflows like polls, waitlists, teaser content, and landing page A/B testing. Include decision points to kill or scale based on engagement signals and sales conversion rate.

Prompt 20:

Write a GPT prompt that guides creators to turn their prompt packs into lead magnets. Ask for niche, pain point solved, and audience journey stage. GPT should return opt-in format ideas (free sample, challenge, use-case templates), delivery methods, follow-up email sequence, and tripwire upsell strategy. Include tips to create urgency and increase list quality.

Category 10: Motivation & Mindset

Prompt 1:

Write a GPT prompt that generates a personalized morning motivation script. Ask for the user's main goal (health, career, mindset), preferred tone (gentle, energetic, tough love), and daily struggles. GPT should return a 3-minute motivational monologue including affirmations, mindset reframing, and a call to action to start the day strong. Encourage consistency and self-trust in overcoming resistance or self-doubt.

Prompt 2:

Create a GPT prompt to help users overcome procrastination. Ask for the task avoided, emotional resistance (fear, overwhelm, boredom), and current environment. GPT should return a personalized motivation plan with mindset reframes, small wins structure, motivational language, and a 10-minute starter activity to build momentum. Include mindset shifts like "action creates clarity" and dopamine reward cues.

Prompt 3:

Design a GPT prompt that helps users reframe failure into growth. Ask for the recent setback, the user's emotional state, and long-term goal. GPT should return a growth-oriented reflection including what was learned, hidden wins, reframing questions, and quotes to guide perspective. Offer journaling prompts to integrate the lesson and build resilience.

Prompt 4:

Write a GPT prompt to create a motivational self-talk script for tough days. Ask for the struggle (burnout, doubt, imposter syndrome), what they're avoiding, and what they need to hear. GPT should return a compassionate yet energizing message with actionable advice, supportive self-beliefs, and mental reset cues to stay grounded without toxic positivity.

Prompt 5:

Create a GPT prompt that motivates users to stay consistent with habits. Ask for the habit, reason for starting, and current pain points. GPT should return a motivational breakdown of future self vision, reminders of progress, habit stacking strategies, and micro-rewards. Include tips to shift identity ("I'm someone who...") rather than rely only on willpower.

Prompt 6:

Generate a GPT prompt that delivers daily mindset affirmations tailored to the user's goals. Ask for goal type (personal, fitness, business), current mindset (self-doubt, fear, distraction), and desired outcome. GPT should return a set of 5 affirmations written in present tense, grounded in self-efficacy and growth, with optional visualization steps.

Prompt 7:

Develop a GPT prompt to help creators build an abundance mindset. Ask for limiting belief (money, success, worth), origin story, and future vision. GPT should return a mindset reframe, journaling prompts, reframed beliefs, and action-based affirmations. Include examples of success without burnout and mental models like "value flows where focus goes."

Prompt 8:

Write a GPT prompt to create a motivational thread or post. Ask for theme (discipline, courage, resilience), audience type, and tone (storytelling, direct, poetic). GPT should return a 5–7 line carousel or tweet thread draft that hooks, builds momentum, and ends with a motivational mic drop. Include hashtags or captions to boost engagement.

Prompt 9:

Create a GPT prompt that generates a confidence reset routine. Ask for user's fear trigger (rejection, failure, visibility), upcoming challenge, and coping habits. GPT should return a 3-step self-confidence routine including body movement, mental priming, and memory of past wins. Reinforce identity, courage, and evidence that they're more capable than they feel.

Prompt 10:

Design a GPT prompt to craft a "motivational email from your future self." Ask for the user's current struggles, big dream, and personality tone. GPT should return a first-person motivational letter from their future, accomplished self — encouraging, firm, and full of clarity about why the hard work is worth it.

Prompt 11:

Write a GPT prompt that motivates users to take imperfect action. Ask for the thing they're overthinking, what perfectionism is costing them, and the desired outcome. GPT should return a reframe message on how messy starts beat no starts, a micro-action they can take today, and a pep talk for moving forward with courage.

Prompt 12:

Create a GPT prompt that helps someone rediscover their "why." Ask for the goal, current doubt, and last moment of excitement. GPT should return a deep-dive motivation reflection exploring intrinsic vs extrinsic drivers, reframing roadblocks, and scripting a mission statement to keep top-of-mind when things get hard.

Prompt 13:

Generate a GPT prompt that turns quotes into custom motivational mantras. Ask for 3 favorite quotes, the current challenge, and goal. GPT should remix the quotes into a new personalized mantra, then provide a motivational breakdown of how to use it daily — in journaling, wallpapers, or vocal repetition.

Prompt 14:

Write a GPT prompt to create a 5-minute visualization for big goals. Ask for the desired goal, outcome metrics, and emotions tied to achieving it. GPT should script a guided visualization including sensory details, timeline jumps, and internal self-image. Use empowering language to build emotional resonance and inner conviction.

Prompt 15:

Design a GPT prompt to help users stay motivated during plateaus. Ask for the goal, how long they've felt stuck, and signs of subtle progress. GPT should return a mindset shift focusing on long-term growth, reflection questions, and evidence that growth is happening beneath the surface. Include visual metaphors like "bamboo growth" or "delayed harvest."

Prompt 16:

Create a GPT prompt to generate a personal motto. Ask for values, recurring life theme, and type of motivation needed (push, pull, balance). GPT should return a short, punchy motto the user can print, repeat, and anchor themselves with daily. Include variants for different moods and a journaling prompt to keep it alive.

Prompt 17:

Write a GPT prompt to help users romanticize their journey. Ask for current goal, obstacles, and favorite creative form (music, words, visuals). GPT should return a poetic or cinematic reframing of their struggle, turning the grind into a noble path. Include metaphors and phrases that make their effort feel legendary.

Prompt 18:

Generate a GPT prompt to write an “inner coach” script. Ask for the user’s challenge, what an ideal coach would say, and what they need to hear. GPT should return a dialogue of encouragement, truth, and action — designed to silence the inner critic and bring forward the inner guide.

Prompt 19:

Create a GPT prompt to write a motivational story based on the user's struggle. Ask for their obstacle, dream, and personality type. GPT should return a short parable or fable where the main character overcomes odds — subtly reflecting the user’s own path. Use metaphor and narrative psychology to instill courage.

Prompt 20:

Write a GPT prompt to help users build grit. Ask for goal type, setback history, and current willpower. GPT should return a mental model (like “10x Rule,” “Grit over Glamour”), reframing narrative, identity anchor, and micro-goals that build traction. Include rituals to fuel grit such as cold exposure, rejection training, or journaling.

Category 11: Side Hustles & Passive Income

Prompt 1:

Write a GPT prompt to help users identify the best side hustle for their lifestyle. Ask for available hours per week, current skills, startup capital, and long-term goals. GPT should return 3 side hustle suggestions with pros/cons, expected income potential, and startup steps. Include monetization strategies, time-blocking tips, and scalable options based on interest and demand.

Prompt 2:

Create a GPT prompt to guide users in building a digital product-based passive income stream. Ask for niche expertise, ideal audience, and format preference (PDF, course, toolkit). GPT should return a 3-step framework to build, host, and automate sales using platforms like Gumroad or Payhip. Include launch strategy, email automation, and affiliate suggestions.

Prompt 3:

Design a GPT prompt that outlines a low-cost affiliate marketing side hustle. Ask for niche interest, available time, and preferred platform (blog, YouTube, Twitter). GPT should return product niche ideas, affiliate networks to join, content creation plan, and automation tools for publishing and tracking links. Include tips for trust-based selling and SEO growth.

Prompt 4:

Write a GPT prompt to help users set up a print-on-demand passive income stream. Ask for design niche, comfort with tools (Canva, Photoshop), and preferred marketplace (Etsy, Redbubble). GPT should return store name ideas, product strategy, upload schedule, marketing tips, and mockup design tools. Include batch strategies to launch faster.

Prompt 5:

Create a GPT prompt that helps users turn their knowledge into a coaching side hustle. Ask for niche expertise, audience pain point, and coaching format (1:1, group). GPT should return a coaching offer, pricing tier suggestions, client onboarding steps, and a simple lead generation funnel. Include tips for starting on Calendly and Notion.

Prompt 6:

Generate a GPT prompt to help users create a content automation system for side hustle growth. Ask for content format, posting platform, and weekly time budget. GPT should return a system using ChatGPT, Canva, Buffer/Metricool to script, design, and schedule weekly content. Include repurposing ideas and hooks to drive traffic passively.

Prompt 7:

Write a GPT prompt that outlines how to start a faceless YouTube channel for passive income. Ask for niche, comfort level with video editing/voiceover, and goal (ads, affiliate, course sales). GPT should return video ideas, posting structure, tool stack (Pictory, Descript, CapCut), and monetization plan. Include growth hacks like Shorts and collaborations.

Prompt 8:

Create a GPT prompt that helps users productize a skill into a service + template combo. Ask for skill (copywriting, design, strategy), client type, and delivery method. GPT should return a way to split offer into done-for-you and DIY, pricing packages, upsell templates, and automation tools like HoneyBook or Tally.

Prompt 9:

Design a GPT prompt to help creators launch a low-ticket product. Ask for niche, prompt type, and user level (beginner/advanced). GPT should return bundle layout, landing page headline, visual mockup tips, platform to sell on, and post-purchase upsell ideas. Include suggestions for audience building and digital delivery automation.

Prompt 10:

Write a GPT prompt to outline a newsletter monetization strategy as a side hustle. Ask for audience type, sending frequency, and monetization goal (ads, product sales, services). GPT should return a content structure, monetization blocks, email platform recommendations, and offer examples. Include tools for automating welcome sequences and scheduling.

Prompt 11:

Create a GPT prompt to help creators turn viral threads into evergreen income. Ask for topic, audience size, and platform (X, Reddit, Quora). GPT should return a breakdown strategy: content-to-lead magnet, tripwire, product launch. Include lead magnet formats, landing page guidance, and how to retarget past viewers.

Prompt 12:

Generate a GPT prompt that creates a 90-day passive income challenge. Ask for income target, skillset, niche, and available time. GPT should return a challenge calendar with weekly themes (e.g., product, traffic, automation), daily action items, mindset motivators, and accountability tracking system.

Prompt 13:

Write a GPT prompt that maps out a 3-income stream diversification plan. Ask for current skillset, existing business/income, and preferred passive model. GPT should return three streams (product, content, service), setup steps, integration methods, and scaling roadmap. Include risk balancing and time allocation strategies for execution.

Prompt 14:

Create a GPT prompt to help users sell digital downloads on Etsy. Ask for niche (planners, templates, journals), design tool preference, and delivery format. GPT should return shop setup checklist, product listing guide, SEO keyword use, upsell strategy, and Etsy automation tools like EverBee and eRank.

Prompt 15:

Design a GPT prompt for building a podcast side hustle with sponsorship potential. Ask for niche topic, episode format, and publishing frequency. GPT should return show title ideas, hosting platform setup, episode script formula, sponsorship outreach template, and cross-platform promo tips. Include monetization options beyond sponsorships.

Prompt 16:

Write a GPT prompt to create a niche Gumroad store for passive income. Ask for niche category, product type (ebook, prompts, templates), and audience size. GPT should return a brand name, store layout, pricing tiers, upsell items, and email capture plan. Include tools for auto-delivery and testimonials.

Prompt 17:

Create a GPT prompt to help freelancers turn service offerings into a course. Ask for skillset, biggest client pain points, and preferred course style. GPT should return a course outline, lesson planner, recording script, platform options, and pricing guide. Include beta offer ideas and sales funnel layout.

Prompt 18:

Generate a GPT prompt that helps creators build a “silent income” engine. Ask for visibility comfort level, niche, and monetization goal. GPT should return faceless business ideas (KDP, Notion packs, templates), platforms, branding tips, and automation flow to generate sales while sleeping.

Prompt 19:

Write a GPT prompt to help creators use ChatGPT to generate passive income ideas. Ask for skillset, interests, platform preference, and capital. GPT should return 5 side hustle ideas, startup action plan, monetization stack, and resource list. Include passive-friendly methods like PLR, evergreen content, and digital asset flipping.

Prompt 20:

Create a GPT prompt that generates a roadmap for financial freedom using side hustles. Ask for age, income goal, time availability, and risk tolerance. GPT should return a multi-phase path: start (skills and cashflow), build (digital product/business), scale (automation, team). Include mindset reminders and monthly milestones to track freedom progress.

Category 12: Coaching & Consulting Business

Prompt 1:

Write a GPT prompt to help coaches design their signature offer. Ask for the transformation they provide, their target audience, and how they prefer to deliver results (1:1, group, or digital). GPT should return a structured offer including framework pillars, timeline, deliverables, and bonuses. Include naming ideas, pricing tiers, and tips to present value clearly to ideal clients.

Prompt 2:

Create a GPT prompt to help new consultants define their niche and positioning. Ask for background experience, industries served, and problems solved. GPT should return a clear niche statement, brand angle, and service positioning strategy. Include a one-liner introduction, tagline suggestions, and tips on how to communicate their edge in saturated markets.

Prompt 3:

Design a GPT prompt that helps coaches craft a transformational story for client attraction. Ask for their turning point moment, the struggle they overcame, and how it connects to their work. GPT should return a personal brand story, a short social media version, and a long-form About Page version. Include calls to action and trust-building cues.

Prompt 4:

Write a GPT prompt to help consultants design a discovery call script. Ask for the service offered, the ideal client's biggest pain point, and the goal of the call. GPT should return a call structure with opener, trust-building questions, needs assessment, solution pitch, and close. Include handling objections and follow-up steps.

Prompt 5:

Create a GPT prompt to help coaches build a 90-day client success roadmap. Ask for the goal their clients typically want, how long the program is, and the type of support they offer. GPT should return a breakdown of milestones, weekly outcomes, tools/resources, and check-in systems. Include tracking formats and accountability suggestions.

Prompt 6:

Generate a GPT prompt that helps consultants create a lead magnet for authority building. Ask for niche, target problem, and type of client they want to attract. GPT should return a valuable freebie idea (guide, quiz, audit), headline/title options, email sequence overview, and landing page copy.

Prompt 7:

Write a GPT prompt to help coaches create high-converting sales page copy. Ask for their program name, ideal client, outcomes, and pricing. GPT should return a sales page structure: hook, pain/agitate/solve section, social proof, offer stack, FAQs, and final CTA. Include emotional resonance and practical bullet points.

Prompt 8:

Design a GPT prompt that generates weekly content ideas for coaches. Ask for niche, audience struggles, and platform preference. GPT should return a 4-post-per-week plan: value post, personal story, testimonial/authority post, and CTA. Include captions, hashtags, and visual content suggestions.

Prompt 9:

Create a GPT prompt that helps consultants write client proposals. Ask for project type, scope, client size, and pricing model. GPT should return a professional proposal structure with introduction, goals, deliverables, timeline, terms, and next steps. Include tips for presenting via PDF or Google Docs and closing deals faster.

Prompt 10:

Write a GPT prompt to help coaches re-engage past leads. Ask for offer type, lead objections, and last touchpoint. GPT should return email and DM templates designed to reintroduce the offer, overcome resistance, and invite action. Include scarcity builders and ways to personalize based on lead source.

Prompt 11:

Create a GPT prompt that helps consultants package their expertise into a digital course. Ask for niche, experience level of audience, and desired course outcome. GPT should return a curriculum structure, module breakdown, lesson format (video, slides, templates), platform suggestions, and launch plan.

Prompt 12:

Design a GPT prompt to help coaches onboard new clients professionally. Ask for program type, support format, and welcome tone. GPT should return onboarding email templates, intake form questions, welcome call checklist, and client portal setup tips using Notion, ClickUp, or Google Drive.

Prompt 13:

Write a GPT prompt to help consultants price their services with confidence. Ask for service type, audience, market norms, and delivery style. GPT should return pricing options (retainer, hourly, project-based), value justification points, and client objection handling scripts.

Prompt 14:

Generate a GPT prompt that creates a referral system for coaching businesses. Ask for audience type, program value, and incentive preference. GPT should return a referral invite script, reward structure, email templates, and automation setup using email or Google Forms. Include ideas to encourage repeat clients to refer actively.

Prompt 15:

Create a GPT prompt that helps coaches script their live webinar or masterclass. Ask for the transformation being taught, audience challenge, and pitch offer. GPT should return a structure: opening hook, education segment, story, value stack, and offer pitch. Include chat prompts, CTA examples, and urgency triggers.

Prompt 16:

Design a GPT prompt to help consultants optimize LinkedIn for client attraction. Ask for service type, ideal client, and personal tone. GPT should return an optimized headline, profile summary, featured section ideas, and weekly content plan with outbound connection strategies.

Prompt 17:

Write a GPT prompt to help coaches script 5-day challenges to launch offers. Ask for niche, client struggle, and end offer. GPT should return a 5-day structure with challenge name, daily topic, engagement prompts, delivery format (email, live, Telegram), and pitch plan on the final day.

Prompt 18:

Create a GPT prompt to help consultants build case study content. Ask for project outcomes, client background, and before/after metrics. GPT should return a full case study layout: intro, problem, solution, result, testimonial, and CTA. Include short versions for social media.

Prompt 19;Generate a GPT prompt to help coaches run sales calls with integrity. Ask for call structure preference, audience pain points, and pricing range. GPT should return a call flow that prioritizes empathy, values-based selling, and clarity. Include objection-handling language and offer recap.

Prompt 20:

Write a GPT prompt to help consultants create authority-boosting carousel posts. Ask for topic, client pain point, and platform (Instagram, LinkedIn). GPT should return 5–7 slide carousel structure with headlines, storytelling, micro-wins, CTA, and save-worthy insights. Include design tips and Canva layout prompts.

Category 13: Digital Product Ideas

Prompt 1:

Write a GPT prompt that helps creators brainstorm digital products based on their daily routines and skills. Ask for the user's daily tasks, industry knowledge, and time available to create. GPT should return 3 digital product ideas (e.g., planners, Notion templates, swipe files) and suggest delivery format, audience, and platform to sell. Include micro-product variants and examples of real-life monetization.

Prompt 2:

Create a GPT prompt that generates a digital product bundle offer. Ask for niche, product types (templates, guides, prompts), and customer outcome. GPT should return a bundled offer with name, item breakdown, value stacking, discount strategy, and bonus items. Include headline ideas, urgency builders, and cross-promotion opportunities across platforms like Gumroad or Etsy.

Prompt 3:

Design a GPT prompt to help creators turn their blog content into a paid eBook. Ask for blog theme, target reader, and total word count. GPT should return an eBook structure, intro/outro copy, content repurposing plan, and selling strategy. Include layout tips, tool suggestions (Canva, Reedsy), and email list integration for lead gen.

Prompt 4:

Write a GPT prompt that helps users create plug-and-play Canva templates for digital sales. Ask for niche (business, wellness, creator), design goal (social post, workbook, resume), and user skill level. GPT should return template category ideas, layout structure, design tips, and how to make it editable/shareable. Include monetization tips for marketplaces like Creative Market.

Prompt 5:

Create a GPT prompt that helps solopreneurs turn their DMs or emails into a swipe file product. Ask for message types (sales, pitch, outreach), tone, and industry. GPT should return a categorized swipe file layout, editing tips, bundling ideas, and mockup generation for marketing. Include delivery options and list-building strategies.

Prompt 6:

Generate a GPT prompt that outlines a digital quiz product with automated outcomes. Ask for niche (career, wellness, learning), result types, and quiz goal. GPT should return a structure: intro, question bank, scoring logic, and outcome page content. Include tools like Interact or Tally, and monetization via upsells or email list.

Prompt 7:

Write a GPT prompt that converts your coaching notes into digital workbooks. Ask for the type of coaching, main modules, and audience level. GPT should return a structured workbook outline with exercises, reflection questions, prompts, and summary sections. Include export formats, design tips, and low-ticket pricing options.

Prompt 8:

Design a GPT prompt that helps designers create icon packs or UI kits for sale. Ask for app type (iOS, web), design style, and tools used. GPT should return a list of 20 icon ideas or UI components, naming tips, format exports (SVG, PNG, Figma), and marketplaces to sell on. Include licensing and branding tips.

Prompt 9:

Create a GPT prompt that builds a Notion template pack. Ask for audience (students, solopreneurs, agencies), desired transformation, and use cases. GPT should return a pack structure with 3–5 templates, naming, layout logic, sharing/export instructions, and launch strategy. Include tiered pricing and idea for growing a template-based newsletter.

Prompt 10:

Write a GPT prompt that helps writers sell idea banks as a digital product. Ask for topic type (content, fiction, business), audience, and ideal use case. GPT should return a structure for the idea bank (PDF, CSV, Notion), bundling suggestions, pricing tiers, and growth strategies via email freebies and TikTok clips.

Prompt 11:

Generate a GPT prompt that turns case studies into sellable digital frameworks. Ask for niche, client type, and transformation example. GPT should return a structure for extracting lessons, before/after visuals, process steps, and naming the framework. Include selling angles, PDF design tips, and ideas to bundle with mini-courses or checklists.

Prompt 12:

Design a GPT prompt to help users create tutorial-style digital micro-courses. Ask for skill taught, ideal learner, and length. GPT should return a script structure, module layout, delivery tools (Gumroad, Teachable, Loom), and monetization plan. Include examples of visual slides, check-ins, and bonus content to enhance perceived value.

Prompt 13:

Create a GPT prompt to help creators sell wallpapers or phone backgrounds. Ask for visual style (aesthetic, motivational, minimalist), format, and theme. GPT should return bundle ideas, delivery formats (ZIP, Dropbox, Payhip), and upsell ideas like planner kits or affirmation packs. Include design tools and social post templates for launch.

Prompt 14:

Write a GPT prompt that helps professionals turn onboarding checklists into digital downloads. Ask for job role (VA, coach, marketer), checklist type, and client usage. GPT should return a ready-to-sell checklist in editable format, with naming suggestions, pricing guide, and automation steps for email delivery post-purchase.

Prompt 15:

Create a GPT prompt that converts Instagram captions into a post idea bank product. Ask for niche, tone, and past performance insights. GPT should return a categorized caption bank, aesthetic layout ideas, and a funnel plan to upsell a social media service or guide. Include content teaser tips and launch strategies.

Prompt 16:

Generate a GPT prompt that helps parents create printable educational games. Ask for child's age group, subject area, and attention span. GPT should return printable game ideas, instruction layouts, fun visuals, and delivery options via Etsy or TeachersPayTeachers. Include bundling strategy by age range or subject mastery.

Prompt 17:

Write a GPT prompt that creates AI-powered content prompts as a digital product. Ask for niche, tool preference (ChatGPT, Jasper), and skill level. GPT should return prompt bundle layout, naming, examples of output, delivery format (PDF, Notion), and SEO ideas for Gumroad listings.

Prompt 18:

Design a GPT prompt to help freelancers convert SOPs into a paid template pack. Ask for niche (content, hiring, automation), SOP goal, and format. GPT should return a package layout with 5–10 SOPs, branding guidance, upsell tips, and ideas for a bonus walk-through video.

Prompt 19:

Create a GPT prompt that helps artists sell coloring book pages digitally. Ask for theme (animals, fantasy, mandala), age group, and format (printable, app). GPT should return layout ideas, bundle options, digital tools for creation, and platforms to sell. Include ideas for giveaways or email opt-ins using sample pages.

Prompt 20:

Write a GPT prompt to help creators test digital product ideas before building. Ask for audience, platform (X, Instagram, Reddit), and idea format. GPT should return a validation method using polls, waitlists, lead magnet engagement, and landing page traffic. Include feedback analysis and next-step decision strategy.

Category 14: Branding & Visual Identity

Prompt 1:

Write a GPT prompt to help creators develop a consistent brand identity. Ask for niche, brand values, tone, and audience type. GPT should return a brand style guide including color palette, font pairing suggestions, logo concept directions, tone of voice, and visual motifs. Include instructions for applying this guide across social media, websites, and product packaging.

Prompt 2:

Create a GPT prompt that helps businesses create a brand story that resonates. Ask for origin story, mission, and audience aspirations. GPT should return a 3-part narrative structure: the founder's journey, the transformation offered, and the shared mission with the customer. Include ideas for adapting this story into bios, reels, or landing pages.

Prompt 3:

Design a GPT prompt to generate a personal brand kit. Ask for profession, unique strengths, and desired vibe (bold, minimalist, luxury, playful). GPT should return a kit with a one-liner, bio variations, visual language, mood board themes, and a profile image concept. Suggest Canva board templates and usage across LinkedIn, Instagram, and websites.

Prompt 4:

Write a GPT prompt that helps creators choose the right brand colors. Ask for niche, target emotion, and competitor brand examples. GPT should return 2–3 color palette options with hex codes, psychology behind choices, and contrast suggestions for accessibility. Include matching font pairings and mood board layouts.

Prompt 5:

Create a GPT prompt to guide someone in designing a brand logo concept. Ask for brand name, vibe, and design preferences (minimal, vintage, bold). GPT should return 3 logo direction concepts with ideas for icons, layout, typefaces, and colors. Include do's/don'ts and inspiration sources for briefing a designer or using AI tools.

Prompt 6:

Generate a GPT prompt that helps creators define their content aesthetic. Ask for platform type, niche, and audience demographic. GPT should return recommendations for brand filters, image composition, tone of captions, visual pattern types, and templates. Include references to trending styles like Y2K, dark mode, or minimalist grids.

Prompt 7:

Write a GPT prompt that builds a visual brand for a faceless account. Ask for niche, theme (luxury, inspirational, casual), and preferred media type (quote posts, reels, carousels). GPT should return visual brand rules for icons, template shapes, color saturation, fonts, and post layouts optimized for virality.

Prompt 8:

Design a GPT prompt to craft an Instagram feed that looks cohesive. Ask for brand type, post frequency, and visual vibe. GPT should return a layout suggestion (checkerboard, column-based, reels-first), posting pattern, and Canva template system to maintain consistency while maximizing variety.

Prompt 9:

Create a GPT prompt that helps users update their visual brand across platforms. Ask for rebrand reason, visual preferences, and platforms used. GPT should return a checklist to align profile photos, covers, bios, highlights, email signature, and marketing material visuals. Include tool suggestions like Brandbird, Zight, or Visme.

Prompt 10:

Write a GPT prompt to help solopreneurs brand their service-based business professionally. Ask for offer type, target client, and emotional tone (high-energy, calming, luxurious). GPT should return brand identity suggestions including logo ideas, vibe words, website aesthetic, and brand photography suggestions.

Prompt 11:

Generate a GPT prompt that develops brand slogans and taglines. Ask for brand promise, tone of voice, and core benefit. GPT should return 5–7 tagline variations with short, memorable phrasing. Include advice for using the tagline on websites, reels, product banners, and email footers.

Prompt 12:

Create a GPT prompt that helps course creators brand their program. Ask for program name, transformation offered, and audience stage. GPT should return visual identity for the course: banner design concepts, module slide templates, brand voice for videos, and certificate style ideas. Include launch visual checklist.

Prompt 13:

Design a GPT prompt for building a brand mood board. Ask for brand purpose, core feeling to evoke, and style inspiration (magazine, clean, loud, retro). GPT should return image types to include, layout suggestions, fonts, colors, and where to source materials. Recommend Canva or Figma for compilation.

Prompt 14:

Write a GPT prompt that helps creators brand a newsletter. Ask for newsletter name, niche, audience emotion, and email frequency. GPT should return brand assets: header image idea, welcome email tone, brand color and CTA button design, emoji use, and signature formatting.

Prompt 15:

Create a GPT prompt to help freelancers create branded proposal templates. Ask for client industry, offer type, and delivery method (PDF, Notion, Google Docs). GPT should return branded layout with cover page idea, modular sections, logo placement tips, and visual formatting that enhances trust and conversion.

Prompt 16:

Generate a GPT prompt that helps creators create YouTube thumbnail branding. Ask for niche, video tone, and audience type. GPT should return thumbnail structure: text size and position, color contrast ideas, facial expressions (if used), and brand font/logo placement. Include tips for A/B testing visuals.

Prompt 17:

Write a GPT prompt that defines brand archetypes for solopreneurs. Ask for personal values, customer emotions to evoke, and business goals. GPT should return a primary and secondary archetype (e.g., Creator, Sage, Explorer), brand tone, messaging guidance, and content hook examples based on archetype.

Prompt 18:

Design a GPT prompt to help users create highlight covers for Instagram. Ask for brand aesthetic, story categories, and icons preferred (flat, outline, realistic). GPT should return cover themes, font and symbol pairings, Canva templates to use, and how to align with overall brand feel.

Prompt 19:

Create a GPT prompt that helps product sellers build a branded packaging experience. Ask for product type, shipping method, and price range. GPT should return packaging concepts including box colors, insert card copy, sticker ideas, and visual unboxing experience. Include tips for low-cost branded packaging for digital sellers too.

Prompt 20:

Write a GPT prompt to help personal brands create signature visual elements. Ask for personality traits, vibe (quiet luxury, bold creator, spiritual minimalism), and audience. GPT should return ideas for recurring symbols, brand iconography, overlay designs, and signature animations for reels or story posts.

Category 15: Email Marketing & Lead Generation

Prompt 1:

Write a GPT prompt that helps creators build a lead magnet to grow their email list. Ask for niche, audience challenge, and preferred format (checklist, quiz, template). GPT should return a magnetic offer idea, title options, value proposition, delivery platform (MailerLite, ConvertKit), and follow-up sequence structure.

Prompt 2:

Create a GPT prompt that helps users write a 5-email welcome sequence. Ask for niche, product/service offered, and brand tone. GPT should return a sequence outline: intro email, brand story, value delivery, soft pitch, and testimonial email. Include subject lines and recommended sending intervals.

Prompt 3:

Design a GPT prompt to help creators turn blog posts into an email mini-course. Ask for blog topics, course goal, and audience level. GPT should return email titles, lesson summaries, calls to action, and formatting tips. Include content reuse tips and how to end with a paid offer pitch.

Prompt 4:

Write a GPT prompt that generates a high-converting newsletter opt-in page. Ask for niche, freebie title, and target outcome. GPT should return headline variations, subheadlines, bullet benefits, form prompts, and CTA button ideas. Include mobile optimization tips and ideas for embedding videos or testimonials.

Prompt 5:

Create a GPT prompt to help solopreneurs write a weekly newsletter strategy. Ask for niche, desired newsletter tone, and audience goal. GPT should return a 4-week content plan: insights, resources, storytelling, and soft promotion. Include template formats and engagement boosters like polls or replies.

Prompt 6:

Generate a GPT prompt that creates a 3-month email list growth challenge. Ask for starting list size, audience type, and traffic channels. GPT should return weekly growth goals, daily actions (e.g., post hooks, freebies, referral prompts), and engagement milestones. Include tracking sheet ideas.

Prompt 7:

Write a GPT prompt to help service providers create a lead generation quiz. Ask for niche, client pain point, and result types. GPT should return quiz title ideas, question samples, scoring method, email capture strategy, and follow-up emails for each result type.

Prompt 8:

Design a GPT prompt that repurposes Instagram content into lead-gen emails. Ask for post type (carousel, story, reel), email frequency, and opt-in topic. GPT should return email variations, CTA tweaks, and list segmentation strategies based on reader behavior.

Prompt 9:

Create a GPT prompt that helps course creators automate a lead-to-customer funnel. Ask for lead magnet, course topic, and pricing. GPT should return landing page guidance, email sequence flow (educate, nurture, sell), and integration setup using platforms like ConvertKit or ActiveCampaign.

Prompt 10:

Write a GPT prompt to create a re-engagement campaign for cold subscribers. Ask for niche, audience reason for disengagement, and list age. GPT should return a 3-email sequence, subject lines, value-restoration offers, and opt-out incentives. Include tips to segment clickers and re-integrate them.

Prompt 11:

Generate a GPT prompt that helps creators write subject lines that boost open rates. Ask for email type (story, promo, update), brand tone, and urgency level. GPT should return 10 options per input, categorized by emotional pull, curiosity, and direct clarity. Include emoji usage tips.

Prompt 12:

Create a GPT prompt that helps freelancers build a newsletter lead magnet from client FAQs. Ask for niche, FAQ types, and delivery format. GPT should return a structured lead magnet, teaser copy, subject line ideas, and email CTA to service packages.

Prompt 13:

Design a GPT prompt that creates content upgrades for blogs and YouTube. Ask for content title, viewer goal, and format preference. GPT should return an upgrade title, offer copy, integration options (popup, inline), and email capture CTA. Include cross-platform promotion ideas.

Prompt 14:

Write a GPT prompt that builds an evergreen funnel using prompts. Ask for niche, target offer, and funnel length. GPT should return prompt-based emails, call-to-action placements, educational sequences, and conversion goals. Include tagging strategies and sales triggers.

Prompt 15:

Create a GPT prompt that helps authors build a reader funnel. Ask for book topic, audience profile, and end goal (engagement, sales, community). GPT should return a funnel layout: lead magnet, email nurture series, book upsell, and bonus content. Include integrations like BookFunnel or Gumroad.

Prompt 16:

Generate a GPT prompt to create an email referral incentive system. Ask for list size, incentive budget, and reward type. GPT should return email copy for inviting referrals, a tracking system (Tally, SparkLoop), bonus delivery structure, and promo schedule.

Prompt 17:

Design a GPT prompt that helps creators run a 5-day email challenge. Ask for niche, outcome, and content type (text, video, audio). GPT should return challenge themes, email structure, CTA flow, and post-challenge upsell ideas. Include automation tool suggestions.

Prompt 18:

Write a GPT prompt that crafts abandoned cart email sequences for digital products. Ask for product type, platform (Shopify, Gumroad), and tone. GPT should return a 3-email sequence: reminder, benefit restate, bonus urgency. Include discount logic and FOMO enhancements.

Prompt 19:

Create a GPT prompt that turns podcast content into lead-generating emails. Ask for episode type (interview, solo), email length preference, and audience goal. GPT should return teaser email copy, transcript-to-CTA tips, and bundling options for related opt-ins.

Prompt 20:

Write a GPT prompt that creates segmentation tags and triggers for growing email lists. Ask for niche, lead magnet types, and subscriber paths. GPT should return tagging structure, content flow logic, trigger-based email examples, and retargeting strategies based on click behavior.

Category 16: Social Media Growth & Strategy

Prompt 1:

Write a GPT prompt to help creators craft a 30-day content calendar for Instagram. Ask for niche, content pillars, and audience goals. GPT should return a detailed posting schedule with themes for each day (educational, relatable, CTA), caption frameworks, engagement prompts, and optimal post times. Include reel ideas and carousel tips tailored to the platform's algorithm.

Prompt 2:

Create a GPT prompt that builds a viral content strategy for short-form video platforms like TikTok and Reels. Ask for niche, target audience interest, and preferred video style. GPT should return hook templates, story arcs, trending audio suggestions, call-to-action strategies, and content batching ideas for consistent posting.

Prompt 3:

Design a GPT prompt to help users optimize their Instagram bio for growth and conversion. Ask for personal brand, ideal audience, and main offer. GPT should return headline ideas, value-packed bios, link-in-bio CTA variations, emoji usage, and highlight cover recommendations that reinforce brand positioning.

Prompt 4:

Write a GPT prompt that helps creators identify their top-performing social content. Ask for past post types, metrics tracked, and platform used. GPT should return a breakdown of post formats, content topics, and engagement drivers. Include tips for repurposing winners into new formats and optimizing for other channels.

Prompt 5:

Create a GPT prompt to help solopreneurs script viral carousel posts. Ask for niche, pain point, and tone of voice. GPT should return a slide-by-slide structure: hook, problem, value delivery, transformation, and CTA. Include Canva layout suggestions and caption strategies for saves and shares.

Prompt 6:

Generate a GPT prompt that creates a social media brand voice guide. Ask for brand type, audience age, and content tone (funny, professional, inspirational). GPT should return examples of post tones, caption starters, emoji use, and do's and don'ts to maintain consistency across all platforms.

Prompt 7:

Write a GPT prompt to help digital product sellers grow their audience organically. Ask for niche, product type, and audience goals. GPT should return organic strategy: content themes, call-to-actions for DMs or email list, storytelling prompts, and giveaway ideas that align with product goals.

Prompt 8:

Design a GPT prompt that helps creators develop a platform prioritization plan. Ask for business model, target client, and time available. GPT should return a growth map comparing YouTube, LinkedIn, Instagram, TikTok, and X — including effort vs return, content format, and batching tips.

Prompt 9:

Create a GPT prompt that helps creators systemize repurposing long-form content. Ask for input format (video, blog, podcast), platforms to post on, and target post frequency. GPT should return a breakdown of repurposing steps, including caption generation, headline rewriting, and visual adaptation for each platform.

Prompt 10:

Write a GPT prompt that helps solopreneurs plan a content strategy launch for a new offer. Ask for offer type, launch window, and content frequency. GPT should return a launch content timeline with teaser posts, testimonials, education reels, and final push stories. Include DM strategy and poll engagement.

Prompt 11:

Generate a GPT prompt that outlines a 7-day growth sprint for Instagram. Ask for account niche, current follower count, and posting ability. GPT should return a daily content plan, community engagement checklist, DM outreach prompt, and collaboration ideas. Include profile audit tasks and follower conversion tips.

Prompt 12:

Create a GPT prompt that helps creators build a comment marketing strategy. Ask for niche, audience location, and platforms. GPT should return a plan to engage with thought leaders, community hashtags, viral posts, and value-added responses that increase profile visits and DMs.

Prompt 13:

Design a GPT prompt that writes CTA variations to increase engagement. Ask for post type (carousel, story, reel), audience stage, and platform. GPT should return 10 CTA types: save prompts, share hooks, poll questions, comment bait, and DMs. Include where to place each CTA for maximum effect.

Prompt 14:

Write a GPT prompt to help creators develop a faceless content strategy. Ask for niche, target vibe, and preferred formats. GPT should return voiceover scripts, B-roll content ideas, content outlines, and tools for automating visuals while maintaining brand identity without personal appearance.

Prompt 15:

Create a GPT prompt that helps influencers plan branded partnerships. Ask for niche, engagement rate, and dream brand list. GPT should return an outreach template, value proposition pitch, content bundle ideas, and a collaboration calendar. Include tips on negotiation, deliverables, and UGC rights.

Prompt 16:

Generate a GPT prompt that builds a strategy to increase story views. Ask for platform, story frequency, and niche. GPT should return story flow templates: polls, behind-the-scenes, countdowns, and question boxes. Include sticker use suggestions and swipe-up alternatives like links in bio.

Prompt 17:

Write a GPT prompt that helps business owners use social proof on social media. Ask for offer type, audience hesitations, and available testimonials. GPT should return post structures for testimonials, before/after posts, DM screenshots, and review carousels. Include layout tips for each format.

Prompt 18:

Design a GPT prompt that creates a monthly KPI dashboard for tracking social growth. Ask for platforms used, goal types (reach, saves, conversions), and tracking tool (Notion, Sheets). GPT should return template layout, data point suggestions, and instructions for weekly review routines.

Prompt 19:

Create a GPT prompt that helps creators write value-packed captions fast. Ask for niche, post type, and audience struggle. GPT should return a 3-part structure: hook, story/value, and CTA. Include variations for reels, carousels, and images — and optional hashtags.

Prompt 20:

Write a GPT prompt to generate a 3-month strategic growth plan for LinkedIn. Ask for industry, content focus, and lead goal. GPT should return monthly objectives, content theme calendar, connection strategies, lead-gen posts, and engagement tips tailored to professional tone.

Category 17: Productivity & Time Management

Prompt 1:

Write a GPT prompt that creates a personalized daily productivity system. Ask for wake-up time, work hours, energy patterns, and main responsibilities. GPT should return a detailed day plan with focused work blocks, break times, deep work hours, and personal activities. Include calendar scheduling suggestions and tools like Google Calendar or Notion.

Prompt 2:

Create a GPT prompt to help users implement the Pomodoro Technique. Ask for tasks, desired total work duration, and attention span. GPT should return a Pomodoro schedule including work/rest intervals, task segmentation tips, timer recommendations, and motivational reward suggestions to avoid burnout.

Prompt 3:

Design a GPT prompt that builds a weekly review routine for solopreneurs. Ask for goals, task backlog, and reflections. GPT should return a Notion or journal-based review layout including completed tasks, lessons learned, next priorities, and mood tracking to align productivity with emotional state.

Prompt 4:

Write a GPT prompt that helps creators break down large goals into micro-tasks. Ask for a big goal, deadline, and available hours per day. GPT should return task segmentation, prioritization order, milestone checkpoints, and estimated time per step. Include scheduling into calendar blocks.

Prompt 5:

Create a GPT prompt to guide users in building a digital second brain. Ask for preferred tool (Notion, Obsidian), knowledge type (personal, work, learning), and desired output (easy recall, writing ideas, workflow templates). GPT should return a structure to store, retrieve, and tag information efficiently.

Prompt 6:

Generate a GPT prompt that helps users optimize their morning routine for productivity. Ask for wake-up time, current routine, and productivity goals. GPT should return a structured morning plan including tech/no-tech time, journaling, focused task, and buffer time before reactive tasks like emails.

Prompt 7:

Write a GPT prompt that creates a distraction-reduction plan for remote workers. Ask for environment, major distractions, and time blocks. GPT should return workspace setup tips, app blocker suggestions, focus anchors (music, scent), and accountability routines. Include digital detox hours.

Prompt 8:

Design a GPT prompt that helps entrepreneurs create a system to prioritize tasks. Ask for business role, task categories, and number of daily hours. GPT should return a prioritization matrix (Eisenhower, MoSCoW), tagging system, and visual tracker for urgent vs important.

Prompt 9:

Create a GPT prompt that turns your to-do list into a block schedule. Ask for tasks, deadlines, and available hours. GPT should return a visual layout broken into calendar slots with buffer time and batching suggestions. Include mobile-friendly app options like Sunsama or Motion.

Prompt 10:

Write a GPT prompt that helps content creators streamline idea generation. Ask for niche, platforms, and post frequency. GPT should return a content vault layout, idea-capture system, category color-coding, and idea-to-post workflow automation steps using tools like Trello or Airtable.

Prompt 11:

Generate a GPT prompt that helps overwhelmed users declutter their digital workspace. Ask for devices, app usage, and pain points. GPT should return a clean-up plan for files, browser tabs, bookmarks, email inboxes, and cloud storage. Include folder structures and archive routines.

Prompt 12:

Create a GPT prompt that builds a productivity toolkit for ADHD entrepreneurs. Ask for challenge types, time capacity, and tool preferences (visual, auditory, tactile). GPT should return tools like visual timers, habit stacking systems, dopamine break strategies, and routines to reduce overwhelm.

Prompt 13:

Design a GPT prompt that creates a system for weekly content batching. Ask for content type (reels, blogs, newsletters), post frequency, and available time. GPT should return batch templates, task grouping orders, repurposing maps, and setup checklist for frictionless production.

Prompt 14:

Write a GPT prompt that outlines a Sunday reset ritual for productivity. Ask for goals, work habits, and time available. GPT should return tasks like calendar review, workspace cleanup, week preview, meal prep, and intention setting. Include suggestions for reflection and journaling.

Prompt 15:

Create a GPT prompt that automates routine tasks using tools like Zapier or Make. Ask for task types (email, calendar, CRM), platforms used, and pain points. GPT should return automation workflows, trigger ideas, tool integrations, and fallback plans if automations break.

Prompt 16:

Generate a GPT prompt to help students build a study schedule. Ask for subjects, exam dates, available hours, and learning styles. GPT should return a daily/weekly study plan, break management, review techniques, and milestone tracking. Include digital and analog planner recommendations.

Prompt 17:

Design a GPT prompt that builds an energy tracker for optimizing focus hours. Ask for routine, focus peaks, and energy dips. GPT should return a log structure, visual graphing ideas, and suggestions for adapting task timing based on real energy data.

Prompt 18:

Write a GPT prompt that helps freelancers manage multiple clients without burnout. Ask for client number, project types, and working hours. GPT should return a project tracker system, time blocking for deep work, client priority tiering, and built-in mental reset routines.

Prompt 19:

Create a GPT prompt that transforms meeting notes into action lists. Ask for note format (transcript, bullets), meeting topic, and deadlines. GPT should return actionable items, owners, due dates, and suggestions for follow-up messages or summaries. Include checklist export tools.

Prompt 20:

Write a GPT prompt that turns your day into a focused sprint challenge. Ask for work goal, duration (2–8 hours), and focus capacity. GPT should return a challenge layout: task blocks, energy resets, mini goals, music/soundtrack suggestions, and rewards at key milestones

Category 18: Copywriting & Sales Writing

Prompt 1:

Write a GPT prompt to help creators write high-converting sales page copy. Ask for product type, audience pain point, transformation promise, and pricing. GPT should return a full sales page structure: attention-grabbing headline, problem agitation, solution overview, testimonials, offer breakdown, bonuses, urgency elements, and final CTA. Include guidance on tone and formatting.

Prompt 2:

Create a GPT prompt that helps solopreneurs write persuasive product descriptions. Ask for product type, target user, core benefit, and feature list. GPT should return a 3-part description: hook, value articulation, and sensory detail. Include emotional triggers and storytelling cues for ecommerce platforms or Gumroad.

Prompt 3:

Design a GPT prompt that writes cold DMs for selling a digital service. Ask for niche, offer type, recipient profile, and call to action. GPT should return a short DM script including intro line, pain-based angle, soft pitch, and link/drop CTA. Include variants for different tones like casual, playful, and professional.

Prompt 4:

Write a GPT prompt that crafts high-converting email sales sequences. Ask for offer type, audience profile, price range, and launch window. GPT should return a 5–7 email sequence: story-based email, pain-point highlight, myth busting, offer stack, scarcity boost, and final CTA. Include subject lines and preview text.

Prompt 5:

Create a GPT prompt that helps creators write hooks for reels or TikToks with a sales angle. Ask for product category, transformation, and viewer pain point. GPT should return 10 hook ideas using curiosity, fear of missing out, and promise of instant value — tailored for 3–7 second delivery.

Prompt 6:

Generate a GPT prompt to write Instagram carousel copy with a sales CTA. Ask for niche, offer type, and customer hesitation. GPT should return a 5–7 slide layout: attention hook, myth bust, quick win, CTA slide, and comment encouragement. Include image text vs caption distribution.

Prompt 7:

Write a GPT prompt that turns testimonials into persuasive social proof posts. Ask for raw testimonial, context, and platform. GPT should return a rewritten version highlighting transformation, objections overcome, and relatable story. Include CTA variants and formatting for stories, posts, and reels.

Prompt 8:

Design a GPT prompt to help freelancers pitch their services in Facebook groups or comments. Ask for service niche, pain points solved, and platform guidelines. GPT should return 3 pitch variants: subtle value comment, DM invite post, and post comment value + CTA style.

Prompt 9:

Create a GPT prompt that helps digital product sellers build a benefits-over-features list. Ask for product features, user desire, and emotional triggers. GPT should return rewritten benefits tied to real-life outcomes, mini story examples, and tips on weaving benefits into sales copy smoothly.

Prompt 10:

Write a GPT prompt to help creators build “About Me” copy that sells. Ask for personal story, mission, audience pain point, and signature offer. GPT should return a compelling narrative intro, transformation emphasis, and soft invitation to take the next step. Include long and short versions.

Prompt 11:

Generate a GPT prompt to craft urgency-driven product launch captions. Ask for launch timeline, offer highlights, and urgency triggers (limited seats, time, bonus). GPT should return 5 caption templates using urgency language, scarcity prompts, and strong calls to action — tailored for platforms like Instagram, email, and Twitter.

Prompt 12:

Create a GPT prompt that writes “You vs Them” comparison copy. Ask for niche, your offer’s strengths, and typical competitor weaknesses. GPT should return a chart-style comparison or persuasive paragraph copy. Include tips for avoiding direct brand slams and staying compliant.

Prompt 13:

Design a GPT prompt that creates “transformation” before/after posts. Ask for audience journey stages, product type, and outcome. GPT should return storytelling posts showing problem → shift → result. Include post structures that work well as reels, carousels, and LinkedIn posts.

Prompt 14:

Write a GPT prompt to generate product taglines and brand slogans. Ask for product type, vibe (bold, premium, minimalist), and value proposition. GPT should return 5–10 tagline ideas, including emotional and curiosity-based lines. Include guidance on testing across platforms and using them in banners or ads.

Prompt 15:

Create a GPT prompt that repurposes blog content into sales microcopy. Ask for blog link or topic, offer tied to the content, and audience struggle. GPT should return 3 short-form copy blocks: tweet, IG caption, and email line with soft sales CTA.

Prompt 16:

Generate a GPT prompt that creates mini VSL (video sales letter) scripts. Ask for offer type, target viewer, video length, and price point. GPT should return a structure with hook, pain point, personal story, transformation, offer breakdown, and CTA. Include camera tone suggestions and subtitle-ready script version.

Prompt 17:

Write a GPT prompt that builds an objection-handling section for sales pages. Ask for 3–5 audience hesitations, price point, and urgency. GPT should return an FAQ layout with question phrasing and persuasive answers, reinforcing trust and decision-making confidence.

Prompt 18:

Design a GPT prompt to help course creators write their “What’s Inside” breakdown. Ask for module names, transformation goal, and bonuses. GPT should return copy for each section using benefit language, mini outcomes, and sensory phrases to increase perceived value.

Prompt 19:

Create a GPT prompt that turns boring product specs into engaging microcopy. Ask for specs, audience type, and use case. GPT should return rewritten copy using analogies, emotional framing, and user scenarios to make specs easier to understand and more appealing.

Prompt 20:

Write a GPT prompt that helps creators build curiosity-driven email subject lines. Ask for offer type, content topic, and reader emotion. GPT should return 10 subject line variations using curiosity gaps, questions, surprise elements, and playful tension. Include preview text ideas.

Category 19: Motivation & Mindset

Prompt 1:

Write a GPT prompt that helps someone build a personalized morning motivation routine. Ask for wake-up time, mindset goals, and preferred activities (meditation, journaling, exercise). GPT should return a 30–60 minute morning plan including motivational affirmations, visualizations, mindset anchors, and goal review templates to start the day with clarity and energy.

Prompt 2:

Create a GPT prompt that helps users reframe limiting beliefs. Ask for recurring negative thoughts, past failures, and goals. GPT should return a reframe using rational evidence, empowering language, and future-focused mindset. Include journal prompts to deepen internal shifts and track cognitive growth over time.

Prompt 3:

Design a GPT prompt to help users stay consistent with their long-term goals. Ask for current goal, duration, challenges faced, and motivation source. GPT should return a breakdown of micro-wins, motivational rituals, weekly intention reminders, and accountability systems to maintain internal drive and resilience.

Prompt 4:

Write a GPT prompt that helps users develop a growth mindset after failure. Ask for situation, emotions felt, and lessons learned. GPT should return a reframing narrative, silver linings, self-compassion affirmations, and action plan to bounce back. Include a self-reflection exercise to strengthen mental resilience.

Prompt 5:

Create a GPT prompt that helps someone set mindset goals for the next 90 days. Ask for personal or professional focus, emotional goals, and role models. GPT should return mindset intentions, affirmations, daily actions, and habit-building strategies to solidify confidence, focus, or discipline.

Prompt 6:

Generate a GPT prompt that turns personal struggles into motivational content. Ask for story type, transformation experienced, and lessons learned. GPT should return a storytelling format: the low point, turning moment, the climb, and victory. Include caption suggestions and hashtags for social media sharing.

Prompt 7:

Write a GPT prompt that helps creators fight imposter syndrome. Ask for niche, recent success, and comparison triggers. GPT should return mindset reframes, identity-based affirmations, confidence exercises, and journaling prompts to internalize worth and show up fully.

Prompt 8:

Design a GPT prompt that generates a motivational letter from your future self. Ask for user's current struggle, long-term dream, and ideal future scenario. GPT should return a heartfelt letter offering guidance, encouragement, and visualization cues written from the future you who has already succeeded.

Prompt 9:

Create a GPT prompt that helps users develop grit and emotional stamina. Ask for recurring challenges, emotional triggers, and support systems. GPT should return mindset frameworks, affirmation sets, resilience practices (like breathwork or cold exposure), and weekly self-trust rituals.

Prompt 10:

Write a GPT prompt that helps entrepreneurs maintain motivation during slow business phases. Ask for revenue dip reason, recent efforts, and future plan. GPT should return positive reframing, data-based encouragement, and a 7-day mindset reset challenge to build hope and momentum again.

Prompt 11:

Generate a GPT prompt that creates daily mindset journal prompts. Ask for goal theme (confidence, clarity, motivation), time available, and journaling style. GPT should return a 30-day prompt list mixing gratitude, wins, future pacing, fear processing, and visualization. Include weekly review tips.

Prompt 12:

Create a GPT prompt to help creators stay consistent without burning out. Ask for content type, posting schedule, and signs of overwhelm. GPT should return mindset strategies like effort-reward recalibration, clarity journaling, self-affirmation breaks, and soft systems for consistency over perfection.

Prompt 13:

Design a GPT prompt that turns failure into self-growth. Ask for failure event, personal responsibility, and support system. GPT should return mindset lessons, reframed perspective, action redirection, and forgiveness journaling. Include a ritual to symbolically release regret and refocus.

Prompt 14:

Write a GPT prompt that helps users find motivation from role models. Ask for admired figure, traits they display, and goals shared. GPT should return reflection prompts, behavior imitation suggestions, and a "What would they do?" decision-making filter to adopt their mindset.

Prompt 15:

Create a GPT prompt to help creators build intrinsic motivation. Ask for long-term vision, internal values, and current struggles. GPT should return value clarification, purpose alignment, daily ritual design, and visualization practices. Include dopamine-safe wins to fuel progress without burnout.

Prompt 16:

Generate a GPT prompt that writes motivational affirmations for a specific struggle. Ask for user's doubt or fear, desired confidence state, and speaking style. GPT should return 10 affirmations in first-person format tailored for mirror work or journaling, with instructions for daily repetition.

Prompt 17:

Design a GPT prompt that helps creators find joy in the process instead of only results. Ask for passion, effort level, and why they started. GPT should return mindset reframes, daily rituals for joy, gratitude cues, and content ideas centered around documenting the journey.

Prompt 18:

Write a GPT prompt that generates a weekly mindset email. Ask for subscriber niche, emotional struggle, and tone (uplifting, deep, casual). GPT should return subject lines, story-based intros, mindset takeaway, reflection question, and CTA. Include tips for building parasocial encouragement bonds.

Prompt 19:

Create a GPT prompt that helps side-hustlers stay motivated while working full-time. Ask for work schedule, business goal, and emotional blockers. GPT should return time-framing mindset models, power hour templates, identity-based motivation language, and rituals to reduce fatigue and amplify commitment.

Prompt 20:

Write a GPT prompt to develop a "Why I won't quit" personal manifesto. Ask for dream, obstacles overcome, sacrifices made, and long-term vision. GPT should return a written declaration of intent to keep going, including core values, internal promises, and motivation anchors.

Category 20: AI Tools & Automation

Prompt 1:

Write a GPT prompt to help users create an automated content repurposing system. Ask for main content format (blog, video, podcast), preferred platforms, and frequency. GPT should return a step-by-step plan to extract key points, convert into platform-specific posts, use AI tools like ChatGPT, Descript, and Zapier, and schedule them using tools like Buffer or Publer.

Prompt 2:

Create a GPT prompt that helps solopreneurs automate their customer support. Ask for business type, common FAQs, and preferred channels (email, chatbot, DM). GPT should return a setup guide using tools like Intercom, ManyChat, or ChatGPT API to create canned responses, escalation rules, and 24/7 automation systems.

Prompt 3:

Design a GPT prompt to help creators build a lead capture workflow using AI. Ask for audience type, offer format, and email marketing tool. GPT should return steps to create AI-generated opt-in pages, automated welcome sequences, personalized email follow-ups using ChatGPT or MailerLite integrations, and delivery triggers for lead magnets.

Prompt 4:

Write a GPT prompt that helps users set up an AI-based idea generation engine. Ask for niche, preferred content formats, and publishing frequency. GPT should return a system that pulls trending topics, generates ideas using GPT prompts, and auto-saves them to Notion or Airtable for later use.

Prompt 5:

Create a GPT prompt that helps freelancers automate their client onboarding. Ask for service type, client size, and platforms used. GPT should return templates for intake forms, contract automation (using Dubsado or Bonsai), auto-scheduling (Calendly), and welcome email generation using GPT.

Prompt 6:

Generate a GPT prompt that builds an AI-powered affiliate marketing funnel. Ask for niche, product type, and platform. GPT should return a funnel layout with AI-written landing pages, email sequences, SEO blog scripts, and automation connections via Zapier or Make to send leads to email CRM.

Prompt 7:

Write a GPT prompt to automate proposal writing. Ask for service, client pain point, and offer structure. GPT should return proposal templates tailored to each inquiry using dynamic variables filled by GPT or Typeform responses. Include integrations to auto-send PDFs and get e-signatures.

Prompt 8:

Design a GPT prompt that uses AI to build social media captions in bulk. Ask for content themes, platform type, and brand voice. GPT should return a list of 30 captions including hashtags, CTA options, post types (tips, questions, stories), and tool suggestions like FeedHive or ChatGPT with preset prompts.

Prompt 9:

Create a GPT prompt that helps digital product sellers generate UGC ideas with AI. Ask for product type, customer results, and platforms used. GPT should return UGC formats (reviews, testimonials, unboxing), AI-generated captions or scripts, and automation ideas for sourcing and scheduling posts.

Prompt 10:

Write a GPT prompt to help users design a YouTube content system using AI. Ask for channel niche, video format, and workflow goals. GPT should return video topic ideas, script generator prompts, thumbnail title formulas, AI-based editing ideas (Descript, Pictory), and a publishing calendar template.

Prompt 11:

Generate a GPT prompt that helps automate a 5-day email challenge setup. Ask for challenge goal, audience level, and email tool. GPT should return daily email outlines, AI-generated value points, automation triggers, and bonus delivery methods — using ConvertKit or Beehiiv with AI content generation.

Prompt 12:

Create a GPT prompt to build a solopreneur CRM using Airtable and AI. Ask for business type, lead stages, and communication preference. GPT should return Airtable template structure, GPT prompts for each client stage (follow-up, invoice, check-in), and automation to trigger emails or DMs at each stage.

Prompt 13:

Design a GPT prompt that helps ecommerce owners automate abandoned cart emails. Ask for platform (Shopify, WooCommerce), product type, and audience tone. GPT should return a 3-email sequence with copy, personalization tokens, recovery incentives, and Zapier-based automations to send and track performance.

Prompt 14:

Write a GPT prompt that helps coaches automate client progress tracking. Ask for program structure, session frequency, and goal types. GPT should return tracking templates, GPT-generated progress feedback responses, and Airtable or Notion workflows that auto-update based on client input.

Prompt 15:

Create a GPT prompt that generates AI content for Notion dashboards. Ask for niche, dashboard goal (productivity, finance, content), and data sources. GPT should return ideas for dashboards that pull GPT summaries, quotes, auto-tagged inputs, and integrations with Google Sheets or APIs.

Prompt 16:

Generate a GPT prompt that builds an automated idea-to-publish workflow for newsletters. Ask for email type (curated, original, hybrid), tool used (Substack, Beehiiv), and tone. GPT should return prompt-based idea generation, content writing flow, subject line generator, and scheduling automation using Zapier or native tools.

Prompt 17:

Design a GPT prompt that helps influencers auto-generate captions from images. Ask for platform, image description, and brand vibe. GPT should return 3–5 caption variations per image — including hooks, relatable tags, and CTAs — and batch export option for scheduling.

Prompt 18:

Write a GPT prompt to help automate feedback collection from customers. Ask for product/service type, delivery method, and goal (testimonials, reviews, improvements). GPT should return email templates, form prompts (Tally, Typeform), GPT summarization scripts, and storage solutions (Google Sheets, Notion).

Prompt 19:

Create a GPT prompt that builds a daily automation checklist. Ask for tasks, work hours, and platforms used. GPT should return a checklist with priority tags, time blocks, automation tool suggestions, and reminders — with conditional logic based on platform performance.

Prompt 20:

Write a GPT prompt to automate digital product delivery. Ask for platform (Gumroad, Payhip, Etsy), product type, and buyer follow-up goals. GPT should return setup for instant file delivery, post-purchase email series, GPT-generated thank you messages, and upsell options using automation tools.

Category 21: YouTube Content Strategy

Prompt 1:

Write a GPT prompt that helps YouTubers generate a 30-day content calendar based on their niche, audience intent, and current subscriber level. GPT should return video ideas grouped by theme (value, engagement, growth), optimal upload days, SEO-friendly titles, and thumbnail text suggestions. Include trending topic integration and batching strategy.

Prompt 2:

Create a GPT prompt that assists creators in scripting high-retention YouTube videos. Ask for topic, tone (educational, entertainment, authority), and target viewer. GPT should return a script structure with a pattern-interrupting hook, teaser, visual cue suggestions, 3-section content layout, and strong call-to-action with timestamps.

Prompt 3:

Design a GPT prompt that creates YouTube video ideas based on a competitor channel. Ask for channel link, top video titles, and target transformation. GPT should return 10 differentiated video ideas with fresh angles, title formats, and thumbnails that outperform or repurpose competitor themes.

Prompt 4:

Write a GPT prompt that helps creators plan their YouTube Shorts strategy. Ask for content niche, length preference, and posting frequency. GPT should return 15 ideas tailored for Shorts format: viral hooks, reaction concepts, faceless formats, repurposing long-form content into 60-second chunks with CTA overlays.

Prompt 5:

Create a GPT prompt that helps users build an authority-based YouTube channel from scratch. Ask for industry, target audience, and knowledge level. GPT should return branding elements, 10 cornerstone video topics, a publishing rhythm, monetization roadmap, and authority positioning strategy using personal story or case studies.

Prompt 6:

Generate a GPT prompt to write YouTube video descriptions that drive SEO and engagement. Ask for video topic, keywords, and CTA goals. GPT should return a 3-paragraph format: video summary, keyword-loaded value points, and calls to action including links, playlists, and affiliate promotions.

Prompt 7:

Write a GPT prompt that gives YouTubers a community-building strategy. Ask for niche, comment activity level, and interaction goals. GPT should return tactics like pinned comment frameworks, question-based CTAs, shoutout strategies, live Q&A formats, and community tab post prompts to grow loyal subscribers.

Prompt 8:

Design a GPT prompt to help creators repurpose long-form YouTube content across platforms. Ask for video topic, duration, and platform goals. GPT should return repurposed scripts for Instagram Reels, Twitter threads, blog posts, and email newsletters — all derived from one video.

Prompt 9:

Create a GPT prompt that outlines a faceless YouTube channel strategy. Ask for niche, monetization plan, and available tools. GPT should return content formats (slideshows, voiceovers, animations), scriptwriting prompts, AI voice tools (ElevenLabs), and content outsourcing options for scaling without appearing on camera.

Prompt 10:

Write a GPT prompt that creates YouTube playlist and funnel structure. Ask for product or content outcome, viewer awareness level, and playlist goal. GPT should return 3–5 playlist titles, ideal video order, viewer flow direction, and how to transition into email or offer.

Prompt 11:

Generate a GPT prompt that helps creators turn blog content into YouTube videos. Ask for blog URL, target audience, and video format (explainer, story, tutorial). GPT should return script conversion with visual suggestions, intro reframe, content pacing edits, and CTA insertion.

Prompt 12:

Create a GPT prompt that builds a monetization plan for YouTube. Ask for channel size, content type, and audience engagement. GPT should return income pillars: AdSense, affiliate promos, digital products, sponsorship pitch templates, and minimum requirements for monetizing each stream.

Prompt 13:

Design a GPT prompt that helps creators build a viral hook library. Ask for niche, video types, and audience pain points. GPT should return 25 video hook examples including question-based, shock value, curiosity-gap, and transformation formats — optimized for first 15 seconds.

Prompt 14:

Write a GPT prompt that builds a visual branding kit for YouTube. Ask for niche, brand personality, and audience age group. GPT should return suggestions for color palette, font pairings, thumbnail styles, on-screen overlays, and brand intro/outro elements for consistency.

Prompt 15:

Create a GPT prompt to help users build binge-worthy video sequences. Ask for goal (subscriber growth, authority, course funnel), and viewer stage. GPT should return a linear video arc across 5–7 episodes with emotional narrative building, cliffhangers, and series titling ideas.

Prompt 16:

Generate a GPT prompt that writes YouTube community tab polls. Ask for channel niche, engagement goal, and posting frequency. GPT should return 10 poll ideas designed to spark votes and comments, build emotional connection, and gather data for future video ideas.

Prompt 17:

Write a GPT prompt that creates launch video strategy for digital product creators. Ask for offer type, audience readiness, and timeline. GPT should return 3–5 video ideas with launch sequence: teaser, myth-buster, offer breakdown, testimonials, and urgency close.

Prompt 18:

Design a GPT prompt to help creators schedule a full content pipeline using YouTube Studio and Google Calendar. Ask for batch duration, team size, and tool preference. GPT should return task timelines, content handoff checkpoints, and optimization reminders for thumbnails and SEO.

Prompt 19:

Create a GPT prompt that builds an audience feedback loop using YouTube analytics. Ask for goals (CTR, retention, conversion) and past performance data. GPT should return KPI interpretation strategies, retention hack ideas, title/image test plans, and engagement funnel adjustments.

Prompt 20:

Write a GPT prompt that helps creators maintain consistency without burnout. Ask for upload target, content type, and working hours. GPT should return a video batching structure, editing shortcuts using AI (Pictory, Wisecut), scheduling templates, and viewer pacing options to avoid pressure.

Category 22: Personal Branding & Influence

Prompt 1:

Write a GPT prompt to help someone build a compelling personal brand story. Ask for background, defining struggles, turning points, and mission. GPT should return a structured brand narrative that highlights authenticity, values, transformation, and audience resonance. Include variations for an “About Me” page, Instagram bio, and speaking bio.

Prompt 2:

Create a GPT prompt that helps users discover their personal brand pillars. Ask for niche, passions, audience expectations, and long-term goals. GPT should return 3–5 core themes (e.g., creativity, leadership, vulnerability) with content ideas, tone of voice suggestions, and post types to reinforce those themes.

Prompt 3:

Design a GPT prompt that helps creators craft their signature brand voice. Ask for personality traits, communication style, and emotional tone. GPT should return do/don’t language rules, example sentences, caption tones, and a voice guide to use across content platforms.

Prompt 4:

Write a GPT prompt to help someone develop a visual identity for their personal brand. Ask for personality traits, industry, and color/emotion preferences. GPT should return palette ideas, font suggestions, logo style cues, and image guidelines for consistency on IG, LinkedIn, and websites.

Prompt 5:

Create a GPT prompt that builds a visibility strategy for personal brand growth. Ask for platform, niche, and collaboration goals. GPT should return a weekly plan that includes guest content, strategic comments, engagement rituals, email growth tactics, and brand-aligned collaborations.

Prompt 6:

Generate a GPT prompt that helps users create a personal branding content plan. Ask for niche, transformation goal, and time availability. GPT should return 4 content pillars, 10 post ideas per pillar, and scheduling templates tailored for consistency and growth.

Prompt 7:

Write a GPT prompt to help creators craft an elevator pitch that reflects their personal brand. Ask for niche, problem solved, and audience transformation. GPT should return a concise intro statement for bios, interviews, and networking — with variations for casual, expert, and authority tone.

Prompt 8:

Design a GPT prompt to develop a “Content Signature” for thought leaders. Ask for niche, style preference, and favorite creators. GPT should return formats like frameworks, recurring phrases, personal analogies, and a custom content cadence that distinguishes their posts from others.

Prompt 9:

Create a GPT prompt that helps coaches build a personal brand flywheel. Ask for core offer, values, and social proof available. GPT should return a loop of trust-building actions (free content → engagement → transformation story → testimonials → offer), optimized for longevity.

Prompt 10:

Write a GPT prompt to help someone audit their existing brand identity. Ask for social media handles, recent content, and audience engagement. GPT should return feedback on alignment, inconsistencies, tone mismatch, and opportunities for clearer storytelling across all channels.

Prompt 11:

Generate a GPT prompt that helps freelancers position themselves as go-to experts. Ask for service, differentiator, and audience type. GPT should return personal branding techniques like client result storytelling, niche memes, tutorial reels, and expert commentary frameworks.

Prompt 12:

Create a GPT prompt that builds a magnetic LinkedIn presence. Ask for professional background, industry, and career goals. GPT should return headline variations, summary section prompts, connection strategies, and weekly content prompts optimized for inbound visibility and authority.

Prompt 13:

Design a GPT prompt that builds a “face-less” personal brand. Ask for niche, preferred format (voice, writing, animation), and privacy limits. GPT should return strategies to build trust, emotional resonance, and credibility without showing your face — using writing style, audio, and storytelling.

Prompt 14:

Write a GPT prompt that helps creators develop a consistent brand across multiple platforms. Ask for platform list, audience behavior, and time availability. GPT should return post formatting rules, copy structure adjustments, and repurposing strategies to keep brand voice intact.

Prompt 15:

Create a GPT prompt that helps someone transition from casual creator to personal brand entrepreneur. Ask for current following, offer idea, and fears. GPT should return brand evolution plan, income pillar planning, and personal positioning strategy with daily mindset and marketing actions.

Prompt 16:

Generate a GPT prompt to build a trust-first content strategy. Ask for niche, audience skepticism, and personal story. GPT should return post formats like behind-the-scenes, struggles, value-first tips, and testimonial storytelling — all framed to build reputation over time.

Prompt 17:

Write a GPT prompt that creates a brand values manifesto. Ask for user's ethics, impact vision, and leadership style. GPT should return a personal branding statement with guiding principles, story references, and brand boundaries for ethical alignment.

Prompt 18:

Design a GPT prompt to craft a high-converting Instagram bio. Ask for niche, CTA goal (lead gen, traffic, sales), and personal tone. GPT should return 3 options — one minimal, one authority-focused, and one casual. Include emoji formatting and link-in-bio callouts.

Prompt 19:

Create a GPT prompt that helps users build thought leadership on Twitter/X. Ask for topic area, follower count, and content tone. GPT should return a content system with idea sourcing prompts, tweet frameworks, personal insight structures, and visual prompts using threads or carousels.

Prompt 20:

Write a GPT prompt to create a year-long brand roadmap. Ask for main goal (audience, sales, credibility), ideal collaborations, and launch plan. GPT should return quarterly action plans, audience growth rituals, content focus areas, and PR pitch strategy.

Category 23: Digital Product Marketing

Prompt 1:

Write a GPT prompt to create a launch strategy for a new digital product. Ask for product type (eBook, course, Notion template), audience level, and price. GPT should return a launch runway plan, teaser content structure, waitlist email funnel, scarcity tactic, and post-launch nurturing plan.

Prompt 2:

Create a GPT prompt that writes a sales page for a digital product. Ask for the transformation promised, features, and audience pain points. GPT should return a 6-section sales page including hero header, pain-agitate-solution narrative, feature-benefit bullets, testimonials, and CTA copy variants.

Prompt 3:

Design a GPT prompt to generate an email sales sequence for a digital product. Ask for offer details, launch duration, and brand voice. GPT should return a 5-email sequence with angles like teaser, problem story, transformation promise, FAQ, and urgency close — optimized for conversion.

Prompt 4:

Write a GPT prompt that builds a viral lead magnet funnel. Ask for audience type, platform used, and product theme. GPT should return lead magnet ideas (e.g., checklist, mini-course), opt-in copy, email follow-up ideas, and tips to position the freebie to sell the main product.

Prompt 5:

Create a GPT prompt to help creators build product awareness before launch. Ask for audience familiarity, content formats, and niche. GPT should return a pre-launch content calendar with authority-building posts, social proof ideas, curiosity hooks, and soft mentions leading to open cart.

Prompt 6:

Generate a GPT prompt that writes Instagram carousels to promote digital products. Ask for product type, target struggle, and content tone. GPT should return 5 carousel post scripts: educational, testimonial, behind-the-scenes, FAQ-based, and offer reveal.

Prompt 7:

Write a GPT prompt to help sellers differentiate their digital product in a saturated niche. Ask for niche, audience fears, and main promise. GPT should return 3 unique positioning angles, value stacking methods, and ways to build authority even with a small audience.

Prompt 8:

Design a GPT prompt that helps users upsell a second product after checkout. Ask for main product type, price, and next transformation. GPT should return a mini-product pitch, checkout add-on copy, urgency framing, and email follow-up content for the upsell.

Prompt 9:

Create a GPT prompt that generates SEO blog content to promote a digital product. Ask for product topic, keywords, and ideal buyer. GPT should return 3 blog outlines using storytelling, value-delivery, and product placement. Include CTA placements and link funneling strategy.

Prompt 10:

Write a GPT prompt that builds affiliate marketing scripts for others to promote a digital product. Ask for niche, affiliate commission, and product promise. GPT should return email scripts, DMs, and post captions affiliates can use to promote authentically with swipeable copy.

Prompt 11:

Generate a GPT prompt that helps build a digital product's "reason to exist." Ask for product details, pain it solves, and current alternatives. GPT should return a unique problem reframing, category creation language, and branding story that positions it as a must-have.

Prompt 12:

Create a GPT prompt to help sellers turn customer DMs into product marketing content. Ask for screenshots or summaries of feedback. GPT should return caption ideas, carousel headlines, launch email subject lines, and testimonial mini-stories that reflect buyer transformation.

Prompt 13:

Design a GPT prompt that generates a digital product trailer script. Ask for product benefits, key takeaways, and emotion to trigger. GPT should return a 60-second script formatted for Instagram Reels or TikTok — including hook, promise, demo moment, and CTA.

Prompt 14:

Write a GPT prompt to create a launch countdown campaign. Ask for platform, offer, and urgency level. GPT should return 7 days of content ideas: scarcity reminder posts, FAQ reels, benefits breakdown, and success story highlights for each countdown day.

Prompt 15:

Create a GPT prompt that helps users create product comparison content. Ask for product category, audience hesitation, and competitors. GPT should return honest pros/cons, value stack comparisons, myth-busting copy, and visuals scripts to position the product as the ideal solution.

Prompt 16:

Generate a GPT prompt to build a DM sales script for digital offers. Ask for product type, common objections, and target buyer persona. GPT should return a friendly, value-first DM framework including qualifiers, micro-stories, proof injection, and a non-pushy CTA.

Prompt 17:

Write a GPT prompt that builds an evergreen promotion engine for digital products. Ask for sales goal, content platforms, and email list size. GPT should return automated email loops, retargeting strategies, rotating bonus incentives, and social media rhythm for long-term revenue.

Prompt 18:

Design a GPT prompt to create customer transformation story posts. Ask for testimonials or common results. GPT should return post outlines: before/after, lessons learned, emotional journey, and relatable storytelling — formatted for carousels, captions, or Reels voiceover.

Prompt 19:

Create a GPT prompt that helps creators add urgency without using fake scarcity. Ask for buyer behavior, product format, and ethical brand values. GPT should return genuine urgency tactics like bonus expiration, tiered pricing, transformation countdowns, or live cohort framing.

Prompt 20:

Write a GPT prompt that builds a digital product review system. Ask for platform (Gumroad, Payhip, Podia), user behavior, and testimonial goals. GPT should return review request email copy, in-product CTA scripts, auto-collect strategies, and storytelling prompts to guide customer responses.

Category 24: AI Art & Design Tools

Prompt 1:

Write a GPT prompt that helps users generate high-quality AI art using MidJourney or DALL·E. Ask for subject, style, mood, and use case (print, web, merchandise). GPT should return an optimized art prompt with keywords for composition, lighting, detail level, and artistic influence, along with image enhancement suggestions.

Prompt 2:

Create a GPT prompt to assist digital creators in turning rough sketches into AI-refined art. Ask for theme, sketch type, and refinement goal (vector art, shading, coloring). GPT should return step-by-step guidance using tools like Adobe Firefly or Runway, plus prompt variations to match visual intent.

Prompt 3:

Design a GPT prompt that generates an AI art project brief. Ask for client goal, output format (poster, avatar, wallpaper), and emotional tone. GPT should return a complete creative brief with concept narrative, color theme, inspiration references, and prompt structure for AI generation.

Prompt 4:

Write a GPT prompt to build a viral AI t-shirt design collection. Ask for niche (gaming, travel, quotes), style (cartoon, vaporwave, retro), and printing platform. GPT should return 10 design prompt ideas with phrase suggestions, layout inspiration, and recommended AI tools.

Prompt 5:

Create a GPT prompt that helps users build an AI art Instagram theme grid. Ask for color palette, tone (minimalist, fantasy, sci-fi), and niche. GPT should return 9 post ideas with prompt input, text overlays, style consistency tips, and posting order for grid harmony.

Prompt 6:

Generate a GPT prompt that writes product descriptions for AI-generated art prints. Ask for image theme, emotion conveyed, and print format (canvas, poster, NFT). GPT should return a 3-paragraph description with sensory language, buyer appeal, and SEO keywords for marketplaces like Etsy or Gumroad.

Prompt 7:

Write a GPT prompt that builds a MidJourney prompt for coloring book illustrations. Ask for subject (animals, vehicles, fantasy), detail level, and age group. GPT should return optimized black-and-white line art instructions with parameters for clean outlines and clear shapes.

Prompt 8:

Design a GPT prompt that helps artists create an AI-based visual brand identity. Ask for brand keywords, personality, and visual tone. GPT should return logo style prompts, pattern inspiration, and brand asset ideas (icons, headers, post templates) using AI tools like Looka or Canva AI.

Prompt 9:

Create a GPT prompt to generate print-on-demand wall art collections using AI. Ask for niche (boho, abstract, nature), print size, and target decor audience. GPT should return themed prompt ideas, title suggestions, color schemes, and display mockup generation tips using AI.

Prompt 10:

Write a GPT prompt to create AI avatar packs. Ask for platform (Twitch, LinkedIn, WhatsApp), vibe (professional, cute, edgy), and usage goal. GPT should return structured prompt instructions for consistent avatar generation across sets using AI portrait tools.

Prompt 11:

Generate a GPT prompt that helps with album cover creation using AI. Ask for music genre, artist tone, and emotional message. GPT should return prompt formats, visual metaphor ideas, color filters, and font recommendations for cohesive branding.

Prompt 12:

Create a GPT prompt to build YouTube thumbnail backgrounds using AI. Ask for content niche, title vibe (explosive, emotional, curiosity), and design elements. GPT should return art prompt formats that match engagement psychology and guide tool settings (zoom, contrast, character focus).

Prompt 13:

Design a GPT prompt to convert real photos into stylized AI art. Ask for photo subject, style (cyberpunk, oil painting, anime), and enhancement goal. GPT should return editing tool suggestions (Remini, ArtBreeder), stylization prompt wording, and format outputs for print or web.

Prompt 14:

Write a GPT prompt for creating an AI-designed digital sticker pack. Ask for niche, mood (funny, motivational, dark), and platform (Telegram, WhatsApp, Etsy). GPT should return design concepts, sticker phrases, file format specs, and art prompts for batch generation.

Prompt 15:

Create a GPT prompt to generate minimalist icon sets with AI. Ask for topic (apps, emotions, weather), style (outline, filled, glyph), and export format. GPT should return prompt formatting, export suggestions (SVG, PNG), and platform workflows (Iconify, Canva AI, Figma).

Prompt 16:

Generate a GPT prompt to help educators make AI flashcard art for kids. Ask for subject (math, science, language), age range, and visual tone. GPT should return character prompt themes, educational cues, and consistent card layout instructions for AI generation.

Prompt 17:

Write a GPT prompt to create an AI portfolio mockup. Ask for designer goal (freelancer, agency pitch, print sale), art formats, and mood. GPT should return portfolio section prompts, layout advice, and generation tips for polished visual showcase using AI and Canva.

Prompt 18:

Design a GPT prompt that helps tattoo artists co-create with AI. Ask for tattoo style (tribal, realism, traditional), theme, and placement. GPT should return AI prompt ideas for stencil-ready output, high-contrast designs, and shading adaptability.

Prompt 19:

Create a GPT prompt for AI sticker sheet design targeting Gen Z. Ask for pop culture reference, color vibe, and keyword themes. GPT should return prompt instructions with emoji elements, stylized quotes, facial expressions, and layout grid ideas for packaging.

Prompt 20:

Write a GPT prompt to generate comic book panel illustrations. Ask for story setting, character design, and genre. GPT should return prompt layout per panel (dialogue, pose, scene mood), styling notes (inks, shadows), and image sequence planning for storytelling.

Category 25: SaaS & AI Product Marketing Category

Prompt 1:

Write a GPT prompt to generate a go-to-market strategy for a new SaaS or AI product. Ask for product function, target industry, and user persona. GPT should return brand positioning, lead gen methods, content roadmap, beta launch sequence, and feedback loop structure for product improvement.

Prompt 2:

Create a GPT prompt that builds an onboarding email series for a SaaS tool. Ask for tool purpose, user stage, and conversion goal. GPT should return a 5-step email flow guiding users from signup to "aha moment" — with tool tips, feature education, and upgrade nudges.

Prompt 3:

Design a GPT prompt that creates a SaaS landing page focused on conversions. Ask for product name, features, and core benefits. GPT should return headline variations, social proof blocks, hero call-to-action, FAQ entries, and benefit-driven microcopy for signup or demo CTA buttons.

Prompt 4:

Write a GPT prompt to generate SaaS feature announcement content. Ask for feature name, user benefit, and channel (email, Twitter, blog). GPT should return launch post templates, product update copy, and walkthrough language optimized for excitement and adoption.

Prompt 5:

Create a GPT prompt to develop LinkedIn content strategy for an AI product. Ask for audience type, product positioning, and thought leadership goal. GPT should return post types like demo walkthroughs, behind-the-scenes AI logic, user use cases, and customer results storytelling.

Prompt 6:

Generate a GPT prompt that creates competitor comparison pages. Ask for competing SaaS names, differentiators, and buyer objections. GPT should return comparison charts, unique value positioning, SEO title formats, and trust triggers (testimonials, guarantees, onboarding flow differences).

Prompt 7:

Write a GPT prompt to build AI tool demo scripts. Ask for user problem, core use case, and platform (YouTube, sales call, in-app). GPT should return 60-second and 3-minute script versions showing transformation, interface tour, and prompt examples for wow-effect.

Prompt 8:

Design a GPT prompt that writes a sales pitch for SaaS founders. Ask for product, funding stage, and target investor/buyer. GPT should return a pitch deck outline, elevator pitch, one-liner, and feature monetization plan tailored to startup positioning.

Prompt 9:

Create a GPT prompt to generate pricing plan copy for SaaS or AI platforms. Ask for user segments, value tiers, and upgrade CTA tone. GPT should return 3-tier structure copy (Free, Pro, Team), benefit framing, and FAQ objections for pricing pages.

Prompt 10:

Write a GPT prompt to build an affiliate marketing program for an AI tool. Ask for tool niche, payout percentage, and marketing goals. GPT should return program landing page copy, onboarding email, affiliate rules, and swipe copy for Twitter/LinkedIn.

Prompt 11:

Generate a GPT prompt to help SaaS creators optimize their free trial funnel. Ask for product duration, trial type, and

upsell strategy. GPT should return nurture email ideas, friction reduction steps, demo call timing, and upgrade nudges using behavioral triggers.

Prompt 12:

Create a GPT prompt for user feedback collection strategy. Ask for product version, user type, and analytics tools. GPT should return question frameworks, micro-survey scripts, in-app prompt examples, and interview outreach emails for SaaS improvement cycles.

Prompt 13:

Design a GPT prompt that generates product-led growth content. Ask for product name, feature set, and content formats. GPT should return blog/video ideas, demo-linked CTAs, embedded signup workflows, and user milestone highlights in real-time education flow.

Prompt 14:

Write a GPT prompt to create SaaS product roadmap update announcements. Ask for new features, release timeline, and user group. GPT should return engaging product roadmap visuals, blog/email/post copy, and ways to hype future functionality using user quotes.

Prompt 15:

Create a GPT prompt to write personalized onboarding sequences based on user type. Ask for user role (developer, marketer, creator), product features used, and activation goal. GPT should return customized email templates, in-app message flows, and milestone nudges.

Prompt 16:

Generate a GPT prompt that helps with AI-powered SaaS SEO planning. Ask for product niche, user pain points, and main feature keywords. GPT should return content cluster ideas, blog outlines, meta descriptions, and product page optimization angles.

Prompt 17:

Write a GPT prompt for generating case studies for SaaS or AI tools. Ask for client background, feature used, and results achieved. GPT should return headline templates, intro story structure, metrics summary, quote blocks, and CTA plug-in.

Prompt 18:

Design a GPT prompt to write upgrade CTAs for freemium SaaS tools. Ask for limitation, benefit unlocked, and timing. GPT should return micro-copy variants for upgrade nudges, embedded banners, exit modals, and email PS upgrade tags.

Prompt 19:

Create a GPT prompt to generate refund/objection handling copy for SaaS platforms. Ask for cancellation reason types and refund policies. GPT should return empathetic reply templates, alternative offers, pause-plan upsells, and user offboarding survey prompts.

Prompt 20:

Write a GPT prompt to build in-app messaging flows using Intercom or Crisp. Ask for user behavior signals, feature goals, and tone. GPT should return automated conversation starter flows, success nudges, feature reminders, and personalized engagement boosters.

Category 26: Online Course Creation & Sales

Prompt 1:

Write a GPT prompt that helps course creators plan their online course structure. Ask for course topic, target transformation, and skill level. GPT should return a detailed module breakdown, lesson flow, learning objectives, and engagement activities designed for high completion and impact.

Prompt 2:

Create a GPT prompt that builds a high-converting sales page for an online course. Ask for course promise, audience pain points, and bonuses. GPT should return a persuasive sales copy structure: hook headline, credibility builder, value stack, testimonial layout, and CTA optimization.

Prompt 3:

Design a GPT prompt to generate a 7-day pre-launch content campaign. Ask for course niche, audience awareness level, and platform. GPT should return 7 daily post ideas that combine education, emotional storytelling, FAQ busting, teaser visuals, and urgency-driven CTAs.

Prompt 4:

Write a GPT prompt to generate an engaging email funnel for selling a course. Ask for course title, price point, and objections. GPT should return a 5-email sequence: teaser, story, value delivery, FAQ with proof, and last-call email with urgency incentive.

Prompt 5:

Create a GPT prompt to help creators define their course USP. Ask for niche, competitors, and audience gap. GPT should return unique positioning angles, curriculum differentiators, and social proof ideas that separate the course from similar offers in the market.

Prompt 6:

Generate a GPT prompt that writes YouTube video scripts to promote an online course. Ask for course theme, video type (teaser, tutorial, case study), and target CTA. GPT should return 3 video script frameworks with hook, content flow, transformation story, and CTA plug.

Prompt 7:

Write a GPT prompt to generate a course launch checklist. Ask for launch date, course format, and delivery method. GPT should return a full checklist covering tech setup, content readiness, sales materials, email sequences, social proof, and launch-day action plan.

Prompt 8:

Design a GPT prompt that helps you turn a webinar into a full course. Ask for webinar topic, audience level, and learning outcome. GPT should return expanded lesson structure, module outline, pacing recommendations, interactive activity ideas, and repurposed assets like slides and transcripts.

Prompt 9:

Create a GPT prompt that writes upsell copy for a coaching offer after course purchase. Ask for transformation gap, coaching format, and price point. GPT should return email and in-course upsell scripts that highlight added value, real-time access, and personal guidance benefits.

Prompt 10:

Write a GPT prompt to develop a course pricing strategy. Ask for niche, content depth, and audience size. GPT should return tiered pricing models, limited-time bonuses, lifetime access structure, and perceived value strategies to justify premium positioning.

Prompt 11:

Generate a GPT prompt that creates a mini-course funnel to promote a full course. Ask for preview topic, audience

resistance, and course transformation. GPT should return a free mini-course layout, opt-in incentive copy, lesson strategy, and funnel transitions to paid product.

Prompt 12:

Create a GPT prompt to generate testimonial collection scripts. Ask for student result types and preferred medium (text, video, screenshot). GPT should return prompt templates to get emotional, specific, and metric-based testimonials, plus ideas to use them in marketing.

Prompt 13:

Design a GPT prompt to create a student success roadmap. Ask for course duration, module count, and transformation goal. GPT should return a step-by-step visual roadmap layout that students can follow, use in marketing, and feel motivated to complete.

Prompt 14:

Write a GPT prompt that develops social proof content from student feedback. Ask for DMs, reviews, or voice notes. GPT should return quote templates, image overlay ideas, short-form video scripts, and highlight-style captions for Instagram, Twitter, or landing pages.

Prompt 15:

Create a GPT prompt to help instructors build lesson engagement prompts. Ask for topic type (tutorial, mindset, challenge), and student level. GPT should return open-ended reflection prompts, group discussion triggers, gamified task ideas, and habit-formation nudges.

Prompt 16:

Generate a GPT prompt that writes a compelling “Welcome to the Course” email. Ask for course tone, tech steps, and community format. GPT should return an onboarding email with login instructions, emotional encouragement, what’s next layout, and bonus unlock teaser.

Prompt 17:

Write a GPT prompt to build course lesson scripts from blog content. Ask for blog topic, audience format, and course tone. GPT should return content repackaging instructions, visual aid ideas, lesson transitions, and activity suggestions to transform text into multimedia learning.

Prompt 18:

Design a GPT prompt to help creators craft their course trailer. Ask for transformation promise, platform (Gumroad, Teachable, Kajabi), and video tone. GPT should return a 1–2 minute video script with pain-agitate-solution flow, visual directions, and social proof moments.

Prompt 19:

Create a GPT prompt to generate a Facebook group content plan for course communities. Ask for course length, group size, and engagement goal. GPT should return weekly content ideas: wins thread, Q&A post, challenge task, and milestone celebration script.

Prompt 20:

Write a GPT prompt to help transition a cohort course into an evergreen version. Ask for course format, support style, and sales goal. GPT should return tech automation plan, live-to-recorded lesson edits, evergreen funnel setup, and self-paced student success guide.

 **Category 27: Personal Finance & Wealth Building**

Prompt 1:

Write a GPT prompt to help individuals create a monthly budget plan. Ask for income sources, fixed and variable expenses, and financial goals. GPT should return a detailed budget breakdown with category limits, savings percentage targets, and visual suggestions for tracking progress using apps or spreadsheets.

Prompt 2:

Create a GPT prompt that generates a personal debt repayment strategy. Ask for total debts, interest rates, minimum payments, and desired timeline. GPT should return a snowball or avalanche repayment plan, monthly milestone targets, motivation tracking ideas, and optional consolidation strategies.

Prompt 3:

Design a GPT prompt that builds a step-by-step emergency fund savings plan. Ask for monthly income, living expenses, and target savings duration. GPT should return realistic monthly savings goals, expense reduction tips, automation advice, and motivational checkpoints to hit emergency fund milestones.

Prompt 4:

Write a GPT prompt to help someone craft a wealth-building roadmap. Ask for age, income level, financial goals, and risk tolerance. GPT should return 5–10 year action plans including savings targets, passive income sources, long-term investments, and mindset shifts for sustainable financial growth.

Prompt 5:

Create a GPT prompt that explains the basics of investing for beginners. Ask for user's financial background, investment goal, and timeframe. GPT should return a breakdown of asset classes, diversification strategies, investment apps/platforms, and a beginner-friendly step-by-step plan to get started.

Prompt 6:

Generate a GPT prompt that helps freelancers manage inconsistent income. Ask for average income range, fixed expenses, and current savings. GPT should return a flexible budget system, buffer planning, invoice reminders, tax-saving tips, and strategies to smooth out income volatility.

Prompt 7:

Write a GPT prompt to build a side hustle income plan. Ask for time availability, skills, risk appetite, and income goal. GPT should return niche-specific side hustle options, monetization ideas, market entry steps, and monthly revenue targets with reinvestment suggestions.

Prompt 8:

Design a GPT prompt that helps users plan for early retirement. Ask for current savings, age, expenses, and lifestyle goals. GPT should return a FIRE (Financial Independence, Retire Early) model, investment strategies, expense reduction targets, and annual net worth tracking ideas.

Prompt 9:

Create a GPT prompt that builds a passive income stream list based on interests. Ask for hobbies, digital skills, and available time. GPT should return 5–7 income ideas with action steps, upfront time/money investment needed, and platforms to get started.

Prompt 10:

Write a GPT prompt to help someone build their credit score. Ask for current score, open accounts, and payment history. GPT should return practical tips like debt utilization management, timely payments, secured card usage, credit mix improvement, and dispute resolution steps.

Prompt 11:

Generate a GPT prompt that compares buying vs. renting for someone considering a home. Ask for location, lifestyle, income stability, and down payment availability. GPT should return personalized pros/cons, break-even analysis, mortgage vs. rent comparison, and tax implications of both options.

Prompt 12:

Create a GPT prompt to help someone build generational wealth. Ask for family structure, current net worth, and long-term vision. GPT should return estate planning tips, insurance strategies, multi-stream income guidance, and investment principles for passing wealth responsibly.

Prompt 13:

Design a GPT prompt that builds a smart spending plan using the 50/30/20 rule. Ask for monthly income, must-have expenses, and savings goal. GPT should return category allocation, tools for automation, tips for reducing wants, and saving acceleration ideas.

Prompt 14:

Write a GPT prompt to help someone prepare for financial emergencies. Ask for income sources, dependents, and medical/insurance status. GPT should return backup plans, insurance audits, essential expense coverage strategy, and financial decision-making rules during crises.

Prompt 15:

Create a GPT prompt to explain the concept of compound interest in a simple, visual way. Ask for savings rate, interest percentage, and time horizon. GPT should return charts, analogies, timeline examples, and emotional framing to inspire consistent investing.

Prompt 16:

Generate a GPT prompt that helps people automate their finances. Ask for bank setup, salary structure, and financial goals. GPT should return automation flows for savings, bill payments, investments, and expense alerts using tools like YNAB, Zapier, or bank rules.

Prompt 17:

Write a GPT prompt that helps individuals review their finances quarterly. Ask for income, expenses, savings, and recent financial decisions. GPT should return a 5-question review system, net worth tracker, spending audit guide, and action items for the next 90 days.

Prompt 18:

Design a GPT prompt that builds a financial freedom tracker. Ask for passive income goal, current cash flow, and expense level. GPT should return milestone planning templates, percentage-to-freedom progress meters, and visualization ideas to keep motivation high over time.

Prompt 19:

Create a GPT prompt that helps creators price their digital products for profit. Ask for product type, cost to create, and market value. GPT should return a pricing ladder strategy, margin calculator, and bundle/discount structures to hit income targets without devaluing.

Prompt 20:

Write a GPT prompt to prepare someone for their first meeting with a financial advisor. Ask for financial goals, asset list, and risk level. GPT should return prep questions, necessary documents checklist, conversation script, and red flag tips to spot bad advice.

Category 28: Mental Health & Mindfulness

Prompt 1:

Write a GPT prompt that helps users design a daily mental wellness routine. Ask for preferred time of day, stress triggers, and relaxation style. GPT should return a customizable checklist with morning, mid-day, and evening activities for mindfulness, emotional grounding, gratitude, and sleep support.

Prompt 2:

Create a GPT prompt that generates personalized affirmations. Ask for current mental struggles, goals, and tone preference (gentle, motivational, spiritual). GPT should return 10 customized affirmations with variations for morning, mid-day, and bedtime — all rooted in positive psychology and self-compassion.

Prompt 3:

Design a GPT prompt to build a 7-day mental detox plan. Ask for emotional state, typical screen time, and support system. GPT should return daily practices like digital fasting, nature exposure, journaling, breathwork, creative expression, and check-ins — with themes for each day.

Prompt 4:

Write a GPT prompt that helps individuals identify and reframe negative thought patterns. Ask for recurring thoughts, situations triggering them, and desired emotional outcome. GPT should return examples of cognitive distortions, reframed beliefs, and self-coaching prompts to challenge limiting thoughts.

Prompt 5:

Create a GPT prompt that guides a self-compassion journaling session. Ask for recent emotional experiences and inner critic language. GPT should return a 3-part journal script: acknowledgment, self-soothing, and future kindness. Include reflection cues and emotional regulation breathing reminders.

Prompt 6:

Generate a GPT prompt that builds a custom meditation plan. Ask for user's meditation experience, attention span, and mental health goal (focus, anxiety, sleep). GPT should return meditation types, timing, scripts, and app/tool suggestions tailored to that profile.

Prompt 7:

Write a GPT prompt that helps users manage social anxiety. Ask for social triggers, past experiences, and communication goals. GPT should return thought reframes, pre-event mindset shifts, micro-challenges to build confidence, and grounding exercises before and after interactions.

Prompt 8:

Design a GPT prompt to create a "mental reset" ritual after burnout. Ask for burnout symptoms, work style, and support level. GPT should return a 3-day reset plan with rest strategies, reflection prompts, physical renewal practices, and mindset recalibration.

Prompt 9:

Create a GPT prompt that writes visualizations for emotional regulation. Ask for dominant emotion, situation causing it, and tone desired (calm, empowered, resilient). GPT should return a guided imagery script to release tension and shift perspective — suitable for audio or silent reading.

Prompt 10:

Write a GPT prompt that helps someone build boundaries for mental peace. Ask for common triggers, people involved, and desired level of assertiveness. GPT should return boundary scripts, gentle phrasing templates, and follow-up actions with clarity and kindness.

Prompt 11:

Generate a GPT prompt to create a "bad day" rescue plan. Ask for user's coping style, environment, and mental health

goal. GPT should return a short ritual including movement, emotional processing, safe distractions, and reflection to support self-regulation.

Prompt 12:

Create a GPT prompt that writes a grief support letter. Ask for relationship to the person, memories, and what needs closure. GPT should return a compassionate, validating letter that honors the loss and helps the writer gently release unspoken emotions.

Prompt 13:

Design a GPT prompt to help individuals manage overwhelm. Ask for tasks, mental noise, and urgency levels. GPT should return a brain dump guide, decision filter framework, energy-based prioritization method, and calming prompts to restore mental clarity.

Prompt 14:

Write a GPT prompt to build a weekly self-check-in habit. Ask for user's mood tracking goal, journal style, and support level. GPT should return a template with 5 core questions, emoji/mood scales, reflection space, and intention setting — printable or digital.

Prompt 15:

Create a GPT prompt that helps someone write a "letter to their future self." Ask for timeframe, current challenges, and emotional tone. GPT should return a heartfelt template that reinforces growth, hope, and resilience — suitable for sealing, saving, or rereading later.

Prompt 16:

Generate a GPT prompt that builds a mindful morning routine. Ask for wake-up time, tech preference, and focus area (stillness, energy, productivity). GPT should return a 3-step morning flow: awareness, alignment, and action — designed for calm yet intentional beginnings.

Prompt 17:

Write a GPT prompt that guides someone in expressing anger in a healthy way. Ask for the root cause, emotional intensity, and social context. GPT should return expression ideas (art, voice, writing), safety guidelines, and post-release reflection scripts.

Prompt 18:

Design a GPT prompt that helps identify mental health patterns across time. Ask for journal history, emotional trends, and symptom duration. GPT should return pattern detection summaries, possible triggers, and self-awareness insights for therapy or personal understanding.

Prompt 19:

Create a GPT prompt that writes a grounding script during anxiety spikes. Ask for physical symptoms, location, and tone needed. GPT should return a short script with breath prompts, sensory anchoring, and thought defusion — calming and self-validating.

Prompt 20:

Write a GPT prompt to design a personalized "mental sanctuary" space at home. Ask for available room, sensory preferences, and stress triggers. GPT should return décor tips, sensory element ideas (lighting, scent, sound), activity suggestions, and mindset framing for using the space.

Category 29: Copywriting & Persuasion

Prompt 1:

Write a GPT prompt that generates persuasive headlines for digital products. Ask for product type, target audience, and key benefit. GPT should return 10 headline variations using techniques like curiosity gaps, social proof, urgency, and clear transformation framing tailored to conversions.

Prompt 2:

Create a GPT prompt that builds an irresistible lead magnet offer. Ask for niche, audience struggle, and promise. GPT should return a one-liner offer statement, bullet-point benefits, persuasive naming ideas, and a signup form script with urgency and value stacking.

Prompt 3:

Design a GPT prompt to help write powerful hooks for reels or short-form content. Ask for topic, emotional tone, and call-to-action style. GPT should return 5 scroll-stopping hooks, each written to invoke curiosity, tension, emotion, or surprise in under 12 words.

Prompt 4:

Write a GPT prompt that builds a full persuasive email campaign. Ask for product name, audience objections, and conversion goal. GPT should return a 5-part sequence with each email containing hook, pain amplification, solution narrative, social proof, and urgency CTA.

Prompt 5:

Create a GPT prompt to write sales copy for a low-ticket offer. Ask for product price, result promise, and common objections. GPT should return copy that emphasizes transformation over price, removes hesitation, and drives fast action with risk reversals and guarantees.

Prompt 6:

Generate a GPT prompt that transforms product features into emotional benefits. Ask for a list of features and ideal buyer persona. GPT should return rewritten benefit-focused copy that speaks to desires, avoids technical jargon, and ties each feature to a transformation.

Prompt 7:

Write a GPT prompt that helps brands use storytelling in sales copy. Ask for founder journey, product origin, and customer struggle. GPT should return a structured story using the hero's journey or PAS (Problem-Agitate-Solution) model that builds trust and inspires action.

Prompt 8:

Design a GPT prompt to write high-converting product descriptions for marketplaces like Gumroad or Etsy. Ask for product type, user goal, and tone. GPT should return a 3-paragraph structure: transformation, what's inside, and call-to-action with sensory language and results framing.

Prompt 9:

Create a GPT prompt to generate scarcity and urgency elements in sales copy. Ask for offer duration, stock limit, or bonus deadline. GPT should return 5 persuasive scarcity lines, countdown integrations, and urgency tags that don't feel manipulative but still drive action.

Prompt 10:

Write a GPT prompt that helps craft a landing page above-the-fold section. Ask for offer type, ideal outcome, and tone. GPT should return a powerful headline, 1-sentence subheadline, CTA button copy, and mini-benefit stack with value-oriented language.

Prompt 11:

Generate a GPT prompt to write persuasive CTA buttons. Ask for conversion goal, buyer mindset, and funnel stage. GPT

should return 10 button label ideas using action verbs, emotional drivers, and frictionless psychology (e.g., “Start Free,” “Yes, I Want This”).

Prompt 12:

Create a GPT prompt that builds an elevator pitch in 30 words or less. Ask for who the user helps, what problem they solve, and how. GPT should return a polished, pitch-style one-liner using clarity, contrast, and outcome-based language.

Prompt 13:

Design a GPT prompt that writes persuasive copy for free vs. paid product comparison. Ask for key differences, user hesitations, and upgrade incentives. GPT should return value stack language that encourages upgrading through logic, emotion, and transformation reinforcement.

Prompt 14:

Write a GPT prompt to build a social proof section from testimonials. Ask for 3 raw testimonials and product benefit. GPT should return rephrased proof with before-after style, credibility anchors, and mini-stories to build trust in a clean, skimmable layout.

Prompt 15:

Create a GPT prompt that helps write opt-in form copy. Ask for lead magnet goal, pain point, and tone. GPT should return attention-grabbing form headline, 1-liner subtext, placeholder text, and CTA button that feels personalized and high-value.

Prompt 16:

Generate a GPT prompt that crafts objection-handling sales copy. Ask for top 3 objections (e.g., price, time, results), and product promise. GPT should return mini-paragraph responses that use empathy, data, testimonials, and risk reversals to reduce friction.

Prompt 17:

Write a GPT prompt that creates urgency-based email subject lines. Ask for product, deal type, and buyer stage. GPT should return 10 subject line ideas using tactics like FOMO, countdowns, fear of loss, or last-chance phrasing to increase open rates.

Prompt 18:

Design a GPT prompt to write testimonial request scripts. Ask for user success context, product type, and tone. GPT should return 3 templates (text, email, survey) that feel warm, easy to respond to, and structured for high-quality feedback collection.

Prompt 19:

Create a GPT prompt to generate ad copy variations for A/B testing. Ask for product description, goal (clicks, conversions), and audience. GPT should return 3–5 different copy blocks with varied tones (curious, urgent, emotional, logical) and CTA options.

Prompt 20:

Write a GPT prompt that turns educational content into soft-sell copy. Ask for original content, related product, and action goal. GPT should return transition phrases, CTA angles, and sentence rewrites to softly shift from teaching to offering without breaking trust.

Category 30: Digital Marketing Strategy

Prompt 1:

Write a GPT prompt to generate a complete digital marketing strategy for a new brand. Ask for brand niche, audience persona, and budget level. GPT should return a tailored 90-day marketing roadmap with platform priorities, campaign ideas, content styles, ad budget split, and lead generation flows.

Prompt 2:

Create a GPT prompt to plan a content marketing funnel. Ask for product type, awareness level of the audience, and target CTA. GPT should return a content structure including TOFU (Top of Funnel), MOFU, BOFU topics, platform formats, and engagement-retargeting recommendations.

Prompt 3:

Design a GPT prompt to create a quarterly social media calendar. Ask for platforms, niche, and promotional cadence. GPT should return a 12-week calendar template with campaign themes, content types (reels, carousels, polls), call-to-actions, and content repurposing flows for scale.

Prompt 4:

Write a GPT prompt to help marketers create a multichannel brand presence. Ask for brand tone, target user behaviors, and available team bandwidth. GPT should return the most effective channel mix, cross-platform consistency tips, and platform-specific messaging tweaks for brand cohesion.

Prompt 5:

Create a GPT prompt that builds a paid ads strategy for product launches. Ask for ad budget, target platform (Meta, Google, TikTok), and customer avatar. GPT should return targeting layers, copy frameworks, creative styles, launch-day optimization tips, and budget pacing over 14–30 days.

Prompt 6:

Generate a GPT prompt to audit a brand's digital footprint. Ask for website URL, social profiles, and desired brand image. GPT should return a gap analysis for visuals, messaging, user experience, CTA clarity, and trust signals across all key platforms.

Prompt 7:

Write a GPT prompt that helps build a UGC (User Generated Content) strategy. Ask for product type, buyer demographic, and platform. GPT should return campaign themes, creator outreach messages, incentive structures, reposting workflows, and repurposing angles for reels and testimonials.

Prompt 8:

Design a GPT prompt to develop a lead magnet and email capture funnel. Ask for target pain point, lead magnet format (ebook, checklist, course), and backend offer. GPT should return opt-in form copy, follow-up email sequence, and conversion optimization elements.

Prompt 9:

Create a GPT prompt to write platform-specific CTAs. Ask for desired user action and platform (Instagram, YouTube, LinkedIn, Website). GPT should return tailored CTA lines that match platform tone, character limits, and encourage action without sounding forced.

Prompt 10:

Write a GPT prompt that creates a digital brand voice guide. Ask for audience type, tone (friendly, bold, professional), and industry. GPT should return writing guidelines, vocabulary do's and don'ts, emoji/styling choices, and content personality rules for team-wide consistency.

Prompt 11:

Generate a GPT prompt to help startups prioritize marketing channels. Ask for startup stage, traffic sources, and customer LTV. GPT should return a channel prioritization matrix with ROI potential, skill/resource demands, and tactical first steps for organic and paid methods.

Prompt 12:

Create a GPT prompt to build a performance tracking dashboard outline. Ask for platform mix and KPIs. GPT should return a suggested Notion or Google Sheet layout for tracking content engagement, lead gen metrics, ROAS, CPC, retention, and growth over time.

Prompt 13:

Design a GPT prompt to plan a 30-day digital product launch. Ask for product type, current audience size, and promo channels. GPT should return a countdown campaign calendar with teaser posts, email themes, content assets, launch day checklist, and post-launch nurturing.

Prompt 14:

Write a GPT prompt to create influencer outreach campaigns. Ask for niche, audience fit, and partnership style (affiliate, collab, sponsorship). GPT should return outreach DM/email templates, incentive structures, creator filters, and co-branded content angles to maximize visibility.

Prompt 15:

Create a GPT prompt to analyze customer journey stages. Ask for product type, discovery channel, and objection stage. GPT should return a journey map: awareness, consideration, decision, and loyalty — with content and ad ideas to support each.

Prompt 16:

Generate a GPT prompt to optimize website conversion strategy. Ask for URL, bounce rate, traffic source, and main CTA. GPT should return suggestions for layout changes, visual hierarchy, CTA design, speed improvement, trust boosters, and retargeting setup.

Prompt 17:

Write a GPT prompt that crafts an omnichannel campaign. Ask for campaign goal, platforms, and timing. GPT should return synced campaign structure with consistent visuals, theme slogans, content cadence, and links to a single core offer across all user touchpoints.

Prompt 18:

Design a GPT prompt to write email subject lines for cold and warm audiences. Ask for offer and audience familiarity level. GPT should return 10 subject line variations for each stage using personalization, curiosity, pain-point triggers, and preview text optimization.

Prompt 19:

Create a GPT prompt to generate weekly content briefs for your team. Ask for campaign goal, format type (blog, video, social), and CTA. GPT should return a briefing doc with target keyword, hook idea, structure outline, tone guidance, and repurpose angle.

Prompt 20:

Write a GPT prompt that helps plan a brand awareness campaign with no ad budget. Ask for niche, team size, and timeframe. GPT should return organic tactics like content stacking, podcast guesting, partnership outreach, and content community strategies for visibility.

Category 30: Digital Marketing Strategy

Prompt 1:

Write a GPT prompt to generate a complete digital marketing strategy for a new brand. Ask for brand niche, audience persona, and budget level. GPT should return a tailored 90-day marketing roadmap with platform priorities, campaign ideas, content styles, ad budget split, and lead generation flows.

Prompt 2:

Create a GPT prompt to plan a content marketing funnel. Ask for product type, awareness level of the audience, and target CTA. GPT should return a content structure including TOFU (Top of Funnel), MOFU, BOFU topics, platform formats, and engagement-retargeting recommendations.

Prompt 3:

Design a GPT prompt to create a quarterly social media calendar. Ask for platforms, niche, and promotional cadence. GPT should return a 12-week calendar template with campaign themes, content types (reels, carousels, polls), call-to-actions, and content repurposing flows for scale.

Prompt 4:

Write a GPT prompt to help marketers create a multichannel brand presence. Ask for brand tone, target user behaviors, and available team bandwidth. GPT should return the most effective channel mix, cross-platform consistency tips, and platform-specific messaging tweaks for brand cohesion.

Prompt 5:

Create a GPT prompt that builds a paid ads strategy for product launches. Ask for ad budget, target platform (Meta, Google, TikTok), and customer avatar. GPT should return targeting layers, copy frameworks, creative styles, launch-day optimization tips, and budget pacing over 14–30 days.

Prompt 6:

Generate a GPT prompt to audit a brand's digital footprint. Ask for website URL, social profiles, and desired brand image. GPT should return a gap analysis for visuals, messaging, user experience, CTA clarity, and trust signals across all key platforms.

Prompt 7:

Write a GPT prompt that helps build a UGC (User Generated Content) strategy. Ask for product type, buyer demographic, and platform. GPT should return campaign themes, creator outreach messages, incentive structures, reposting workflows, and repurposing angles for reels and testimonials.

Prompt 8:

Design a GPT prompt to develop a lead magnet and email capture funnel. Ask for target pain point, lead magnet format (ebook, checklist, course), and backend offer. GPT should return opt-in form copy, follow-up email sequence, and conversion optimization elements.

Prompt 9:

Create a GPT prompt to write platform-specific CTAs. Ask for desired user action and platform (Instagram, YouTube, LinkedIn, Website). GPT should return tailored CTA lines that match platform tone, character limits, and encourage action without sounding forced.

Prompt 10:

Write a GPT prompt that creates a digital brand voice guide. Ask for audience type, tone (friendly, bold, professional), and industry. GPT should return writing guidelines, vocabulary do's and don'ts, emoji/styling choices, and content personality rules for team-wide consistency.

Prompt 11:

Generate a GPT prompt to help startups prioritize marketing channels. Ask for startup stage, traffic sources, and customer LTV. GPT should return a channel prioritization matrix with ROI potential, skill/resource demands, and tactical first steps for organic and paid methods.

Prompt 12:

Create a GPT prompt to build a performance tracking dashboard outline. Ask for platform mix and KPIs. GPT should return a suggested Notion or Google Sheet layout for tracking content engagement, lead gen metrics, ROAS, CPC, retention, and growth over time.

Prompt 13:

Design a GPT prompt to plan a 30-day digital product launch. Ask for product type, current audience size, and promo channels. GPT should return a countdown campaign calendar with teaser posts, email themes, content assets, launch day checklist, and post-launch nurturing.

Prompt 14:

Write a GPT prompt to create influencer outreach campaigns. Ask for niche, audience fit, and partnership style (affiliate, collab, sponsorship). GPT should return outreach DM/email templates, incentive structures, creator filters, and co-branded content angles to maximize visibility.

Prompt 15:

Create a GPT prompt to analyze customer journey stages. Ask for product type, discovery channel, and objection stage. GPT should return a journey map: awareness, consideration, decision, and loyalty — with content and ad ideas to support each.

Prompt 16:

Generate a GPT prompt to optimize website conversion strategy. Ask for URL, bounce rate, traffic source, and main CTA. GPT should return suggestions for layout changes, visual hierarchy, CTA design, speed improvement, trust boosters, and retargeting setup.

Prompt 17:

Write a GPT prompt that crafts an omnichannel campaign. Ask for campaign goal, platforms, and timing. GPT should return synced campaign structure with consistent visuals, theme slogans, content cadence, and links to a single core offer across all user touchpoints.

Prompt 18:

Design a GPT prompt to write email subject lines for cold and warm audiences. Ask for offer and audience familiarity level. GPT should return 10 subject line variations for each stage using personalization, curiosity, pain-point triggers, and preview text optimization.

Prompt 19:

Create a GPT prompt to generate weekly content briefs for your team. Ask for campaign goal, format type (blog, video, social), and CTA. GPT should return a briefing doc with target keyword, hook idea, structure outline, tone guidance, and repurpose angle.

Prompt 20:

Write a GPT prompt that helps plan a brand awareness campaign with no ad budget. Ask for niche, team size, and timeframe. GPT should return organic tactics like content stacking, podcast guesting, partnership outreach, and content community strategies for visibility.

Category 31: Podcasting & Audio Content Strategy

Prompt 1:

Write a GPT prompt that generates a podcast launch plan for beginners. Ask for niche, audience size, and content style (interviews, solo, panel). GPT should return a checklist covering gear, hosting platforms, name ideas, intro/outro script, episode format, and first 5 topics.

Prompt 2:

Create a GPT prompt to brainstorm 10 podcast episode ideas. Ask for core theme, ideal listener struggle, and brand tone. GPT should return a list of topics with hooks, guest suggestions (if needed), and CTA options to drive community engagement or conversion.

Prompt 3:

Design a GPT prompt to write podcast episode scripts. Ask for episode topic, episode length, and tone (casual, expert, narrative). GPT should return a segment structure including intro, context, teaching/story section, key takeaways, and outro CTA script with timestamps.

Prompt 4:

Write a GPT prompt to create a repurposing plan for podcast content. Ask for platforms (Instagram, LinkedIn, blog), clip length, and CTA goal. GPT should return reels ideas, carousels from quotes, blog article outlines, and audiogram snippets with visual hooks.

Prompt 5:

Generate a GPT prompt to write show notes for a podcast episode. Ask for episode summary, guest details, and resources mentioned. GPT should return SEO-optimized show notes with timestamps, guest intro, 3 key highlights, links, and a soft CTA to subscribe.

Prompt 6:

Create a GPT prompt to write podcast intros and outros. Ask for brand vibe, podcast theme, and listener promise. GPT should return 2 intro and outro scripts with options for musical pacing, host welcome style, and plug-ins for sponsors or social links.

Prompt 7:

Design a GPT prompt to help with guest research for interviews. Ask for guest name, industry, and past content style. GPT should return a brief of 3 conversation angles, relevant past quotes, unique questions, and follow-up topics for deeper discussions.

Prompt 8:

Write a GPT prompt to plan a monetization strategy for a podcast. Ask for niche, listenership level, and growth stage. GPT should return monetization ideas like affiliate plugs, Patreon models, guest sponsorships, premium content tiers, or digital product funnels.

Prompt 9:

Generate a GPT prompt to script a solo podcast on a trending topic. Ask for topic title, target listener, and goal (inspire, inform, convert). GPT should return a 3-part script structure: open with hook, dive into depth with real-life context, and wrap with action tips.

Prompt 10:

Create a GPT prompt to build a podcast content calendar. Ask for weekly frequency, main content pillars, and launch date. GPT should return a 90-day calendar of themed episodes, platform integration ideas, and flexible slots for trends or guest appearances.

Prompt 11:

Design a GPT prompt to create podcast cover art ideas. Ask for podcast name, vibe, and niche. GPT should return visual descriptions, layout direction, color palette ideas, and font styles suitable for thumbnails across Spotify, Apple, and YouTube.

Prompt 12:

Write a GPT prompt that builds a podcast trailer script. Ask for what the show is about, who it's for, and what to expect. GPT should return a 30–60 second high-energy trailer script covering host intro, value promise, release schedule, and subscribe CTA.

Prompt 13:

Generate a GPT prompt to write podcast ad reads. Ask for sponsor product, listener pain point, and offer details. GPT should return 3 variations: conversational plug, testimonial-style script, and value-stacked pitch with urgency CTA — written to blend with content.

Prompt 14:

Create a GPT prompt to generate podcast naming ideas. Ask for niche, core message, and tone (clever, professional, casual). GPT should return 10 names with meanings, tagline suggestions, and Instagram handle/domain availability cues for branding.

Prompt 15:

Design a GPT prompt to optimize podcast for SEO. Ask for episode title, main keyword, and hosting platform. GPT should return title tweaks, meta descriptions, transcript use, tagging strategies, and long-tail keyword insertions for organic discoverability.

Prompt 16:

Write a GPT prompt to build an email list from podcast episodes. Ask for podcast format, freebie idea, and CTA style. GPT should return opt-in funnel flow, lead magnet pairing, newsletter follow-up sequence, and on-air CTA integration strategies.

Prompt 17:

Generate a GPT prompt to create listener engagement plans. Ask for listener profile and feedback style (polls, DMs, comments). GPT should return engagement scripts, questions to ask on-air, shout-out ideas, and ways to pull user stories for community growth.

Prompt 18:

Create a GPT prompt that plans a seasonal podcast series. Ask for overarching theme, episode count, and tone. GPT should return a structured season with episode arcs, teaser trailer, recap format, and audience retention strategies between seasons.

Prompt 19:

Design a GPT prompt to write guest invitation emails. Ask for guest profile and podcast theme. GPT should return 2 versions: warm outreach and cold pitch — both with personalization, guest benefits, and availability link or response CTA.

Prompt 20:

Write a GPT prompt to build a podcast feedback form. Ask for goal (content improvement, sponsor proof, community pulse). GPT should return 5–7 question format including episode ratings, content requests, listening habits, and testimonial capture script.

Category 32: Productivity & Time Management

Prompt 1:

Write a GPT prompt that helps users design their ideal daily routine. Ask for wake-up time, work type, energy peaks, and personal goals. GPT should return a personalized schedule with time blocks for deep work, breaks, meals, learning, and reflection.

Prompt 2:

Create a GPT prompt to build a weekly productivity plan. Ask for upcoming goals, availability, and task types. GPT should return a Monday-to-Sunday planner with daily priorities, time-blocked sessions, batching suggestions, and buffer time for unexpected delays or creative flow.

Prompt 3:

Design a GPT prompt that helps users build a habit tracker system. Ask for the habits they want to form, preferred tracking style (digital, analog), and timeframe. GPT should return a tracker template with motivational cues, reward ideas, and habit-stacking suggestions.

Prompt 4:

Write a GPT prompt to generate a time audit system. Ask for daily routine details, energy levels, and distraction patterns. GPT should return a time-tracking template, analysis tips, and a breakdown of low vs. high-return activities for elimination or delegation.

Prompt 5:

Generate a GPT prompt that helps overcome procrastination. Ask for the task being avoided, reasons for delay, and deadline. GPT should return a breakdown of the task into micro-steps, anti-procrastination techniques (like 5-minute rule or Pomodoro), and a motivational script.

Prompt 6:

Create a GPT prompt that builds a distraction-free work environment. Ask for user's workspace type, typical distractions, and focus needs. GPT should return physical setup tips, digital hygiene routines, background noise suggestions, and mental cue techniques to enter flow state.

Prompt 7:

Design a GPT prompt that creates a deep work ritual. Ask for the task type, available time window, and mental state. GPT should return a custom focus ritual with prep cues, timed sessions, mid-way checkpoints, and recovery or celebration steps.

Prompt 8:

Write a GPT prompt to help users prioritize tasks using the Eisenhower Matrix. Ask for a task list. GPT should categorize tasks into urgent-important, important-not urgent, urgent-not important, and neither — with a summary plan to tackle or delegate each category.

Prompt 9:

Generate a GPT prompt that structures your ideal morning routine for productivity. Ask for desired wake time, priorities, and energy goals. GPT should return a step-by-step morning ritual that includes movement, mindfulness, goal review, creative output, and tech rules.

Prompt 10:

Create a GPT prompt that helps write a weekly reflection journal. Ask for tasks completed, emotional state, and energy highs/lows. GPT should return a journaling framework with 5 key questions, a win-tracker, learning log, and areas to improve next week.

Prompt 11:

Design a GPT prompt that maps a 90-day personal productivity sprint. Ask for 1–3 core goals, time availability, and distractions. GPT should return a weekly milestone plan, task breakdowns, review checkpoints, and accountability methods to stay on track.

Prompt 12:

Write a GPT prompt to improve meeting productivity. Ask for meeting frequency, average duration, and outcome goals. GPT should return a new meeting format with clear agenda templates, role assignments, pre-read checklists, and post-meeting action logs.

Prompt 13:

Generate a GPT prompt that helps remote workers create structure. Ask for working hours, environment challenges, and team collaboration needs. GPT should return a daily routine, async work rules, focus blocks, and social check-in windows to avoid isolation and burnout.

Prompt 14:

Create a GPT prompt to batch recurring tasks effectively. Ask for task types, weekly frequency, and available batching windows. GPT should return a batching schedule, automation tips, and tools (Zapier, Notion, calendar blocks) to streamline repetitive workflows.

Prompt 15:

Design a GPT prompt that supports energy-based productivity planning. Ask for energy levels throughout the day, key tasks, and rest preferences. GPT should return a time map aligning peak energy with creative work, buffer zones for admin, and recharge breaks.

Prompt 16:

Write a GPT prompt that builds a personalized Pomodoro workflow. Ask for task type, attention span, and break needs. GPT should return a timed focus session plan, break activity ideas, app/tool suggestions, and progress tracking sheets.

Prompt 17:

Generate a GPT prompt that writes a “shutdown” routine to end the workday. Ask for work hours, end-of-day tasks, and stress level. GPT should return a wind-down checklist including reflection, planning next day, workspace reset, and intentional work–life transition tips.

Prompt 18:

Create a GPT prompt that builds a monthly productivity review. Ask for goals set, outcomes achieved, and major blockers. GPT should return a reflection document format with a highlights section, metric summary, top learnings, and course correction suggestions.

Prompt 19:

Design a GPT prompt that helps busy individuals say “no” productively. Ask for current commitments, values, and communication style. GPT should return polite boundary-setting scripts for email or conversation that preserve relationships while protecting time and energy.

Prompt 20:

Write a GPT prompt that generates a focus playlist based on working mood. Ask for preferred genres, desired mental state (creative, calm, high energy), and task type. GPT should return a Spotify/YT playlist suggestion, tempo breakdown, and when to use silence instead.

Category 33: Visual Content Creation & Aesthetics

Prompt 1:

Write a GPT prompt that generates a brand visual identity guide. Ask for niche, target audience, and tone. GPT should return font pairings, color palette suggestions, logo usage rules, image style preferences (minimalist, vibrant, vintage), and layout guidelines for consistency.

Prompt 2:

Create a GPT prompt to plan a 30-day visual content calendar for Instagram. Ask for content themes, brand mood, and target engagement goals. GPT should return 30 ideas (reels, carousels, static posts) with design angles, text overlay tips, and color direction.

Prompt 3:

Design a GPT prompt to generate Canva templates for educational posts. Ask for topic, layout type (carousel, infographic, checklist), and visual style. GPT should return layout suggestions, hierarchy tips, icons to use, and instructions for building in Canva or Figma.

Prompt 4:

Write a GPT prompt to brainstorm YouTube thumbnail concepts. Ask for video title, emotion to evoke, and competitor examples. GPT should return thumbnail sketch ideas, text positioning, subject framing, expression cues, color contrast advice, and attention-triggering techniques.

Prompt 5:

Generate a GPT prompt that creates carousel post ideas with visual flow. Ask for topic and slide count. GPT should return title slide concept, value stack across slides, visuals per point (icons, charts, screenshots), and end slide CTA layout ideas.

Prompt 6:

Create a GPT prompt to develop an aesthetic Pinterest board strategy. Ask for niche, brand color palette, and mood. GPT should return board categories, pin themes, image types, overlay text styling, and moodboard preview layouts for follower growth and engagement.

Prompt 7:

Design a GPT prompt that helps create a digital product mockup gallery. Ask for product type (ebook, course, prompt

pack), preferred style, and display purpose. GPT should return mockup styles (flat, 3D, in-context), background suggestions, and tool recommendations (Canva, Artboard Studio).

Prompt 8:

Write a GPT prompt to build a cohesive visual brand for digital creators. Ask for personal vs. brand vibe, top 3 values, and ideal visual reference (e.g., Apple, Duolingo). GPT should return imagery themes, filters/presets, white space rules, and typography guides.

Prompt 9:

Generate a GPT prompt to create consistent reels visual templates. Ask for hook format, brand color scheme, and logo placement. GPT should return layout structure (frame zones), font hierarchy, motion intro tips, and export settings for sharp resolution.

Prompt 10:

Create a GPT prompt that builds a swipe file of visual inspiration. Ask for content type (ads, quotes, memes), platform, and design aesthetic. GPT should return 10 curated design examples with explanation of what works, and folder structure to organize assets.

Prompt 11:

Design a GPT prompt that helps users design their first digital product cover (PDF, course, etc.). Ask for title, color vibe, target audience. GPT should return cover mockup layout, title font pairing, icon/photo recommendations, and margin/sizing ratios.

Prompt 12:

Write a GPT prompt that builds visual storytelling slides for pitch decks. Ask for purpose (funding, idea validation), audience, and tone. GPT should return slide types, visual elements per slide (icons, graphs, maps), layout structure, and color use advice.

Prompt 13:

Generate a GPT prompt that improves your visual content consistency across platforms. Ask for platform mix, brand colors, and typical assets. GPT should return reuse strategies, brand kit setup, color/typography locking in Canva, and file naming best practices.

Prompt 14:

Create a GPT prompt to write captions that match visual tone. Ask for post type (quote, promo, carousel), visual mood (bold, elegant, playful), and CTA. GPT should return 3 caption versions (short, storytelling, CTA-rich) aligned with image tone and structure.

Prompt 15:

Design a GPT prompt to generate aesthetic IG bio and link-in-bio layout. Ask for niche, brand mood, and CTA priority. GPT should return bio options, emoji use tips, line breaks, and Linktree-style layout with smart headings for visual clarity.

Prompt 16:

Write a GPT prompt that builds a visual testimonial wall for landing pages. Ask for testimonial formats, product type, and color tone. GPT should return layout design (grid, slider, cards), text highlight methods, photo or avatar use, and CTA placement.

Prompt 17:

Generate a GPT prompt to audit visual content of a brand. Ask for links to social pages, website, and brand values. GPT should return critique notes on alignment, design consistency, visual clutter, branding cues, and 3 action steps to refine the aesthetic.

Prompt 18:

Create a GPT prompt that helps build an aesthetic Twitter/X thread image series. Ask for thread title, niche, and tone. GPT should return 3–5 visual styles, header image templates, stat card ideas, and design format for mobile clarity and branding.

Prompt 19:

Design a GPT prompt to create cover designs for multiple digital guides. Ask for number of products, common theme, and brand palette. GPT should return template variations that share visual DNA while feeling distinct — suitable for a digital bundle.

Prompt 20:

Write a GPT prompt that builds an Instagram highlight icon pack. Ask for categories (testimonials, tools, tips, etc.), brand aesthetic, and icon style (line, flat, bold). GPT should return icon ideas, Canva templates, naming conventions, and how to present them aesthetically.

Category 34: Remote Work & Freelancing

Prompt 1:

Write a GPT prompt that helps freelancers set up a productive remote workspace. Ask for available space, preferred work style, and budget. GPT should return ergonomic furniture suggestions, lighting tips, cable management, backdrop ideas for Zoom calls, and digital tool recommendations for comfort and focus.

Prompt 2:

Create a GPT prompt to guide remote freelancers in managing their work-life balance. Ask for working hours, family obligations, and stress points. GPT should return a routine framework, boundary-setting strategies, break suggestions, and post-work rituals to maintain a healthy mindset.

Prompt 3:

Design a GPT prompt that builds a freelance services menu. Ask for niche, skill set, and client type. GPT should return 3–5 clear service packages, deliverables, turnaround time, pricing structure, and an upsell ladder with optional add-ons or retainers.

Prompt 4:

Write a GPT prompt that generates an optimized freelance client onboarding process. Ask for service type, communication style, and tech stack. GPT should return onboarding email templates, welcome kits, contract suggestions, project intake forms, and milestone setting.

Prompt 5:

Generate a GPT prompt to write outreach messages for cold pitching clients. Ask for industry, target client profile, and tone. GPT should return 3 email/DM variations that are short, value-packed, non-spammy, and encourage a response or quick call.

Prompt 6:

Create a GPT prompt that helps manage multiple freelance projects. Ask for number of clients, task types, and deadline frequency. GPT should return a productivity system with project tracking tools, prioritization matrix, weekly check-in structure, and burnout prevention tips.

Prompt 7:

Design a GPT prompt that generates a monthly income planner for freelancers. Ask for income goal, service rates, and

average project size. GPT should return a calculator template, project quota breakdown, retainer vs. one-off mix, and backup income plan for low months.

Prompt 8:

Write a GPT prompt that builds a freelance website copy draft. Ask for niche, core services, and tone of voice. GPT should return homepage headline ideas, service page layout, about section storytelling, and CTA ideas to build authority and convert visitors.

Prompt 9:

Generate a GPT prompt to write freelancer proposals on platforms like Upwork or Fiverr. Ask for project type, competition level, and buyer's brief. GPT should return a concise proposal structure, value positioning tips, credibility signals, and custom response templates.

Prompt 10:

Create a GPT prompt that builds a social media content plan for a freelancer. Ask for platform (LinkedIn, Instagram), content goal (build authority, get leads), and niche. GPT should return 10 post types with hook ideas, content frameworks, and visual themes.

Prompt 11:

Design a GPT prompt to generate a pricing strategy for freelance services. Ask for skill level, market average, and value delivered. GPT should return tiered pricing models (hourly, project-based, retainer), discount guidelines, and price increase strategies.

Prompt 12:

Write a GPT prompt that helps freelancers set boundaries with clients. Ask for client behavior issues (scope creep, late responses), tone preference, and communication style. GPT should return email templates, polite scripts, and calendar setting strategies to protect time and sanity.

Prompt 13:

Generate a GPT prompt that structures a freelancer's client follow-up system. Ask for service type, delivery format, and review goals. GPT should return a post-delivery follow-up script, testimonial request, referral ask, and re-engagement automation ideas.

Prompt 14:

Create a GPT prompt to build a lead magnet tailored for freelancers. Ask for niche, audience pain point, and delivery format. GPT should return lead magnet ideas (checklist, template, audit), opt-in page copy, and email funnel structure for nurturing leads.

Prompt 15:

Design a GPT prompt that helps digital nomads optimize work while traveling. Ask for travel pace, timezone issues, and internet access reliability. GPT should return travel gear essentials, async work hacks, timezone syncing tips, and emergency productivity plans.

Prompt 16:

Write a GPT prompt to develop a client onboarding call script. Ask for service offered and call goal (clarify scope, build rapport). GPT should return an outline with intro, agenda setting, qualification questions, expectation alignment, and soft pitch for upselling.

Prompt 17:

Generate a GPT prompt to help freelancers avoid burnout. Ask for workload, current stress signs, and recovery habits. GPT should return a wellness plan with red flag checklists, mini recharge rituals, task dumping templates, and digital detox ideas.

Prompt 18:

Create a GPT prompt that helps freelancers build a referral system. Ask for client base size, incentive preference, and platform. GPT should return referral ask templates, reward tiers, and system setup for email or CRM follow-up automation.

Prompt 19:

Design a GPT prompt to write testimonials for freelancers to use as placeholders. Ask for service type, transformation delivered, and tone (casual, corporate). GPT should return 3 variations of sample testimonials to display in portfolios until real ones are collected.

Prompt 20:

Write a GPT prompt to create a freelance client scorecard. Ask for criteria (budget, communication, timelines, respect). GPT should return a simple scoring sheet to evaluate fit, avoid red flags, and build a client base aligned with values and energy.

Category 35: YouTube Automation & Script Writing

Prompt 1:

Write a GPT prompt that generates a complete YouTube automation workflow. Ask for niche, posting frequency, and monetization goal. GPT should return tasks for ideation, script writing, voiceover, video editing, SEO optimization, and outsourcing suggestions with role breakdowns.

Prompt 2:

Create a GPT prompt to generate a viral YouTube video script. Ask for topic, video length, and target viewer emotion. GPT should return a structured script with an attention-grabbing hook, story arc, visuals description, retention triggers, and a compelling CTA.

Prompt 3:

Design a GPT prompt to create YouTube channel branding guidelines. Ask for niche, tone, and audience type. GPT should return suggestions for banner text, profile image ideas, channel trailer outline, and a tagline with visual consistency tips.

Prompt 4:

Write a GPT prompt to brainstorm 30 faceless YouTube video ideas. Ask for niche and content type (listicle, documentary, tutorial). GPT should return title formats, suggested B-roll or AI-generated visuals, and monetization pairing with affiliate or digital products.

Prompt 5:

Generate a GPT prompt to write SEO-optimized YouTube titles and descriptions. Ask for video topic and keyword. GPT should return 5 title variations using curiosity and value stacking, plus a detailed description with timestamps, hashtags, and link placements.

Prompt 6:

Create a GPT prompt to develop a faceless YouTube intro script. Ask for channel theme, viewer promise, and tone. GPT should return a 10–15 second script to hook interest, show channel value, and introduce the content style with energy.

Prompt 7:

Design a GPT prompt to generate YouTube thumbnail text ideas. Ask for title and viewer motivation. GPT should return 5 punchy, clickworthy phrases under 5 words with emotional trigger suggestions and image framing tips for better CTR.

Prompt 8:

Write a GPT prompt to help build a YouTube content calendar for faceless automation. Ask for upload frequency, main themes, and seasonal trends. GPT should return a 30-day schedule with content type breakdowns, research flow, and automation delegation plan.

Prompt 9:

Generate a GPT prompt to create voiceover scripts for AI narration. Ask for topic, tone (inspiring, informative, dramatic), and video length. GPT should return a natural-sounding script divided into voiceover blocks, with cues for music and visual overlays.

Prompt 10:

Create a GPT prompt to build a cash cow channel growth strategy. Ask for niche, target CPM, and viewer intent. GPT should return a blueprint covering content model, video frequency, thumbnail testing, retention tactics, and monetization through ads + products.

Prompt 11:

Design a GPT prompt that creates video outline templates for storytelling videos. Ask for topic type and desired viewer reaction. GPT should return a structure: Hook – Setup – Conflict – Resolution – Lesson – CTA, with time stamps.

Prompt 12:

Write a GPT prompt to generate ideas for niche-specific YouTube shorts. Ask for niche and content tone. GPT should return 10 short-form ideas with hook concepts, visual elements, caption tips, and CTA types (subscribe, comment, link click).

Prompt 13:

Generate a GPT prompt to improve YouTube audience retention. Ask for video type, current retention rate, and viewer drop-off point. GPT should return structural changes, pacing tips, pattern interrupts, and engagement hooks to improve average watch duration.

Prompt 14:

Create a GPT prompt to draft a YouTube channel trailer script. Ask for niche, personality type, and viewer problem solved. GPT should return a 60–90 second script with a problem-agitate-solution format, clips reference, and CTA to subscribe.

Prompt 15:

Design a GPT prompt to write call-to-action scripts for YouTube videos. Ask for goal (subscribe, comment, visit site), timing (beginning, mid, end), and channel vibe. GPT should return 3 dynamic CTAs with variation and urgency wording.

Prompt 16:

Write a GPT prompt that creates a B-roll and stock footage plan for faceless videos. Ask for video script theme and available tools. GPT should return B-roll cues, asset library suggestions, motion graphics ideas, and transitions for smooth pacing.

Prompt 17:

Generate a GPT prompt that builds an end screen and video linking strategy. Ask for channel theme and video goal. GPT should return suggestions for ideal video pairings, clickable end screens, playlist hooks, and redirecting strategies for binge-watching.

Prompt 18:

Create a GPT prompt to craft an automation team job description. Ask for task (editing, scripting, thumbnail design), tool used, and budget. GPT should return role summaries, output expectations, hiring platforms, and task SOPs for smooth delegation.

Prompt 19:

Design a GPT prompt to write captions for YouTube videos. Ask for script text and desired reading tone. GPT should return subtitle versions with reader-friendly pacing, keyword emphasis formatting, and accessibility best practices.

Prompt 20:

Write a GPT prompt that helps repurpose YouTube content across platforms. Ask for video topic and preferred platforms (Instagram, LinkedIn, blog). GPT should return short clip ideas, tweet threads, carousel breakdowns, and repackaging styles for multi-platform visibility.

Category 36: Sales Funnels & Lead Generation

Prompt 1:

Write a GPT prompt that builds a complete sales funnel strategy for a digital product. Ask for product type, target audience, and traffic source. GPT should return funnel stages (lead magnet, tripwire, core offer), landing page ideas, email sequence themes, and upsell/downsell logic.

Prompt 2:

Create a GPT prompt to generate a high-converting opt-in page. Ask for lead magnet title, benefit statement, and target audience pain point. GPT should return headline variations, form layout tips, CTA button text options, and trust-building elements like testimonials or previews.

Prompt 3:

Design a GPT prompt to write an email welcome sequence for new leads. Ask for niche, product type, and tone of voice. GPT should return a 5-email sequence introducing your story, value, education, testimonials, and a subtle transition to your paid offer.

Prompt 4:

Write a GPT prompt to create a quiz funnel. Ask for niche, quiz topic, and lead magnet format. GPT should return quiz title, intro text, 5 question ideas, outcome types, opt-in transition, and how to connect results with personalized product recommendations.

Prompt 5:

Generate a GPT prompt to develop a lead magnet that naturally feeds into a paid offer. Ask for end product, transformation promised, and buyer objection. GPT should return 3 lead magnet ideas (checklist, mini course, calculator), positioning lines, and email nurture hooks.

Prompt 6:

Create a GPT prompt to write retargeting ad copy for abandoned leads. Ask for funnel stage, objection reason (price, time), and audience mindset. GPT should return 3 ad scripts tailored to urgency, storytelling, or incentive (discount, bonus, social proof).

Prompt 7:

Design a GPT prompt to plan a lead generation campaign using organic Instagram growth. Ask for niche, target demographic, and posting schedule. GPT should return 7-day content plan, lead magnet post script, CTA templates, and DM automation ideas.

Prompt 8:

Write a GPT prompt that builds a sales funnel for a service-based business. Ask for service type, pricing tier, and client journey stage. GPT should return funnel map including lead magnet, consultation booking page, automated nurture emails, and follow-up offers.

Prompt 9:

Generate a GPT prompt to optimize your funnel's thank-you page. Ask for funnel goal and next action desired. GPT should return a thank-you page layout with testimonial snippets, social links, low-ticket upsell button, and engagement video embed.

Prompt 10:

Create a GPT prompt that builds a free-to-paid funnel for an online course. Ask for course topic, course length, and audience familiarity. GPT should return a mini-course or webinar teaser strategy, trust email series, pricing ladder, and conversion CTA language.

Prompt 11:

Design a GPT prompt that writes lead-gen ads for Facebook or Google. Ask for niche, offer type, and traffic intent. GPT should return 3 ad variations with headline, body copy, visual theme, and targeting suggestion (custom audience or interest group).

Prompt 12:

Write a GPT prompt to generate a funnel audit checklist. Ask for funnel type and conversion issue (low CTR, poor email open rates). GPT should return a 10-point checklist including headline testing, CTA clarity, mobile optimization, and lead scoring tips.

Prompt 13:

Generate a GPT prompt to craft a scarcity-driven lead magnet landing page. Ask for offer deadline, urgency factor, and audience objection. GPT should return an urgency-enhanced page layout with countdown timer, limited slots messaging, and FOMO headlines.

Prompt 14:

Create a GPT prompt that helps build an affiliate funnel. Ask for product type and audience intent. GPT should return funnel stages (bonus bridge page, list building offer), autoresponder sequence, custom bonus stack ideas, and high-converting CTAs.

Prompt 15:

Design a GPT prompt to create a content upgrade strategy for blogs. Ask for blog topic and reader goal. GPT should return ideas for upgrades (PDF checklist, workbook, template), opt-in placement strategies, and integration into email follow-up funnels.

Prompt 16:

Write a GPT prompt to generate a DM funnel for lead nurturing. Ask for platform (Instagram, LinkedIn), offer type, and tone. GPT should return a 4-step DM flow: intro message, value pitch, qualification question, and booking link or CTA.

Prompt 17:

Generate a GPT prompt to write a video script for a VSL (video sales letter). Ask for product, viewer pain point, and pricing tier. GPT should return a full script outline with hook, story, value breakdown, testimonial section, and strong closing CTA.

Prompt 18:

Create a GPT prompt to write testimonial requests that fit into your funnel. Ask for service type and delivery method. GPT should return email and DM templates that politely request feedback, offer value, and include prompts for review quality.

Prompt 19:

Design a GPT prompt to build a low-ticket front-end funnel. Ask for main offer and audience cold-warm level. GPT should return a \$7-\$27 product idea, funnel layout with bump offers, order form copy, and follow-up upsell strategy.

Prompt 20:

Write a GPT prompt that crafts a “free + shipping” funnel. Ask for product type, fulfillment method, and lead lifetime value. GPT should return funnel stages (landing page, order bump, OTO), fulfillment strategy, and long-term monetization back-end offers.

Category 37: Personal Branding & Authority Building

Prompt 1:

Write a GPT prompt to build a personal brand positioning statement. Ask for niche, audience type, and personal values. GPT should return a one-liner statement that clearly communicates who you are, what you do, who you serve, and the unique transformation you provide — ideal for bios, intros, and elevator pitches.

Prompt 2:

Create a GPT prompt that generates a personal brand voice guide. Ask for personality traits (e.g., witty, bold, warm), content style, and target platform. GPT should return tone guidelines, vocabulary dos and don'ts, emoji/styling usage, and examples of consistent messaging across content formats.

Prompt 3:

Design a GPT prompt to create a powerful personal brand origin story. Ask for past challenges, pivotal moments, and expertise gained. GPT should return a narrative in three acts (struggle, shift, success) with hooks for speaking gigs, “About Me” sections, and interviews.

Prompt 4:

Write a GPT prompt that builds a personal branding content framework. Ask for niche, core topics, and publishing frequency. GPT should return a content matrix with categories (educational, opinion, story, proof), suggested formats (video, threads, quotes), and a weekly schedule.

Prompt 5:

Generate a GPT prompt to craft a unique social media bio for personal branding. Ask for your role, values, and CTA. GPT should return a clean 3-line bio tailored to Instagram, Twitter, or LinkedIn — with clarity, credibility, and conversion in mind.

Prompt 6:

Create a GPT prompt to write a personal brand manifesto. Ask for beliefs, mission, and guiding values. GPT should return a declaration-style document that can be used as a pinned post, website section, or rallying cry to connect deeper with your audience.

Prompt 7:

Design a GPT prompt that helps identify your personal brand archetype. Ask for your preferred communication style, leadership traits, and content habits. GPT should match you to one of 12 archetypes (e.g., Sage, Rebel, Creator) with tips on visuals, tone, and branding alignment.

Prompt 8:

Write a GPT prompt to generate topic ideas that position you as an expert. Ask for niche and audience goal. GPT should return 15 topics that blend personal experience, contrarian takes, research-backed posts, and results-driven stories that build trust and visibility.

Prompt 9:

Generate a GPT prompt that outlines a “visibility stacking” plan. Ask for niche, platforms used, and time available. GPT should return a weekly plan to appear on podcasts, post valuable threads, engage in communities, and publish long-form content for authority.

Prompt 10:

Create a GPT prompt to script an expert introduction for podcasts or webinars. Ask for audience type, core message, and desired perception. GPT should return a 30-second to 1-minute intro that includes credibility, personal hook, and relatability to immediately gain audience trust.

Prompt 11:

Design a GPT prompt that helps create a personal brand tagline. Ask for niche, personality, and benefit promised. GPT should return 3 tagline options — punchy, memorable, and true to your style — suitable for social headers, pitch decks, or merch.

Prompt 12:

Write a GPT prompt that builds a brand proof vault. Ask for previous wins, testimonials, and metrics. GPT should return a categorized layout (stories, screenshots, stats) and templates for weaving proof into content without being overly salesy.

Prompt 13:

Generate a GPT prompt to write a high-impact LinkedIn bio. Ask for profession, mission, and career highlights. GPT should return a summary section that blends expertise, storytelling, and CTA while maximizing keyword relevance for visibility.

Prompt 14:

Create a GPT prompt that generates an authority-driven content series. Ask for niche and transformation promised. GPT should return a 5-part content arc (e.g., mini course, challenge, myth-busting series) that showcases your thought leadership and nurtures audience belief.

Prompt 15:

Design a GPT prompt that outlines a personal brand website. Ask for niche, products/services, and visual preference. GPT should return suggested pages (home, about, media, proof, offers), tone of copy, photo style, and lead capture ideas.

Prompt 16:

Write a GPT prompt to script a compelling origin video. Ask for transformation story and video tone. GPT should return a script that covers intro, backstory, breaking point, lesson learned, and how you now help others — perfect for profile videos or pinned posts.

Prompt 17:

Generate a GPT prompt to design a keynote speech outline that builds authority. Ask for audience, theme, and personal take. GPT should return an outline with intro story, big idea, framework shared, proof points, audience activation, and final CTA.

Prompt 18:

Create a GPT prompt to craft responses for building brand credibility in comments or interviews. Ask for your expertise area and FAQs. GPT should return polished, non-generic replies that build reputation and encourage profile clicks or inquiries.

Prompt 19:

Design a GPT prompt that helps track your personal brand growth. Ask for goals (reach, conversions, mentions), time horizon, and platforms. GPT should return a growth tracking template with key metrics, weekly review cues, and optimization loops.

Prompt 20:

Write a GPT prompt to generate a case study highlight reel. Ask for 3–5 past wins and niches served. GPT should return a summarized “case study carousel” or post structure, including problem → solution → result → takeaway for positioning strength.

Category 37: Personal Branding & Authority Building

Prompt 1:

Write a GPT prompt to build a personal brand positioning statement. Ask for niche, audience type, and personal values. GPT should return a one-liner statement that clearly communicates who you are, what you do, who you serve, and the unique transformation you provide — ideal for bios, intros, and elevator pitches.

Prompt 2:

Create a GPT prompt that generates a personal brand voice guide. Ask for personality traits (e.g., witty, bold, warm), content style, and target platform. GPT should return tone guidelines, vocabulary dos and don'ts, emoji/styling usage, and examples of consistent messaging across content formats.

Prompt 3:

Design a GPT prompt to create a powerful personal brand origin story. Ask for past challenges, pivotal moments, and expertise gained. GPT should return a narrative in three acts (struggle, shift, success) with hooks for speaking gigs, “About Me” sections, and interviews.

Prompt 4:

Write a GPT prompt that builds a personal branding content framework. Ask for niche, core topics, and publishing frequency. GPT should return a content matrix with categories (educational, opinion, story, proof), suggested formats (video, threads, quotes), and a weekly schedule.

Prompt 5:

Generate a GPT prompt to craft a unique social media bio for personal branding. Ask for your role, values, and CTA. GPT should return a clean 3-line bio tailored to Instagram, Twitter, or LinkedIn — with clarity, credibility, and conversion in mind.

Prompt 6:

Create a GPT prompt to write a personal brand manifesto. Ask for beliefs, mission, and guiding values. GPT should return a declaration-style document that can be used as a pinned post, website section, or rallying cry to connect deeper with your audience.

Prompt 7:

Design a GPT prompt that helps identify your personal brand archetype. Ask for your preferred communication style,

leadership traits, and content habits. GPT should match you to one of 12 archetypes (e.g., Sage, Rebel, Creator) with tips on visuals, tone, and branding alignment.

Prompt 8:

Write a GPT prompt to generate topic ideas that position you as an expert. Ask for niche and audience goal. GPT should return 15 topics that blend personal experience, contrarian takes, research-backed posts, and results-driven stories that build trust and visibility.

Prompt 9:

Generate a GPT prompt that outlines a “visibility stacking” plan. Ask for niche, platforms used, and time available. GPT should return a weekly plan to appear on podcasts, post valuable threads, engage in communities, and publish long-form content for authority.

Prompt 10:

Create a GPT prompt to script an expert introduction for podcasts or webinars. Ask for audience type, core message, and desired perception. GPT should return a 30-second to 1-minute intro that includes credibility, personal hook, and relatability to immediately gain audience trust.

Prompt 11:

Design a GPT prompt that helps create a personal brand tagline. Ask for niche, personality, and benefit promised. GPT should return 3 tagline options — punchy, memorable, and true to your style — suitable for social headers, pitch decks, or merch.

Prompt 12:

Write a GPT prompt that builds a brand proof vault. Ask for previous wins, testimonials, and metrics. GPT should return a categorized layout (stories, screenshots, stats) and templates for weaving proof into content without being overly salesy.

Prompt 13:

Generate a GPT prompt to write a high-impact LinkedIn bio. Ask for profession, mission, and career highlights. GPT should return a summary section that blends expertise, storytelling, and CTA while maximizing keyword relevance for visibility.

Prompt 14:

Create a GPT prompt that generates an authority-driven content series. Ask for niche and transformation promised. GPT should return a 5-part content arc (e.g., mini course, challenge, myth-busting series) that showcases your thought leadership and nurtures audience belief.

Prompt 15:

Design a GPT prompt that outlines a personal brand website. Ask for niche, products/services, and visual preference. GPT should return suggested pages (home, about, media, proof, offers), tone of copy, photo style, and lead capture ideas.

Prompt 16:

Write a GPT prompt to script a compelling origin video. Ask for transformation story and video tone. GPT should return a script that covers intro, backstory, breaking point, lesson learned, and how you now help others — perfect for profile videos or pinned posts.

Prompt 17:

Generate a GPT prompt to design a keynote speech outline that builds authority. Ask for audience, theme, and personal take. GPT should return an outline with intro story, big idea, framework shared, proof points, audience activation, and final CTA.

Prompt 18:

Create a GPT prompt to craft responses for building brand credibility in comments or interviews. Ask for your expertise area and FAQs. GPT should return polished, non-generic replies that build reputation and encourage profile clicks or inquiries.

Prompt 19:

Design a GPT prompt that helps track your personal brand growth. Ask for goals (reach, conversions, mentions), time horizon, and platforms. GPT should return a growth tracking template with key metrics, weekly review cues, and optimization loops.

Prompt 20:

Write a GPT prompt to generate a case study highlight reel. Ask for 3–5 past wins and niches served. GPT should return a summarized “case study carousel” or post structure, including problem → solution → result → takeaway for positioning strength.

Category 38: Entrepreneurship & Business Mindset

Prompt 1:

Write a GPT prompt that helps new entrepreneurs identify their zone of genius. Ask for past experiences, skills they enjoy using, and results they've helped others achieve. GPT should return a breakdown of their top value areas, monetizable strengths, and ideas for business offers rooted in their natural talents.

Prompt 2:

Create a GPT prompt that generates a 90-day entrepreneur mindset plan. Ask for current mindset struggles, income goals, and daily schedule. GPT should return a 3-phase plan: reprogramming limiting beliefs, building new habits, and tracking thought patterns with mindset journaling prompts and weekly affirmations.

Prompt 3:

Design a GPT prompt to write a startup decision-making checklist. Ask for industry, stage of business, and leadership style. GPT should return a decision framework for evaluating opportunities, risks, and costs — with suggested columns like ROI, alignment, speed, and energy.

Prompt 4:

Write a GPT prompt that generates a morning routine for founders. Ask for energy levels, focus needs, and time available. GPT should return a stack of high-performance habits (e.g., movement, reflection, planning, learning) customized to boost creativity and clarity before daily hustle.

Prompt 5:

Generate a GPT prompt to reframe fear of failure for entrepreneurs. Ask for recent setback, self-doubt beliefs, and desired business identity. GPT should return a cognitive reframing statement, success redefinition script, and action steps to use fear as feedback and motivation.

Prompt 6:

Create a GPT prompt that writes journaling prompts to build a CEO mindset. Ask for stage of business and mindset gaps (e.g., scarcity, imposter syndrome). GPT should return 10 journaling prompts that unlock confidence, responsibility, long-term thinking, and resilience under pressure.

Prompt 7:

Design a GPT prompt to generate quotes and mantras for entrepreneurs. Ask for business type and emotional state (e.g.,

discouraged, overwhelmed, stagnant). GPT should return 10 custom affirmations or quotes that encourage consistency, creativity, and power moves despite resistance.

Prompt 8:

Write a GPT prompt to build a business clarity worksheet. Ask for business model, offers, and team size. GPT should return worksheet sections: Why We Exist, What We Sell, Who We Serve, How We Deliver, and Where We're Headed — perfect for recalibrating direction.

Prompt 9:

Generate a GPT prompt to help entrepreneurs overcome decision paralysis. Ask for context of indecision and goal affected. GPT should return mental models (e.g., regret minimization, opportunity cost), questions to ask, and a "decide-and-test" system to move faster.

Prompt 10:

Create a GPT prompt that helps entrepreneurs define success on their terms. Ask for current business wins, unfulfilling habits, and lifestyle desires. GPT should return a holistic success definition — covering income, freedom, impact, health, and joy — with goals tied to it.

Prompt 11:

Design a GPT prompt that creates a 7-day mindset challenge for solopreneurs. Ask for mindset struggle and format preference. GPT should return daily prompts with intention-setting, visualization, courage actions, and reflection questions that boost leadership energy and clarity.

Prompt 12:

Write a GPT prompt that simulates a conversation with your future 7-figure business self. Ask for niche, values, and vision. GPT should roleplay the wiser version of you and return insights on what to prioritize, eliminate, and embody now to close the gap.

Prompt 13:

Generate a GPT prompt that breaks limiting money beliefs. Ask for upbringing context and common financial fears. GPT should return reframe scripts, new belief affirmations, and mini challenges that promote abundance, gratitude, and high-ticket self-worth.

Prompt 14:

Create a GPT prompt that writes personal growth prompts through the lens of entrepreneurship. Ask for current struggle (comparison, procrastination, fear). GPT should return 10 deep questions that help the entrepreneur connect identity with behavior change and business evolution.

Prompt 15:

Design a GPT prompt that outlines the core traits of a successful founder. Ask for industry and company structure. GPT should return a checklist of founder traits — from strategic delegation to vision clarity — with journaling or rating system for personal growth tracking.

Prompt 16:

Write a GPT prompt that generates habit stacks for entrepreneurs. Ask for habits to build (focus, sales confidence, creativity). GPT should return morning, midday, and evening stacks, habit triggers, and suggested apps or tools to lock in consistency.

Prompt 17:

Generate a GPT prompt to create a “Who I Need to Become” roadmap. Ask for business goal and leadership gap. GPT should return an identity shift plan, with beliefs to adopt, behaviors to normalize, and accountability loops to reinforce them.

Prompt 18:

Create a GPT prompt that rewrites past failures into founder lessons. Ask for a painful business moment. GPT should return a new story — showing resilience, strength, and insight gained — and how to use that moment in content or pitches.

Prompt 19:

Design a GPT prompt to simulate a mastermind with successful entrepreneurs. Ask for industry and growth stage. GPT should roleplay 3 expert voices giving advice — one practical, one strategic, one mindset-driven — and summarize the action steps suggested.

Prompt 20:

Write a GPT prompt that helps entrepreneurs recognize burnout signs. Ask for current workload, stress habits, and self-care gaps. GPT should return a burnout detection checklist, reflection questions, and a reset strategy to regain focus and energy without guilt.

Category 39: Reels & Short-Form Content Strategy

Prompt 1:

Write a GPT prompt to generate a week's worth of Instagram Reels ideas for a personal brand. Ask for niche, audience pain points, and brand tone. GPT should return 7 reel concepts with hook lines, suggested B-roll or visual style, and CTA suggestions that align with brand values and storytelling.

Prompt 2:

Create a GPT prompt to script a 30-second viral short-form video. Ask for topic, tone (humorous, serious, inspiring), and transformation shared. GPT should return a script broken into attention hook (0–3 sec), value delivery (4–20 sec), and CTA/outro (21–30 sec).

Prompt 3:

Design a GPT prompt that builds a content hook vault for Reels or Shorts. Ask for content pillars and audience fears/desires. GPT should return 20 hook starters using curiosity, controversy, storytelling, or stats to boost watch rate and early retention.

Prompt 4:

Write a GPT prompt to create a faceless short-form content workflow. Ask for niche, tools used (text-to-video, AI avatars), and goal. GPT should return a weekly content plan, script structure, editing template, and publishing checklist for creating powerful content without being on camera.

Prompt 5:

Generate a GPT prompt to turn long-form YouTube content into Instagram Reels. Ask for video link, timestamp of key moments, and theme. GPT should return micro-content script snippets, repurposing format (hook+clip+overlay), and caption suggestions.

Prompt 6:

Create a GPT prompt to write a batch of Reels CTAs. Ask for action type (comment, share, click link) and tone. GPT should return 10 CTA lines tailored to short-form content that boost engagement, profile taps, and saves.

Prompt 7:

Design a GPT prompt to create a viral meme-style short. Ask for niche and trend format. GPT should return script + layout

using relatable pain points or pop culture clips with suggested text overlays and punchlines for relatability and shareability.

Prompt 8:

Write a GPT prompt that generates Reels ideas from viral tweets or quotes. Ask for niche, audience belief, and inspiration type (motivational, funny, bold). GPT should return 5 Reels using audio cues, caption overlays, or visual reenactments of the tweet/quote.

Prompt 9:

Generate a GPT prompt to repurpose blog content into Reels. Ask for blog link or paragraph, key message, and delivery tone. GPT should return a short-form script, visual storytelling idea, and a CTA pointing back to full content for more traffic.

Prompt 10:

Create a GPT prompt to write storytelling-style Reels. Ask for lesson, personal story, and moral. GPT should return a structured 3-part Reel (hook – story – transformation), background music cues, emotional pacing notes, and suggested CTA to comment or DM.

Prompt 11:

Design a GPT prompt to brainstorm visual B-roll for Reels. Ask for message or theme. GPT should return B-roll shot ideas (walking, pointing, whiteboard, product demo), text overlay formats, and camera movement suggestions for a smooth visual experience.

Prompt 12:

Write a GPT prompt to generate 3 Reels for a lead magnet funnel. Ask for freebie type, problem it solves, and visual preference. GPT should return a 3-part video strategy (awareness, urgency, benefits), with hook, CTA, and recommended audio trends.

Prompt 13:

Generate a GPT prompt to create a reel format for objection handling. Ask for audience objections (price, time, trust). GPT should return reel scripts addressing each objection using storytelling, analogy, or FAQ format that dissolves doubt and builds credibility.

Prompt 14:

Create a GPT prompt to write reels using trending audio. Ask for niche, platform (Instagram or TikTok), and goal (growth, conversion, community). GPT should return 5 video ideas using current audios, timing sync suggestions, and overlay prompts for impact.

Prompt 15:

Design a GPT prompt to build a personal branding series in reels. Ask for niche, 3 brand values, and target audience. GPT should return a 5-reel mini-series plan with themes like origin story, beliefs, client wins, behind-the-scenes, and "why me" content.

Prompt 16:

Write a GPT prompt to create Reels around FAQs. Ask for your top 5 client or follower questions. GPT should return a script, visual cue idea (talking head, text screen), and comment CTA that encourages conversation and shares.

Prompt 17:

Generate a GPT prompt that creates an educational reel with text overlays. Ask for teaching topic, format (tips, myth-busting), and tone. GPT should return 30-second script with text segments for each slide, pacing, and visual styling suggestion.

Prompt 18:

Create a GPT prompt to generate Instagram Reels with zero talking. Ask for niche, video goal, and content idea type (list, quote, trend). GPT should return a silent reel structure with motion, text, emojis, stock footage cue, and music sync tips.

Prompt 19:

Design a GPT prompt that creates a storytelling framework for reels. Ask for format (lesson, client case, personal win). GPT should return a three-scene arc (problem – insight – resolution), visual hook, on-screen captions, and emotional pacing.

Prompt 20:

Write a GPT prompt to repurpose daily experiences into reels. Ask for what happened, audience relevance, and goal. GPT should return a reel script using "this happened → here's the lesson → here's what you can do" with authentic storytelling voice.

Category 40: Coaching & Consulting Services

Prompt 1:

Write a GPT prompt that builds a client onboarding experience for a coach. Ask for coaching niche, session format, and onboarding goal. GPT should return email copy, welcome guide ideas, scheduling setup, and pre-session questionnaire questions to build trust and professionalism from day one.

Prompt 2:

Create a GPT prompt to write a coaching sales page. Ask for coaching offer, target transformation, and client pain points. GPT should return headline ideas, section flow (problem, promise, proof), client testimonial structure, and CTA text for booking a call or purchase.

Prompt 3:

Design a GPT prompt that generates a high-converting discovery call script. Ask for offer type and target client. GPT should return a conversational script that builds rapport, uncovers pain points, qualifies the lead, presents your offer, and handles objections confidently.

Prompt 4:

Write a GPT prompt that helps coaches create a unique signature framework. Ask for coaching result, steps used, and client challenges. GPT should return a 3- to 5-step method with catchy labels, descriptions, and visual breakdown ideas to clarify and differentiate your approach.

Prompt 5:

Generate a GPT prompt that writes an irresistible coaching offer. Ask for niche, problem solved, and coaching format. GPT should return a one-paragraph pitch including benefits, features, outcome promise, and urgency with optional bonus stack recommendations.

Prompt 6:

Create a GPT prompt that builds a group coaching program. Ask for transformation goal, program duration, and session frequency. GPT should return session titles, weekly breakdown, engagement elements (homework, Voxer support), and community platform setup.

Prompt 7:

Design a GPT prompt to craft a 6-month client transformation roadmap. Ask for client goal, coaching model, and touchpoint frequency. GPT should return a month-by-month outline of milestones, coaching themes, accountability check-ins, and celebration rituals.

Prompt 8:

Write a GPT prompt to build a consulting proposal template. Ask for service type, project scope, and pricing model. GPT should return a clean document layout with sections: problem, solution, deliverables, timeline, investment, and terms — written persuasively but clearly.

Prompt 9:

Generate a GPT prompt to write weekly client progress reports. Ask for coaching niche and metrics tracked. GPT should return a report template including highlights, challenges, wins, feedback, next steps, and a motivational sign-off to keep clients engaged.

Prompt 10:

Create a GPT prompt to generate LinkedIn content ideas for coaches. Ask for niche and tone (educational, reflective, bold). GPT should return 10 content hooks using client wins, frameworks, beliefs, and actionable micro-tips that attract inbound coaching leads.

Prompt 11:

Design a GPT prompt to help consultants position themselves for premium pricing. Ask for niche, client ROI, and delivery method. GPT should return value articulation prompts, high-ticket messaging examples, and ways to package services with layered outcomes and confidence.

Prompt 12:

Write a GPT prompt to create a lead magnet for coaches. Ask for audience stage and transformation they seek. GPT should return 3 ideas (quiz, workbook, checklist), content outline, opt-in headline suggestions, and email nurture follow-up tips.

Prompt 13:

Generate a GPT prompt that outlines your client qualification system. Ask for offer type and client challenges. GPT should return application form questions, filtering logic, and red flags — helping you enroll aligned clients who are ready to commit.

Prompt 14:

Create a GPT prompt to help coaches build an objection-handling vault. Ask for niche and common sales objections. GPT should return 10 persuasive reframes, FAQ responses, and story-driven rebuttals to use in DMs, discovery calls, or content.

Prompt 15:

Design a GPT prompt to help consultants map their signature offer into a 5-day challenge. Ask for transformation goal and delivery format. GPT should return daily topics, outcomes, challenge title, opt-in flow, and final offer CTA strategy.

Prompt 16:

Write a GPT prompt that builds a client results showcase page. Ask for niche, past wins, and content type (text, video). GPT should return layout ideas, story structure (before/after), testimonial prompts, and credibility boosting tips with proof stacking logic.

Prompt 17:

Generate a GPT prompt to build a consulting intake questionnaire. Ask for service offered and project type. GPT should return questions on business background, project goals, timelines, bottlenecks, and success criteria — plus a thank-you message at the end.

Prompt 18:

Create a GPT prompt that writes email marketing for coaching services. Ask for niche, client type, and email goal. GPT should return a 5-email sequence with value drops, client story integration, trust-building language, and final CTA to book or buy.

Prompt 19:

Design a GPT prompt to structure weekly live Q&A sessions for coaching groups. Ask for group size and session length. GPT should return session flow: warm-up questions, focused coaching blocks, community shares, action prompts, and post-call feedback forms.

Prompt 20:

Write a GPT prompt to script a coach's origin video. Ask for the coach's backstory, transformation theme, and client promise. GPT should return a story arc covering struggle, epiphany, method, and mission with emotional touchpoints and closing CTA to work together.

 **Category 41: App & SaaS Tools (For Builders & Marketers)**

Prompt 1:

Write a GPT prompt that helps SaaS founders identify a profitable micro-niche. Ask for core software functionality, broad target audience, and founder's background. GPT should return 3 niche angles where competition is lower, market pain is urgent, and positioning can be clear, including ideal customer persona insights.

Prompt 2:

Create a GPT prompt to generate a launch marketing plan for a new SaaS tool. Ask for tool type, pricing model, and platform preferences. GPT should return a 4-week pre-launch to post-launch strategy covering waitlist creation, early access offers, onboarding emails, and retention actions.

Prompt 3:

Design a GPT prompt to write a SaaS website homepage. Ask for product name, key benefit, and ideal user. GPT should return a layout with hook-based headline, explainer paragraph, social proof, product preview, call-to-action, and optional free trial or demo CTA.

Prompt 4:

Write a GPT prompt to script a demo video for a SaaS tool. Ask for product feature, target user, and tone (professional, casual, technical). GPT should return a 60–90 second walkthrough script showing use cases, user interface highlights, and core benefits with a final CTA.

Prompt 5:

Generate a GPT prompt that creates onboarding emails for a SaaS product. Ask for product name and user goal. GPT should return a 5-email welcome sequence with themes like getting started, unlocking key features, support resources, use case tips, and upgrade pitch.

Prompt 6:

Create a GPT prompt to outline a SaaS pricing page. Ask for product value tiers, user volume, and competitors. GPT should return pricing layout (monthly vs annual), comparison tables, plan names, psychological pricing tips, and FAQ section suggestions.

Prompt 7:

Design a GPT prompt to craft a SaaS customer retention strategy. Ask for churn rate, user feedback, and team size. GPT should return churn causes, feature education content, milestone reward email flows, loyalty program ideas, and support escalation structure.

Prompt 8:

Write a GPT prompt that creates a SaaS product roadmap from customer feedback. Ask for pain points, user roles, and business goals. GPT should return a prioritized roadmap format with themes like UX improvement, integrations, analytics, and scaling features.

Prompt 9:

Generate a GPT prompt that builds a cold outreach sequence for B2B SaaS. Ask for decision maker type, pain point, and solution value. GPT should return 3–5 email or LinkedIn message templates personalized to specific industries and use cases.

Prompt 10:

Create a GPT prompt to summarize SaaS analytics for marketing teams. Ask for metrics to track (LTV, CAC, retention), product goal, and team size. GPT should return a simplified dashboard explanation, definitions, and weekly KPI insights to guide growth experiments.

Prompt 11:

Design a GPT prompt to write SaaS update release notes. Ask for update type (bug fix, feature, UI), tone, and user familiarity. GPT should return concise changelog copy, highlight-worthy updates, and a friendly CTA to explore or leave feedback.

Prompt 12:

Write a GPT prompt that outlines a SaaS affiliate program. Ask for pricing tiers, commission % and user journey. GPT should return affiliate dashboard structure, onboarding emails, promotional materials, performance tracking, and payout logic.

Prompt 13:

Generate a GPT prompt to create SaaS explainer content for non-technical users. Ask for product category and top three user questions. GPT should return FAQs, analogy-based explanations, tooltips, and visual guide structure using real-world metaphors.

Prompt 14:

Create a GPT prompt to script SaaS customer success case studies. Ask for client type, tool used, and result achieved. GPT should return a story structure: challenge – solution – result – quote – CTA, along with publishing suggestions.

Prompt 15:

Design a GPT prompt to compare your SaaS product with competitors. Ask for feature set, pricing advantage, and UX benefits. GPT should return a battle card breakdown or comparison table for use in landing pages, ads, and sales decks.

Prompt 16:

Write a GPT prompt that helps SaaS founders design a feedback loop system. Ask for product usage goals and user behavior data. GPT should return survey templates, session replay tips, in-app feedback widgets, and roadmap update systems.

Prompt 17:

Generate a GPT prompt that builds a product-led growth strategy for SaaS. Ask for freemium plan details and user lifecycle stage. GPT should return an activation funnel, feature discovery ideas, upgrade nudges, and success milestone incentives.

Prompt 18:

Create a GPT prompt to write push notification copy for a SaaS app. Ask for feature being promoted and desired user action. GPT should return 5 variations with urgency, curiosity, personalization, and smart linking options.

Prompt 19:

Design a GPT prompt to structure a SaaS onboarding checklist. Ask for user type (marketer, dev, solopreneur), tool category, and platform. GPT should return steps with explanations, visuals needed, in-app guidance ideas, and optional email automation links.

Prompt 20:

Write a GPT prompt to develop a SaaS partnership strategy. Ask for complementary products, audience overlap, and brand tone. GPT should return co-marketing ideas (webinars, bundles), affiliate offers, co-branded landing pages, and collaboration outreach templates.

Category 41: App & SaaS Tools (For Builders & Marketers)

Prompt 1:

Write a GPT prompt that helps SaaS founders identify a profitable micro-niche. Ask for core software functionality, broad target audience, and founder's background. GPT should return 3 niche angles where competition is lower, market pain is urgent, and positioning can be clear, including ideal customer persona insights.

Prompt 2:

Create a GPT prompt to generate a launch marketing plan for a new SaaS tool. Ask for tool type, pricing model, and platform preferences. GPT should return a 4-week pre-launch to post-launch strategy covering waitlist creation, early access offers, onboarding emails, and retention actions.

Prompt 3:

Design a GPT prompt to write a SaaS website homepage. Ask for product name, key benefit, and ideal user. GPT should return a layout with hook-based headline, explainer paragraph, social proof, product preview, call-to-action, and optional free trial or demo CTA.

Prompt 4:

Write a GPT prompt to script a demo video for a SaaS tool. Ask for product feature, target user, and tone (professional, casual, technical). GPT should return a 60–90 second walkthrough script showing use cases, user interface highlights, and core benefits with a final CTA.

Prompt 5:

Generate a GPT prompt that creates onboarding emails for a SaaS product. Ask for product name and user goal. GPT should return a 5-email welcome sequence with themes like getting started, unlocking key features, support resources, use case tips, and upgrade pitch.

Prompt 6:

Create a GPT prompt to outline a SaaS pricing page. Ask for product value tiers, user volume, and competitors. GPT should return pricing layout (monthly vs annual), comparison tables, plan names, psychological pricing tips, and FAQ section suggestions.

Prompt 7:

Design a GPT prompt to craft a SaaS customer retention strategy. Ask for churn rate, user feedback, and team size. GPT should return churn causes, feature education content, milestone reward email flows, loyalty program ideas, and support escalation structure.

Prompt 8:

Write a GPT prompt that creates a SaaS product roadmap from customer feedback. Ask for pain points, user roles, and business goals. GPT should return a prioritized roadmap format with themes like UX improvement, integrations, analytics, and scaling features.

Prompt 9:

Generate a GPT prompt that builds a cold outreach sequence for B2B SaaS. Ask for decision maker type, pain point, and solution value. GPT should return 3–5 email or LinkedIn message templates personalized to specific industries and use cases.

Prompt 10:

Create a GPT prompt to summarize SaaS analytics for marketing teams. Ask for metrics to track (LTV, CAC, retention), product goal, and team size. GPT should return a simplified dashboard explanation, definitions, and weekly KPI insights to guide growth experiments.

Prompt 11:

Design a GPT prompt to write SaaS update release notes. Ask for update type (bug fix, feature, UI), tone, and user familiarity. GPT should return concise changelog copy, highlight-worthy updates, and a friendly CTA to explore or leave feedback.

Prompt 12:

Write a GPT prompt that outlines a SaaS affiliate program. Ask for pricing tiers, commission % and user journey. GPT should return affiliate dashboard structure, onboarding emails, promotional materials, performance tracking, and payout logic.

Prompt 13:

Generate a GPT prompt to create SaaS explainer content for non-technical users. Ask for product category and top three user questions. GPT should return FAQs, analogy-based explanations, tooltips, and visual guide structure using real-world metaphors.

Prompt 14:

Create a GPT prompt to script SaaS customer success case studies. Ask for client type, tool used, and result achieved. GPT should return a story structure: challenge – solution – result – quote – CTA, along with publishing suggestions.

Prompt 15:

Design a GPT prompt to compare your SaaS product with competitors. Ask for feature set, pricing advantage, and UX benefits. GPT should return a battle card breakdown or comparison table for use in landing pages, ads, and sales decks.

Prompt 16:

Write a GPT prompt that helps SaaS founders design a feedback loop system. Ask for product usage goals and user behavior data. GPT should return survey templates, session replay tips, in-app feedback widgets, and roadmap update systems.

Prompt 17:

Generate a GPT prompt that builds a product-led growth strategy for SaaS. Ask for freemium plan details and user lifecycle stage. GPT should return an activation funnel, feature discovery ideas, upgrade nudges, and success milestone incentives.

Prompt 18:

Create a GPT prompt to write push notification copy for a SaaS app. Ask for feature being promoted and desired user action. GPT should return 5 variations with urgency, curiosity, personalization, and smart linking options.

Prompt 19:

Design a GPT prompt to structure a SaaS onboarding checklist. Ask for user type (marketer, dev, solopreneur), tool category, and platform. GPT should return steps with explanations, visuals needed, in-app guidance ideas, and optional email automation links.

Prompt 20:

Write a GPT prompt to develop a SaaS partnership strategy. Ask for complementary products, audience overlap, and brand tone. GPT should return co-marketing ideas (webinars, bundles), affiliate offers, co-branded landing pages, and collaboration outreach templates.

Category 42: Fashion & Beauty Marketing

Prompt 1:

Write a GPT prompt to craft an Instagram caption for a fashion brand's new collection launch. Ask for collection theme, brand tone, and audience type. GPT should return a caption with a strong emotional hook, style descriptions, trend connection, and a CTA that drives clicks to the shop link or saves the post.

Prompt 2:

Create a GPT prompt to generate a fashion email campaign. Ask for product type, launch date, and audience segment (e.g., loyal buyers, new subscribers). GPT should return a 3-email sequence including a teaser email, drop day announcement, and final-day scarcity reminder with clickable styling tips.

Prompt 3:

Design a GPT prompt to create a skincare product launch script for a Reels video. Ask for product name, skin benefits, and target problem. GPT should return a 30–60 second script with a hook, quick demo, ingredient spotlight, and gentle CTA to check link in bio.

Prompt 4:

Write a GPT prompt to generate beauty influencer partnership outreach messages. Ask for niche, product type, and influencer follower range. GPT should return a short, friendly outreach message including value proposition, brand vibe, sample offer, and expectations with room for personalization.

Prompt 5:

Generate a GPT prompt that creates a product description for a premium lipstick. Ask for brand values, tone (e.g., elegant, bold), and ingredients. GPT should return a seductive and high-converting product copy with sensory language, luxury appeal, and benefits-focused structure.

Prompt 6:

Create a GPT prompt to write a behind-the-scenes post for a fashion shoot. Ask for location, brand story, and photographer style. GPT should return caption ideas highlighting authenticity, model interaction, styling decisions, and mood board inspiration for storytelling and engagement.

Prompt 7:

Design a GPT prompt to script a TikTok ad for a viral fashion accessory. Ask for item type, unique hook, and demographic.

GPT should return a UGC-style script with trending audio cue, benefit highlight, social proof insert, and CTA with urgency language.

Prompt 8:

Write a GPT prompt to generate an influencer brief for a beauty product. Ask for platform (Instagram, YouTube, TikTok), product name, and brand message. GPT should return content direction, deliverable checklist, key talking points, hashtags to use, and visual guidelines.

Prompt 9:

Generate a GPT prompt to write a launch countdown email series. Ask for launch type (sale or drop), audience level, and product value. GPT should return a 5-day sequence that builds excitement, shares benefits, gives sneak peeks, and nudges FOMO.

Prompt 10:

Create a GPT prompt to write customer review request emails for beauty products. Ask for product category and purchase behavior. GPT should return a polite, on-brand email asking for a review, with reminder for how to submit, optional incentive, and review tone example.

Prompt 11:

Design a GPT prompt that creates outfit styling guides using a brand's new item. Ask for the item type and target audience lifestyle. GPT should return 3–5 outfit ideas across different occasions (casual, date night, travel), including accessory and footwear pairings.

Prompt 12:

Write a GPT prompt to craft a luxury fragrance ad. Ask for scent profile, mood, and ideal wearer. GPT should return high-end copy that evokes emotions, visual metaphors, and a short tagline fit for both print and short-form video voiceover.

Prompt 13:

Generate a GPT prompt to write a welcome sequence for a beauty brand. Ask for audience segment (new customer, subscriber), product focus, and tone. GPT should return a 3-email series with brand introduction, bestsellers, trust elements, and community-building invites.

Prompt 14:

Create a GPT prompt to build a social content calendar for a fashion brand. Ask for month, campaign focus (e.g., sustainability, trend), and posting frequency. GPT should return 15+ post ideas including Reels, carousels, stories, live stream topics, and CTA variations.

Prompt 15:

Design a GPT prompt to write a fashion trend forecast blog post. Ask for upcoming season and target audience. GPT should return an intro, 3–5 trend sections with references (color, cut, culture), styling tips, and product tie-ins for soft selling.

Prompt 16:

Write a GPT prompt that creates caption templates for beauty tips. Ask for niche (hair, skin, makeup), tone, and audience level (beginner, pro). GPT should return 5 caption outlines with intro question or hook, quick tip, expert reasoning, and gentle CTA.

Prompt 17:

Generate a GPT prompt to craft a gift guide landing page for fashion & beauty. Ask for holiday, product mix, and tone (classy, playful, edgy). GPT should return headline ideas, intro copy, product section titles, and styling flourishes for each gift set.

Prompt 18:

Create a GPT prompt to write ad copy for a limited-edition fashion item. Ask for product name, scarcity level, and brand voice. GPT should return 3 short ad scripts with urgency hooks, benefit stacks, scarcity CTA, and social proof line.

Prompt 19:

Design a GPT prompt to convert customer feedback into brand storytelling. Ask for raw reviews and product used. GPT should return a post or video script that turns praise into narrative — showing transformation, emotions, and lifestyle outcome.

Prompt 20:

Write a GPT prompt to plan a brand ambassador launch event. Ask for brand size, location, and product featured. GPT should return ideas for event theme, flow, interactive experiences, gift bag contents, and post-event content repurposing strategy.

Category 43: Health & Wellness Coaching

Prompt 1:

Write a GPT prompt to create a 7-day wellness reboot plan for busy professionals. Ask for energy level, sleep quality, and wellness goals. GPT should return a daily checklist with simple habits (hydration, movement, breathwork, digital detox), mindset affirmations, and reflective journal prompts to reset both body and mind holistically.

Prompt 2:

Create a GPT prompt that designs a personalized fitness plan. Ask for age, fitness level, goals (e.g., weight loss, endurance), and available time. GPT should return a weekly schedule with exercise types, time duration, rest days, and body-focus areas, plus motivational prompts and recovery tips.

Prompt 3:

Design a GPT prompt to generate affirmations for emotional wellness. Ask for mood patterns, daily stress sources, and healing intention. GPT should return 10 affirmations that support balance, groundedness, and emotional resilience — written with calming, supportive language ideal for journaling or morning practice.

Prompt 4:

Write a GPT prompt that builds a mindful morning routine. Ask for desired outcome (focus, calm, energy), time available, and preferences (movement, stillness, journaling). GPT should return a 3–5 step sequence with simple rituals, breath patterns, and nutrition suggestions for a centered start.

Prompt 5:

Generate a GPT prompt to craft a weekly meal plan. Ask for dietary preference (vegan, gluten-free, keto), cooking time, and fitness goals. GPT should return 5-day plans with breakfast, lunch, dinner, and snack ideas, including prep tips and shopping list suggestions.

Prompt 6:

Create a GPT prompt to write social media wellness content. Ask for audience struggles, niche focus (nutrition, fitness, mindset), and tone (uplifting, scientific, empathetic). GPT should return 5 post ideas using short tips, relatable storytelling, myth-busting, and habit stacking.

Prompt 7:

Design a GPT prompt to generate a meditation script. Ask for session goal (sleep, anxiety, clarity), duration, and preferred tone (soothing, guided, spiritual). GPT should return a step-by-step meditation with breath guidance, visualization, and closing affirmations for a grounded experience.

Prompt 8:

Write a GPT prompt to generate content ideas for a wellness podcast. Ask for core wellness philosophy, target listener, and format (solo, guest). GPT should return 10 episode titles with outlines focusing on real-life issues, routines, healing stories, and actionable steps.

Prompt 9:

Generate a GPT prompt that helps wellness coaches write client welcome emails. Ask for coaching focus and brand vibe. GPT should return a warm email template with sections like what to expect, first steps, client portal info, and mindset to bring into sessions.

Prompt 10:

Create a GPT prompt to write a monthly wellness newsletter. Ask for theme (sleep, gut health, self-love), audience demographics, and seasonal tie-ins. GPT should return a brief structure: welcome note, feature article, tool/resource spotlight, and a gentle challenge or journal prompt.

Prompt 11:

Design a GPT prompt to write a wellness lead magnet. Ask for niche, audience problem, and delivery format (PDF, quiz, checklist). GPT should return a 3-part value-driven outline, title ideas, opt-in copy, and a post-delivery CTA to join a coaching offer or free group.

Prompt 12:

Write a GPT prompt to create breathwork sequences. Ask for emotional state, session length, and setting. GPT should return a breathwork pattern (e.g., box breath, 4-7-8), guiding script, body awareness prompts, and closing affirmation to release stress and restore calm.

Prompt 13:

Generate a GPT prompt to help clients identify limiting wellness beliefs. Ask for recurring habits or self-talk. GPT should return reflection questions, common subconscious beliefs, journaling statements to flip negative thinking, and a visualization cue to anchor new self-identity.

Prompt 14:

Create a GPT prompt to generate workout motivation reels. Ask for fitness niche, target audience, and preferred vibe (gritty, uplifting, calm). GPT should return 3 reel scripts using motivational narration, progress storytelling, and transformation scenes synced with audio cues.

Prompt 15:

Design a GPT prompt to build a digital detox guide. Ask for average screen time, stress level, and work schedule. GPT should return step-down protocols, digital swap activities, reflection prompts, and accountability routines for reclaiming attention and calmness.

Prompt 16:

Write a GPT prompt to map out a 30-day wellness challenge. Ask for theme (hydration, movement, self-care), daily time availability, and group or solo use. GPT should return 30 short daily actions, reflection questions, and progress tracking ideas to maintain consistency.

Prompt 17:

Generate a GPT prompt to create testimonial prompts for wellness clients. Ask for transformation type and client personality. GPT should return interview-style questions to uncover real pain points, emotional shifts, wins, and suggestions for others — perfect for social proof.

Prompt 18:

Create a GPT prompt to write pre-session prep questions. Ask for session focus (nutrition, habits, burnout), and delivery method. GPT should return 5–7 reflective questions for clients to answer before coaching to improve clarity, self-awareness, and session productivity.

Prompt 19:

Design a GPT prompt to generate lifestyle coaching content for men. Ask for age range, stress factors, and identity shifts desired. GPT should return 5 post or video ideas covering performance, rest, masculine embodiment, and emotional awareness with a grounded tone.

Prompt 20:

Write a GPT prompt that turns common client excuses into content. Ask for niche (fitness, mindset, nutrition) and client type. GPT should return 5 content ideas using tough love, science, reframes, or humor — each tied to a deeper truth behind the excuse.

Category 44: Career Development & Job Search

Prompt 1:

Write a GPT prompt that creates a personalized resume summary. Ask for job title, years of experience, top 3 skills, and target industry. GPT should return a 3–4 line summary showcasing value, confidence, and alignment with the job role in a way that feels authentic and achievement-oriented.

Prompt 2:

Create a GPT prompt that writes a tailored cover letter for a specific role. Ask for job posting highlights, candidate strengths, and why the company interests them. GPT should return a 3-paragraph letter showing culture fit, transferable skills, and an enthusiastic closing call-to-action.

Prompt 3:

Design a GPT prompt that builds LinkedIn headlines for job seekers. Ask for industry, career goal, and keywords to include. GPT should return 5 headline options that are professional, keyword-rich, and convey a unique career value proposition.

Prompt 4:

Write a GPT prompt that structures a job interview response using the STAR method. Ask for question type (e.g., conflict, leadership), candidate's role, and a real example. GPT should return a compelling and clear STAR-formatted answer with impact metrics when possible.

Prompt 5:

Generate a GPT prompt to help users write a resignation letter. Ask for reason (new opportunity, burnout, relocation), company culture, and tone (gracious, firm). GPT should return a 1-page letter expressing gratitude, next steps, and professionalism for smooth exits.

Prompt 6:

Create a GPT prompt to write cold outreach messages for job opportunities. Ask for target company, role, and what value they bring. GPT should return a short, personalized message for email or LinkedIn that's warm, confident, and includes a soft CTA.

Prompt 7:

Design a GPT prompt that analyzes job postings. Ask for full job description and user's resume. GPT should return a

summary of role expectations, skill gaps, key action verbs, and suggestions to customize resume and cover letter effectively.

Prompt 8:

Write a GPT prompt that generates networking questions for informational interviews. Ask for industry, level of contact (peer, leader), and user's goal. GPT should return 10 conversation-starter questions showing curiosity, growth mindset, and interest in real-world insights.

Prompt 9:

Generate a GPT prompt to script a personal brand elevator pitch. Ask for career goal, unique strength, and a big win. GPT should return a 30–60 second pitch for networking events, interviews, or social bios that's concise and high impact.

Prompt 10:

Create a GPT prompt to map out a job search plan. Ask for target role, timeline, and daily availability. GPT should return a 4-week breakdown of tasks like application batching, networking, skill upskilling, and interview prep to reduce overwhelm.

Prompt 11:

Design a GPT prompt to help write follow-up emails after interviews. Ask for interview type, vibe, and key discussion points. GPT should return a polite, grateful, and personalized follow-up note with optional soft reminder or availability mention.

Prompt 12:

Write a GPT prompt that creates a career switch roadmap. Ask for current industry, target industry, and skills to transfer. GPT should return a step-by-step plan: research, skill-building, networking, content creation, and resume transformation to position them confidently.

Prompt 13:

Generate a GPT prompt that drafts LinkedIn posts for job seekers. Ask for recent accomplishment, goal, or reflection. GPT should return 3 post ideas with engaging hooks, storytelling tone, and value-based hashtags to draw recruiter or peer attention.

Prompt 14:

Create a GPT prompt that builds a list of questions to ask employers. Ask for job level, company culture interest, and role type. GPT should return 10 questions that show curiosity, alignment, and initiative — great for interviews or offer negotiations.

Prompt 15:

Design a GPT prompt to write a skills-based resume. Ask for core strengths, career stage, and achievements. GPT should return a format with section headers like “Problem Solving”, “Team Leadership”, “Tech Fluency” — each with brief bullet points of success stories.

Prompt 16:

Write a GPT prompt that helps introverts prepare for virtual interviews. Ask for company type and common concerns. GPT should return mindset reframes, prep questions, tips on virtual presence, and closing scripts to confidently express competence and calm energy.

Prompt 17:

Generate a GPT prompt to write a thank-you message after rejection. Ask for role, level of connection felt, and feedback request. GPT should return a classy and growth-mindset email that shows maturity, openness to future roles, and appreciation.

Prompt 18:

Create a GPT prompt that helps mid-career professionals reinvent their brand. Ask for burnout areas, desired impact, and transferable skills. GPT should return a brand statement, headline, LinkedIn bio ideas, and potential portfolio elements to align with their pivot.

Prompt 19:

Design a GPT prompt to assess offer letters. Ask for job details and offer content. GPT should return a checklist of red flags, negotiation opportunities, and benefits breakdown for smart, informed decisions before accepting.

Prompt 20:

Write a GPT prompt that helps students with no experience build a strong resume. Ask for volunteer work, soft skills, coursework, and career aspiration. GPT should return a resume template with strength-based sections, project highlights, and value framing language.

Category 45: Parenting & Family Wellness

Prompt 1:

Write a GPT prompt to create a positive parenting affirmation list. Ask for the child's age range, the parent's biggest struggles, and family values. GPT should return 10 affirmations parents can repeat daily to build patience, connection, and self-compassion while managing the challenges of modern parenting.

Prompt 2:

Create a GPT prompt to design a family digital detox weekend plan. Ask for the number of kids, age ranges, and available local activities. GPT should return a 2-day itinerary of screen-free ideas including outdoor games, bonding activities, journaling time, and meals made together.

Prompt 3:

Design a GPT prompt that creates an emotional regulation guide for kids. Ask for the child's age, common triggers, and setting (home, school, public). GPT should return breathing techniques, grounding games, emotion vocabulary visuals, and parent coaching tips to support kids calmly.

Prompt 4:

Write a GPT prompt that generates bedtime storytelling rituals. Ask for child's age, interests (space, animals, magic), and preferred duration. GPT should return story starters, imaginative dialogue cues, calming endings, and options for kids to co-create the story with parents.

Prompt 5:

Generate a GPT prompt that writes a weekly parenting journal. Ask for child's milestones, current struggles, and goals. GPT should return prompts for reflecting on wins, learning moments, connection habits, and intentions for the upcoming week — ideal for mindful parenting.

Prompt 6:

Create a GPT prompt that outlines a co-parenting communication agreement. Ask for parenting dynamics, shared goals, and pain points. GPT should return a flexible framework for respectful tone, child-focused decisions, conflict boundaries, and weekly check-in structure to reduce tension.

Prompt 7:

Design a GPT prompt to build a chore schedule that works for the whole family. Ask for number of members, ages, and time availability. GPT should return task breakdowns, visual charts, reward options, and weekly rotation strategies for accountability and fairness.

Prompt 8:

Write a GPT prompt that generates a family gratitude practice. Ask for household size, spiritual values (if any), and preferred format (verbal, written, artistic). GPT should return a 7-day plan with prompts for morning reflections, dinner conversations, and bedtime gratitude habits.

Prompt 9:

Generate a GPT prompt to script difficult conversations with kids. Ask for child's age, the issue (death, divorce, bullying), and tone. GPT should return a gentle and emotionally safe script with validation, simple words, analogies, and follow-up questions for connection.

Prompt 10:

Create a GPT prompt that plans a mindful family morning routine. Ask for school/work start times and current morning struggles. GPT should return a routine that includes connection time, healthy breakfast ideas, prep tasks, and affirmations to set a peaceful tone.

Prompt 11:

Design a GPT prompt to create screen-time boundaries for tweens. Ask for current habits, family values, and flexibility level. GPT should return a clear agreement with time caps, usage types (learning vs leisure), review rituals, and natural consequence ideas.

Prompt 12:

Write a GPT prompt to develop confidence-building activities for kids. Ask for child's interests, age, and typical fears. GPT should return 5 play-based or real-life ideas that gently push growth, build resilience, and encourage problem-solving or emotional expression.

Prompt 13:

Generate a GPT prompt to write parenting social media content. Ask for audience (moms, dads, blended families), message type (inspiration, humor, education), and brand tone. GPT should return 3 caption ideas with personal story structures and relatable calls-to-action.

Prompt 14:

Create a GPT prompt that helps parents create value-based family rules. Ask for top 3 family values, recent discipline challenges, and parenting tone. GPT should return a rule list written in positive language, visuals to support it, and explanation models for kids.

Prompt 15:

Design a GPT prompt to help overwhelmed moms feel seen. Ask for age of kids, current emotional load, and type of support needed. GPT should return a self-compassion letter, a 5-minute self-care practice, and gentle mindset reframes to carry into the day.

Prompt 16:

Write a GPT prompt to craft sibling bonding activities. Ask for ages, personalities, and shared interests. GPT should return collaborative games, challenge-based fun, shared creative projects, and quiet bonding options for different energy levels.

Prompt 17:

Generate a GPT prompt to write family values affirmations. Ask for 3–5 core values (kindness, creativity, honesty). GPT should return a set of 10 affirmations phrased in “We believe...” style for daily family repetition or visual display.

Prompt 18:

Create a GPT prompt to write lunchbox love notes for kids. Ask for child’s age, current mood (excited, nervous), and parent’s message tone. GPT should return 5 short, playful or loving notes to include in lunches that boost confidence and connection.

Prompt 19:

Design a GPT prompt to write family mission statements. Ask for goals, challenges, and core values. GPT should return 2–3 sentence options in warm and uplifting tone, suitable for fridge magnets, journal covers, or daily reminders.

Prompt 20:

Write a GPT prompt to develop family self-care Sunday routines. Ask for energy level, preferred time together, and screen boundaries. GPT should return a flow including meals, nature time, light cleaning rituals, intention-setting, and gratitude to close the weekend.

Category 46: YouTube Growth & Monetization

Prompt 1:

Write a GPT prompt that generates a complete content calendar for a YouTube creator. Ask for niche, target audience, posting frequency, and monetization goal. GPT should return 4 weeks of video titles, themes, and hooks with suggested calls to action for growth and earnings.

Prompt 2:

Create a GPT prompt to help write YouTube video titles and thumbnails. Ask for video topic, audience type, and tone (e.g., curiosity, fear, benefit-driven). GPT should return 5 title-thumbnail combos with click-worthy phrasing and emotional/visual triggers.

Prompt 3:

Design a GPT prompt to script a 10-minute YouTube video. Ask for topic, tone, value type (education, entertainment), and CTA. GPT should return a script with a strong hook, story arc, value delivery, and a persuasive close to drive subscribers or offers.

Prompt 4:

Write a GPT prompt that creates a video description optimized for SEO. Ask for keywords, content summary, and target viewer intent. GPT should return a 2-paragraph description with keywords, social links, and engagement prompts (subscribe, comment, playlist link).

Prompt 5:

Generate a GPT prompt to write a channel “About” section. Ask for niche, content focus, and brand tone. GPT should return a 2–3 line intro, publishing schedule, and a subscriber CTA — formatted to be compelling and keyword-rich.

Prompt 6:

Create a GPT prompt that generates YouTube Shorts ideas. Ask for niche, average video length, and content format (talking head, montage, text-based). GPT should return 5 Shorts content ideas with hooks, themes, and CTA suggestions for virality.

Prompt 7:

Design a GPT prompt to build a lead magnet funnel from YouTube. Ask for audience problem, lead magnet type, and

content flow. GPT should return video topic suggestions, lead magnet tease scripts, and description link strategy for email capture.

Prompt 8:

Write a GPT prompt that creates an affiliate income plan for YouTube. Ask for niche, product type, and audience trust level. GPT should return a 3-step plan: product selection, content angle (review, how-to), and links strategy for higher CTR and compliance.

Prompt 9:

Generate a GPT prompt to write a channel intro video script. Ask for who the creator is, what the channel covers, and upload frequency. GPT should return a 60–90 second script that's energetic, value-driven, and includes subtle branding.

Prompt 10:

Create a GPT prompt to repurpose long videos into other platforms. Ask for duration, topic, and style. GPT should return 5 clip ideas for Shorts, Instagram Reels, and Twitter threads using most engaging moments, story arcs, and value breakdowns.

Prompt 11:

Design a GPT prompt to audit and improve a creator's last 10 videos. Ask for titles, average view count, and audience retention stats. GPT should return insights into what's working, what needs change, and content experiment ideas to grow subs and watch time.

Prompt 12:

Write a GPT prompt to generate sponsorship pitch emails. Ask for niche, subscriber count, engagement rate, and audience alignment. GPT should return a professional message template with brand hook, deliverables, and value proposition.

Prompt 13:

Generate a GPT prompt that writes end-screen and mid-roll CTA scripts. Ask for video type and viewer mindset at that point. GPT should return short lines to boost subscribers, lead magnet clicks, or playlist views while maintaining trust and flow.

Prompt 14:

Create a GPT prompt to map a product launch using YouTube. Ask for launch type (digital, physical), launch date, and price. GPT should return a 3-video funnel plan: awareness teaser, value-packed preview, and launch-day CTA video with urgency.

Prompt 15:

Design a GPT prompt to help creators batch produce YouTube content. Ask for number of videos, production style, and

available hours. GPT should return a batching workflow: script themes, filming blocks, editing schedule, and release rhythm.

Prompt 16:

Write a GPT prompt to identify viral content opportunities. Ask for niche, last 10 successful video titles, and current trends. GPT should return a research-backed list of 5 content angles that blend search intent with story-driven emotional hooks.

Prompt 17:

Generate a GPT prompt to write community tab polls and posts. Ask for audience stage and video themes. GPT should return 3 post ideas that build connection, tease content, and increase comment interaction.

Prompt 18:

Create a GPT prompt to brainstorm monetization beyond AdSense. Ask for niche, audience size, and creator strengths. GPT should return 5 income ideas: digital products, memberships, coaching, affiliate partnerships, and donation strategies — each with CTA suggestions.

Prompt 19:

Design a GPT prompt that writes thank-you messages for milestone videos. Ask for subscriber milestone and brand tone. GPT should return a heartfelt script blending gratitude, storytelling, and an invitation to the next content journey.

Prompt 20:

Write a GPT prompt to generate a 30-day channel growth challenge. Ask for audience type and goals (subs, comments, hours). GPT should return daily actions like video planning, posting cadence, community interaction, and analytics check-ins.

Category 47: Relationship Advice & Dating Coaching

Prompt 1:

Write a GPT prompt to generate modern dating profile bios. Ask for gender, age, interests, and platform (Tinder, Bumble, Hinge). GPT should return 3 engaging, witty, and authentic profile options that express personality while subtly hinting at relationship goals or compatibility.

Prompt 2:

Create a GPT prompt that writes powerful conversation openers. Ask for dating platform, tone (funny, sincere, flirty), and the other person's profile info. GPT should return 5 ice-breakers that are tailored, respectful, and likely to start a meaningful conversation.

Prompt 3:

Design a GPT prompt to help someone script a first date plan. Ask for city, mutual interests, time of day, and vibe (casual, romantic, quirky). GPT should return a full plan including activity, location, conversation starter suggestions, and natural exit strategy.

Prompt 4:

Write a GPT prompt to coach someone through a breakup. Ask for length of relationship, reason for breakup, and emotional state. GPT should return a supportive message, steps to release guilt or blame, and self-care practices for emotional recovery and reflection.

Prompt 5:

Generate a GPT prompt to write thoughtful apology messages in a relationship. Ask for conflict type, what was said/done, and the partner's personality. GPT should return a heartfelt message with empathy, ownership, and a request to reconnect without manipulation.

Prompt 6:

Create a GPT prompt that helps couples improve communication. Ask for common issue (tone, misunderstanding, timing) and goals (clarity, respect, connection). GPT should return daily practices, sample conversation templates, and mindset reframes to create emotional safety and trust.

Prompt 7:

Design a GPT prompt to help identify attachment styles. Ask for recurring relationship patterns, emotional responses, and triggers. GPT should return a breakdown of likely attachment style (anxious, avoidant, secure) with guidance on how to improve or heal patterns.

Prompt 8:

Write a GPT prompt that generates weekly intimacy-building prompts for couples. Ask for relationship stage and comfort level. GPT should return 7 conversation starters or small acts to deepen emotional connection, physical affection, and mutual appreciation.

Prompt 9:

Generate a GPT prompt to script a boundary-setting conversation. Ask for boundary type (time, space, language), relationship status, and concern. GPT should return a calm, clear script using "I" statements and respectful tone to assert boundaries without escalating tension.

Prompt 10:

Create a GPT prompt that helps someone spot red flags in dating. Ask for recent experiences, gut feelings, and values. GPT should return a list of behaviors to watch for, reflection questions, and a checklist for healthy vs toxic patterns.

Prompt 11:

Design a GPT prompt to write a long-distance relationship plan. Ask for distance, communication preferences, and time zones. GPT should return a weekly schedule of calls, rituals, trust-building practices, and digital date ideas for closeness despite space.

Prompt 12:

Write a GPT prompt that helps people express love languages. Ask for their own language, partner's language, and recent issues. GPT should return ideas to meet each other's needs with real-life actions, thoughtful messages, and meaningful gestures.

Prompt 13:

Generate a GPT prompt that crafts responses to ghosting. Ask for how many messages were sent, emotional impact, and preferred tone (empowered, detached, curious). GPT should return 2–3 response options (or silence) to reclaim emotional dignity and move on.

Prompt 14:

Create a GPT prompt to help someone flirt over text. Ask for connection level, past exchanges, and their own personality. GPT should return 5 messages that use humor, subtlety, curiosity, and connection — without being overbearing or insincere.

Prompt 15:

Design a GPT prompt to prepare for difficult relationship talks. Ask for the topic (commitment, trust, money), emotional charge, and desired outcome. GPT should return a conversation plan with openers, pauses, empathy cues, and next-step options.

Prompt 16:

Write a GPT prompt to plan an anniversary surprise. Ask for length of relationship, shared memories, and available time/budget. GPT should return creative gift ideas, surprise date flow, and sentimental messages to celebrate love in a unique way.

Prompt 17:

Generate a GPT prompt to help someone heal from emotional cheating. Ask for what happened, current feelings, and support system. GPT should return a process guide for understanding betrayal, rebuilding self-worth, and deciding boundaries or next steps.

Prompt 18:

Create a GPT prompt to generate daily journal prompts for relationship self-awareness. Ask for recurring themes (trust, commitment, conflict), relationship stage, and tone (healing, growth, insight). GPT should return 7 reflective writing prompts for inner clarity and intention.

Prompt 19:

Design a GPT prompt to help couples plan monthly check-in conversations. Ask for focus (goals, needs, frustrations), comfort level, and time. GPT should return a script and checklist for reviewing connection, appreciation, boundaries, and what to improve.

Prompt 20:

Write a GPT prompt that writes closure letters. Ask for relationship type, unresolved feelings, and what they wish they could say. GPT should return a healing letter with honesty, ownership, emotional expression, and release — never meant to send, only to heal.

Category 48: Side Hustles & Passive Income Ideas

Prompt 1:

Write a GPT prompt that generates a step-by-step plan to start a side hustle with zero capital. Ask for user skills, time availability, and monetization preference (services, content, products). GPT should return a lean strategy using free tools, market research tips, and traffic methods.

Prompt 2:

Create a GPT prompt that suggests digital product ideas for passive income. Ask for niche, audience interest, and content format (ebook, template, course). GPT should return 5 product ideas, platform suggestions (e.g., Gumroad, Etsy), and marketing tips for long-term revenue.

Prompt 3:

Design a GPT prompt to brainstorm YouTube-based passive income models. Ask for creator type (educator, entertainer, reviewer), niche, and consistency level. GPT should return channel themes, monetization options, affiliate opportunities, and passive growth content formulas.

Prompt 4:

Write a GPT prompt to create a print-on-demand shop. Ask for niche, preferred product (t-shirt, mug, journal), and design style. GPT should return shop name ideas, design concepts, platform suggestions (Redbubble, TeeSpring), and promotion methods using AI-generated assets.

Prompt 5:

Generate a GPT prompt to build an affiliate blog plan. Ask for niche, content type (tutorials, reviews, comparison), and SEO skill level. GPT should return domain name ideas, pillar content structure, affiliate programs to join, and ways to drive organic traffic.

Prompt 6:

Create a GPT prompt to write a 7-day passive income challenge. Ask for user's goal (first sale, email signups), experience level, and niche. GPT should return daily action tasks, free tools to use, motivational quotes, and tracking sheet ideas.

Prompt 7:

Design a GPT prompt that gives content repurposing strategies for passive income. Ask for existing content type (blogs,

reels, newsletters), niche, and preferred platform. GPT should return 5 ways to transform content into paid offers, lead magnets, or monetized posts.

Prompt 8:

Write a GPT prompt to create an Etsy digital product shop. Ask for skill (design, writing, planner making), target customer, and product type. GPT should return 3 ideas with listing suggestions, SEO tips, and automation tools to scale the shop passively.

Prompt 9:

Generate a GPT prompt that maps out a passive income funnel using email. Ask for lead magnet topic, audience pain point, and product price point. GPT should return opt-in ideas, email sequence blueprint, and CTA structure that nurtures sales while you sleep.

Prompt 10:

Create a GPT prompt that suggests top AI tools to build side hustles. Ask for goal (automation, content, design), skill level, and time available. GPT should return 5 AI tools with brief use cases, pricing tiers, and integration suggestions to optimize effort.

Prompt 11:

Design a GPT prompt to create a no-face YouTube automation channel. Ask for niche (motivation, finance, productivity), preferred video format, and monetization goal. GPT should return channel structure, script/video generation process, and workflow for uploading consistently without showing your face.

Prompt 12:

Write a GPT prompt that identifies 5 fast-start side hustles for introverts. Ask for personality traits, preferred work style (solo, digital, async), and income goals. GPT should return practical ideas that leverage focus, creativity, and minimal social interaction.

Prompt 13:

Generate a GPT prompt to plan a low-maintenance membership model. Ask for niche, content format (audio, templates, coaching), and monthly price. GPT should return platform suggestions, onboarding flow, content calendar sample, and retention strategies to grow recurring income.

Prompt 14:

Create a GPT prompt to draft an ebook for passive income. Ask for topic, audience pain points, and transformation. GPT should return a chapter outline, lead magnet preview, distribution platforms, and upsell ideas for additional revenue.

Prompt 15:

Design a GPT prompt that helps users package their knowledge into a course. Ask for expertise, audience transformation, and tech level. GPT should return course outline, hosting platforms, passive delivery model, and pre-launch marketing flow.

Prompt 16:

Write a GPT prompt that helps freelancers turn clients into digital product buyers. Ask for niche, past service types, and recurring requests. GPT should return productization ideas (templates, guides, swipe files), pricing, and upsell funnel tips.

Prompt 17:

Generate a GPT prompt to compare 3 passive income models. Ask for user's skill, budget, and preferred involvement level. GPT should return pros/cons, timeline to earn, platforms, and who each model suits best (content creator, investor, service provider).

Prompt 18:

Create a GPT prompt that builds a low-effort newsletter side hustle. Ask for audience type, niche, and monetization method (ads, affiliates, paid issues). GPT should return newsletter names, growth strategy, newsletter tech stack, and sample week plan.

Prompt 19:

Design a GPT prompt to help creators monetize their prompts or templates. Ask for type of template (Notion, ChatGPT, Canva), target audience, and price range. GPT should return listing descriptions, bundle ideas, and promo strategies for passive sales.

Prompt 20:

Write a GPT prompt that creates a 30-day roadmap to earn \$500 passively. Ask for niche, skill level, and available time per day. GPT should return a plan with discovery phase, product creation, launch, automation setup, and traffic tasks day-by-day.

Category 49: AI Tools & Automation Workflows

Prompt 1:

Write a GPT prompt that helps users build an automated content repurposing system using AI. Ask for content type (video, blog, podcast), preferred platforms (Instagram, LinkedIn, TikTok), and frequency. GPT should return a step-by-step automation workflow using tools like ChatGPT, Zapier, and Canva.

Prompt 2:

Create a GPT prompt that maps a daily productivity workflow using AI assistants. Ask for job role, typical tasks, and tools already used. GPT should return an AI-enhanced schedule where ChatGPT drafts, Notion organizes, and other tools automate follow-ups or summarization.

Prompt 3:

Design a GPT prompt to help create an AI-powered lead generation system. Ask for niche, target customer, and platform (email, LinkedIn, website). GPT should return a plan using AI tools for scraping, email writing, personalization, and CRM integration to automate outreach.

Prompt 4:

Write a GPT prompt to help build an automation for solopreneurs. Ask for business type, recurring manual tasks, and available tools. GPT should return a blueprint of Zapier automations, scheduling workflows, auto-replies, and AI-generated reports to save time weekly.

Prompt 5:

Generate a GPT prompt that creates a low-code chatbot for website conversion. Ask for business niche, key services, and goals (capture leads, support, qualify users). GPT should return a dialogue flow using tools like Landbot, ChatGPT API, or ManyChat.

Prompt 6:

Create a GPT prompt to map an AI-based content calendar. Ask for niche, number of posts per week, and desired platforms. GPT should return 30 days of AI-generated post types, prompts to use in ChatGPT, and tools to automate posting.

Prompt 7:

Design a GPT prompt to build a “one-person business” system using AI tools. Ask for goal (\$100/day, passive, client-based), skills, and time. GPT should return tools to use (ChatGPT, Canva, Zapier), business model suggestions, and a weekly automation setup plan.

Prompt 8:

Write a GPT prompt to automate customer onboarding for digital products. Ask for product type (course, template, ebook), platform used (Gumroad, Kajabi), and user flow. GPT should return a series of automated emails, triggers, and tools to guide the user seamlessly.

Prompt 9:

Generate a GPT prompt to automate podcast production using AI. Ask for podcast format, length, and existing tools. GPT should return a workflow with tools like Descript (editing), ChatGPT (titles & summaries), Castmagic (show notes), and scheduling automation.

Prompt 10:

Create a GPT prompt that builds a research automation workflow. Ask for industry, frequency, and goal (summarize trends, extract insights, find stats). GPT should return a system using AI to pull, summarize, tag, and organize information with minimal manual work.

Prompt 11:

Design a GPT prompt to automate YouTube scriptwriting and repurposing. Ask for niche and target length. GPT should return a prompt chain to use with ChatGPT: script writing, shorts slicing, headline suggestions, and community post ideas for each upload.

Prompt 12:

Write a GPT prompt to auto-generate invoices and emails using AI. Ask for business type, tools used (Google Sheets, Stripe), and email platform. GPT should return a setup using Zapier and GPT to draft and send recurring documents with personalization.

Prompt 13:

Generate a GPT prompt that creates a virtual assistant role using AI. Ask for tasks to delegate (email, booking, reminders), and platform used. GPT should return prompts and tools to create workflows with tools like Reclaim, Motion, or AI bots.

Prompt 14:

Create a GPT prompt to monitor brand mentions using AI tools. Ask for platform preference (Twitter, Reddit, blogs) and business type. GPT should return a setup using tools like Brand24 or custom GPT-based scripts to collect and summarize daily mentions.

Prompt 15:

Design a GPT prompt that summarizes weekly business metrics. Ask for tools used (Google Analytics, Stripe, Notion), desired format (table, email), and metrics tracked. GPT should return an automation setup that fetches, analyzes, and sends reports automatically.

Prompt 16:

Write a GPT prompt that turns Zoom recordings into shareable assets using AI. Ask for meeting type (sales, training, webinar). GPT should return a workflow to summarize, generate clips, blog posts, or SOPs using tools like Scribe, ChatGPT, and Opus.

Prompt 17:

Generate a GPT prompt to help build AI-assisted social proof. Ask for product or service, testimonial sources (DMs, reviews, comments). GPT should return a process to extract, rewrite, and visualize testimonials using ChatGPT and Canva.

Prompt 18:

Create a GPT prompt to build a self-updating resume and portfolio using AI. Ask for role, project types, and document format. GPT should return a prompt that compiles recent work, metrics, and visual formatting updates using Notion AI or GPT scripts.

Prompt 19:

Design a GPT prompt that helps automate social DMs for lead nurturing. Ask for platform (Instagram, Twitter, LinkedIn), goal, and warm lead triggers. GPT should return templates for welcome flows, follow-ups, and value-first engagement using AI and DM tools.

Prompt 20:

Write a GPT prompt to auto-generate blog articles from newsletter issues. Ask for newsletter frequency, tone, and typical topics. GPT should return a workflow where newsletters are parsed by GPT, expanded into SEO-optimized blogs, and posted with tools like WordPress + Make.

Category 50: Creator Economy & Monetization Strategies

Prompt 1:

Write a GPT prompt to map a full monetization strategy for a content creator. Ask for platform (YouTube, Instagram, TikTok), follower count, and niche. GPT should return monetization options including affiliate marketing, brand deals, digital products, and services — ranked by effort and revenue potential.

Prompt 2:

Create a GPT prompt to write brand pitch emails for creators. Ask for niche, engagement rate, target brand, and desired deliverables. GPT should return a compelling email script that introduces the creator, aligns brand goals, and proposes a win-win collaboration.

Prompt 3:

Design a GPT prompt to help creators launch their first digital product. Ask for audience pain point, format preference (ebook, template, course), and creator platform. GPT should return product idea, pricing, landing page copy, and a 3-day mini-launch plan.

Prompt 4:

Write a GPT prompt to automate a creator's income dashboard. Ask for revenue sources (AdSense, Patreon, affiliates), platforms used, and preferred format. GPT should return a workflow using Google Sheets and AI summaries to track monthly earnings and compare trends.

Prompt 5:

Generate a GPT prompt that writes an "About Me" page for monetization. Ask for creator values, niche, and brand vibe. GPT should return a story-driven, SEO-friendly "About" section that connects with readers and subtly nudges toward products or offers.

Prompt 6:

Create a GPT prompt to help creators diversify income streams. Ask for current revenue method, niche, and follower size. GPT should return 5 tailored income ideas like coaching, digital bundles, merch, workshops, and exclusive content — with tools to start each.

Prompt 7:

Design a GPT prompt that plans a paid community model. Ask for niche, audience size, and preferred platform (Discord, Circle, Patreon). GPT should return naming ideas, content plan, pricing tiers, and launch funnel to turn followers into superfans.

Prompt 8:

Write a GPT prompt to generate a content-to-income strategy. Ask for niche, platforms, content type (reels, blogs, emails), and goals. GPT should return how to turn attention into revenue with funnels, CTAs, and offers baked into value posts.

Prompt 9:

Generate a GPT prompt that builds a creator's media kit. Ask for audience stats, past brand work, and niche. GPT should return sections like about, reach, engagement, example work, testimonials, and package pricing — formatted for brands to quickly scan.

Prompt 10:

Create a GPT prompt that helps creators launch a low-ticket product. Ask for problem solved, ideal price (\$5–\$20), and content skills. GPT should return product idea, landing copy, checkout setup, and social media post examples for launch week.

Prompt 11:

Design a GPT prompt to create an evergreen sales funnel. Ask for product type, audience intent level (cold, warm), and budget. GPT should return ad headline ideas, lead magnet flow, email automation sequence, and closing CTA optimization.

Prompt 12:

Write a GPT prompt that generates niche-specific affiliate programs for creators. Ask for niche, audience type, and content format. GPT should return 5 top affiliate programs, payout details, and content integration tips (like tutorials, reviews, or recommendations).

Prompt 13:

Generate a GPT prompt that writes an annual income plan for creators. Ask for monthly income goal, content platforms, and skill focus. GPT should return a quarterly roadmap with launches, affiliate campaigns, partnerships, and repurposing strategies.

Prompt 14:

Create a GPT prompt to script paid offer shoutouts. Ask for offer type (course, bundle, challenge), platform, and tone. GPT should return story-driven promotional scripts for reels, email, or stories that educate, hook, and convert.

Prompt 15:

Design a GPT prompt to organize all monetization assets. Ask for offer type, number of links, and platform. GPT should return a layout for a link-in-bio page, Notion hub, or smart landing page with conversion copy and visuals.

Prompt 16:

Write a GPT prompt that helps creators build a viral paid offer funnel. Ask for product type, price point, and platform. GPT should return freebie hooks, launch content order, urgency tactics, and growth loops for maximum exposure and sales.

Prompt 17:

Generate a GPT prompt to create a content licensing offer. Ask for niche, original assets (videos, templates, photos), and audience type. GPT should return a plan to license content to brands or other creators, including pricing and pitch messages.

Prompt 18:

Create a GPT prompt to help creators get paid speaking or webinar gigs. Ask for subject expertise, past speaking experience, and audience type. GPT should return pitch email, speaker one-sheet content, and pricing packages.

Prompt 19:

Design a GPT prompt that helps creators choose between Patreon, Substack, or Gumroad. Ask for audience engagement level, content format, and goals. GPT should return a platform comparison based on retention, ownership, payout, and ease of scaling.

Prompt 20:

Write a GPT prompt that helps creators price their digital products. Ask for niche, product type, competitor pricing, and value offered. GPT should return a pricing strategy, upsell flow, and positioning guide to balance affordability and profitability.
